This book constitutes the refereed proceedings of the 8th International Conference on Web Reasoning and Rule Systems, RR 2014, held in Athens, Greece in September 2014. The 9 full papers, 9 technical communications and 5 poster presentations presented together with 3 invited talks, 3 doctoral consortial papers were carefully reviewed and selected from 33 submissions. The conference covers a wide range of the following: semantic Web, rule and ontology languages, and related logics, reasoning, querying, searching and optimization, incompleteness, inconsistency and uncertainty, non-monotonic, common sense, and closed-world reasoning for the web, dynamic information, stream reasoning and complex event processing, decision making, planning, and intelligent agents, machine learning, knowledge extraction and information retrieval, data management, data integration and reasoning on the web of data, ontology-based data access, system descriptions, applications and experiences.

Something Special Springer

For the Vampire community, the Solstice Choosing has been the holiest night of the year - for a hundred thousand years. But this year, something new is about to happen. The oldest prophecies are about to be fulfilled - and the Festival of Blessings is finally upon us.

A Life Less Ordinary Energy Efficiency in Motor Driven Systems

If you are new to the Raspberry Pi, the Arduino, or home automation and wish to develop some amazing projects using these tools, then this book is for you. Any experience in using the Raspberry Pi would be an added advantage.

Details Persias growing military and economic power in the late antique worldThe Sasanian Empire (3rd7th centuries) was one of the largest empires of antiquity, stretching from Mesopotamia to modern Pakistan and from Central Asia to the Arabian Peninsula. This mega-empire withstood powerful opponents in the steppe and expanded further in Late Antiquity, whilst the Roman world shrunk in size. Recent research has revealed the reasons for this success: notably population growth in some key territories, economic prosperity, and urban development, made possible through investment in agriculture and military infrastructure on a scale unparalleled in the late antique world. Our volume explores the empires relations with its neighbours and key phenomena which contributed to its wealth and power, from the empires armed forces to agriculture, trade and treatment of minorities. The latest discoveries, notably major urban foundations, fortifications and irrigations systems, feature prominently. An empire whose military might and culture rivalled Rome and foreshadowed the caliphate will be of interest to scholars of the Roman and Islamic world.Challenges our Eurocentric world view by presenting a Near-Eastern empire whose urban culture and military apparatus rivalled that of Rome Covers the latest discoveries on foundations, fortifications and irrigation systemsIncludes case studies on Sasanian frontier walls and urban culture in the Sasanian Empire

Panda Quartile - Empress of a strange other-dimensional Earth - becomes stuck in our own world after a cosmic accident during a shopping trip. Unable to return for 6 months, she poses as a university student to pass the time, and makes friends with neighbour Jo Dribble. Panda's naivete(c) and enthusiasm to experience

Earth lead them to a series of daft adventures together..."

*The Way of Illumination* Legare Street Press

This book reports the state of the art of energy-efficient electrical motor driven system technologies, which can be used now and in the near future to achieve significant and cost-effective energy savings. It includes the recent developments in advanced electrical motor end-use devices (pumps, fans and compressors) by some of the largest manufacturers. Policies and programs to promote the large scale penetration of energy-efficient technologies and the market transformation are featured in the book, describing the experiences carried out in different parts of the world. This extensive coverage includes contributions from relevant institutions in the Europe, North America, Latin America, Africa, Asia, Australia and New Zealand.

There is a flourishing literature on citizenship education in China that is mostly unknown in the West. Liberal political theorists often assume that only in democracy should citizens be prepared for their future responsibilities, yet citizenship education in China has undergone a number of transformations as the political system has sought to cope with market reforms, globalization and pressures both externally and within the country for broader political reforms. Over the past decade, Chinese scholars have been struggling for official recognition of citizenship education as a key component of the school curriculum in these changing contexts. This book analyzes the citizenship education issues under discussion within China, and aims to provide a voice for its scholars at a time when China's international role is becoming increasingly important.

If you can build websites with CSS and JavaScript, this book takes you to the next level—creating dynamic, database-driven websites with PHP and MySQL. Learn how to build a database, manage your content, and interact with users. With step-by-step tutorials, this completely revised edition gets you started with expanded coverage of the basics and takes you deeper into the world of server-side programming. The important stuff you need to know: Get up to speed quickly. Learn how to install PHP and MySQL, and get them running on both your computer and a remote server. Gain new techniques. Take advantage of the all-new chapter on integrating PHP with HTML web pages. Manage your content. Use the file system to access user data, including images and other binary files. Make it dynamic. Create pages that change with each new viewing. Build a good database. Use MySQL to store user information and other data. Keep your site working. Master the tools for fixing things that go wrong. Control operations. Create an administrative interface to oversee your site.

