"Nissan Z: 50 Years of Exhilarating Performance is a handsomely illustrated coffee-table book celebrating five decades of Nissan's immensely popular Z-Cars, from the ground-breaking 1970 240Z to today's top-performing 370Z, including the 50th anniversary Z. The story begins with the introduction of Nissan's (then Datsun) first foray into the sports-car world, the Datsun Roadster then gets into the details regarding the creation of the legendary 240Z. Each derivative is explored: including 260Z, 280Z, 280ZX, 300ZX through today's 370Z. Nissan's Z is one of the few sports car models to be in production for 50 years, and Nissan Z pays fitting tribute to its proud heritage"--

Lead Like the Sun This book expresses the challenges the author faced in life while attempting to fit into constantly

Throughout the book, the author explains the transitions involving his fool's hill-a concept presented to him by his grandmother. Early in life, the author experienced changing life situations, and he desired to be accepted, which led to mischievousness then gravitated to crime and other rebellious acts. As a high school dropout, the author volunteered to serve in the United States Marine Corps, and after enlistment, struggles continued. After earning his high school diploma, discharge from the military, and the birth of his son, the author decided to turn his life around but struggled making the transition. During employment challenges

and several money-making ventures, the author earns two associate's degrees, a bachelor's of science, a master's degree, and eventually, a doctorate in education degree from Pepperdine University.

Haphazardly, he finds employment that helps troubled individuals, and from communicating the challenges he faced, assisted others in finding their way. Behold, the author discovers and finds his "Why" as stated in the quote by Mark Twain. Nevertheless, after facing personal challenges including divorce, he detaches from family and finds his love for the outdoors, especially backpacking, which many African Americans don't partake. Several challenging escapades in the wilderness he

explains humorously. Eventually, the author reconnects with family. This book differs from others because it describes the challenges an African American male, who isn't a celebrity, faces while transitioning from a troubled inner-city life to one that helps others succeed.

Included in the book is much history about the civil rights era and beyond. Many situations explained with a comedic twist.

This study
chronicles the
success of the
Japanese car in
America. Starting
with Japan's first
gasoline-powered
car, the Takuri, it
examines early

and automotive
conditions in
Japan; the arrival
of Japanese cars in
California in the
late 1950s;
consumer and media

reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the

possible future of this union, most importantly in the race for a more environmentally-sound vehicle.

Datsun's initial offerings were fairly conventional family cars, but with the introduction of the 240Z in 1969 the marque's image received a massive boost. It was a runaway success, outselling every European sports car model in the lucrative North

American market. The 280Z arrived in 1975 followed by the 280ZX in 1978 and sales of the 280ZX had reached over 446,000 units by the time production came to an end in 1983. 44 international articles include road, track and comparison tests, a service guide plus full technical and performance data.
