Outfoxed Radar Instruction Manual Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to

facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. When life falls apart, where is God? Does he care? Can he fix things? Does he really love us? In an uncertain world, people need to know that God is still in control, that he cares for us and even suffers with us, and that he has a plan that cannot be defeated. In his compassionate and caring style, Warren W. Wiersbe offers discouraged readers a positive treatment of suffering that reveals the Bible's authoritative and comforting answers to big questions. His faith-bolstering insight will show readers that, with God as their source of comfort, strength, and hope, they can weather the storms of life--and come out on top.