An intricately woven, coming-of-age story. . . . Bravely written . . . An entertaining and memorable read! --Lou Fallot, Publisher's Report 12/05

*Web Reasoning and Rule Systems* Packt Publishing Ltd

The "Europe against Cancer" programme has, from its inception, emphasised the key role which general practitioners must play in the actions necessary to achieve its aim of reduc ing the incidence and the mortality from cancer in the European Community. General practitioners, because of their day-to-day direct and continuing contact with patients, play a role not only in primary prevention and education of patients, but also in motivating their patients to accept secondary prevention and screening, some of it carried out by general practitioners themselves. These preventive activities are in addition to their traditional role in the care and management of patients with cancer at home, and increas ingly, their role in active treatment. In view of the importance of the general practitioner in the "Europe against Cancer" pro gramme, the European Commission, with a view to providing general practitioners with up-tO-date useful information, has sponsored the production of this series of publications on organ based cancers, especially written for general practitioners. MICHEL RICHONNIER Coordinator of the "Europe against Cancer" programme, Commission ofthe European Communities, Brussels Preface The present textbook is the second in the series published by the Commission of the Euro pean Communities within the context of the "Europe Against Cancer" Programme. After lung cancer, it was felt that priority should be given to breast cancer, the most frequent neoplastic disease among European women.

Life doesn't look like it's supposed to for Dani Ruiz, a hopeless romantic. After a painful and sudden break-up with Rick Marin, Dani hides away from reality, retreating to a world of fiction where she prefers book boyfriends over the hassles of a relationship. Almost two years later, Dani's friends are tired of watching her in a holding pattern, so they stage an intervention, forcing her back into the real world of dating. Unexpectedly, Dani meets Liam Lucas, a down-to-earth firefighter. He might be the person to show her she's still worth something. Dani's hesitant to trust her heart with another man, but their instant and electric chemistry is something she can't deny. As Dani starts to believe that she's found her real-life book boyfriend, Rick decides that he'll go to any lengths to get her back. Seeing Rick as a changed man makes Dani question everything. Can Dani trust her patched-up heart with Liam? Or has Rick transformed into the man she's always wanted? Written from various points of views, The Do Over is a story of second chances and new beginnings.

A broken family finds its way back together in this captivating story from the author of Church of the Dog A charismatic author with a voice and message all her own, Kaya McLaren has become beloved in the book world as much for her upbeat energy as for her rich storytelling. In On the Divinity of Second Chances, she portrays a family on the brink of dissolution-a mother besieged by middle age, a distant father lost in daily life, and their three teenage children struggling in various ways with the family's disintegration even as they conceal a secret that could send their parents further over the edge. With the help of a group of tap-dancing old ladies, a sensual tango teacher, and a lot of luck, this family is about to learn that everyone gets a second chance which, as McLaren beautifully reminds us in this inspiring novel, is sometimes even better than the first.

*Energy Efficiency in Motor Driven Systems* A L Zaun Publishing

Introducing a NEW addition to our growing library of computer science titles, Algorithm Design and Applications, by Michael T. Goodrich & Roberto Tamassia! Algorithms is a course required for all computer science majors, with a strong focus on theoretical topics. Students enter the course after gaining hands-on experience with computers, and are expected to learn how algorithms can be applied to a variety of contexts. This new book integrates application with theory. Goodrich & Tamassia believe that the best way to teach algorithmic topics is to present them in a context that is motivated from applications to uses in society, computer games, computing industry, science, engineering, and the internet. The text teaches students about designing and using algorithms, illustrating connections between topics being taught and their potential applications, increasing engagement.

Mr Tumble is funny and so are his friends! Join Aunt Polly, Grandad, Tumble and many more in this annual which is packed with silly stories, songs, puzzles, activities, character profiles and games! And while you're having fun there are some simple Makaton signs to try. It's perfect for all Mr Tumble fans.

The Man in the Water "O'Reilly Media, Inc."

Presents equations for predicting the flow of compressible and incompressible fluids through control valves. The equations for compressible fluids are for use with gas or vapor and are not intended for use with multiphase streams such as gas-liquid, vapor-liquid or gas-solid mixtures. The equations for incompressible flow are based on standard hydrodynamic equations for Newtonian incompressible fluids and are not intended for use when non-Newtonian fluids, fluid mixtures, slurries, or liquid-solid conveyance systems are encountered.
