Data Analytics : The Complete Beginner's Guide - The Black ... In this Data Analytics Tutorial, let us now explore the characteristics of data analysis which make it different from traditional kind of analysis. 1. Programmatic. There might be a need to write a program for data analysis by using code to manipulate it or do any kind of

exploration because of the scale of the data. 2. Data-driven
[Data Analytics The Complete Beginners](#)

Analytics needs data to work, and data that hasn't been sorted and analyzed is not very helpful. Data needs to be properly interpreted and organized to be useful, a process that includes removing data that isn't useful (scrubbing the data), organizing it into more logical groupings, and connecting data points to find patterns, insights, and useful information that might hint at future tendencies.
