candid, and straight, Helen Branson operated a gay bar in Los Angeles in the 1950s—America's most anti-gay decade. After years of fending off drunken passes as an entertainer in cocktail bars, this divorced grandmother preferred the wit, variety, and fun she found among homosexual men. Enjoying their companionship and deploring their plight, she gave her gay friends a place to socialize. Though at the time California statutes prohibited homosexuals from gathering in bars, Helen's place was relaxed, suave, and remarkably safe from police raids and other anti-homosexual hazards. In 1957 she published her extraordinary memoir *Gay Bar*, the first book by a heterosexual to depict the lives of homosexuals with admiration, respect, and love. In this new edition of *Gay Bar*, Will Fellows interweaves Branson's chapters with historical perspective provided through his own insightful commentary and excerpts gleaned from letters and essays appearing in gay publications of the period. Also included is the original introduction to the book by maverick 1950s psychiatrist Blanche Baker. The eclectic selection of voices gives the flavor of American life in that extraordinary age of anxiety, revealing how gay men saw themselves and their circumstances, and how others perceived them. This open access book provides a multi-perspective approach to the caravan trade in the Sahara during the 19th

century. Based on travelogues from European travelers, recently found Arab sources, historical maps and results from several expeditions, the book gives an overview of the historical periods of the caravan trade as well as detailed information about the infrastructure which was necessary to establish those trade networks. Included are a variety of unique historical and recent maps as well as remote sensing images

---

of the important trade routes and the corresponding historic oases. To give a deeper understanding of how those trading networks work, aspects such as culturally influenced concepts of spatial orientation are discussed. The book aims to be a useful reference for the caravan trade in the Sahara, that can be recommended both to students and to specialists and researchers in the field of Geography, History

and African Studies. Oxidation of Alcohols to Aldehydes and Ketones Wayne State University Press Originally published in hardcover in 1972, *A Day No Pigs Would Die* was one of the first young adult books, along with titles like *The Outsiders* and *The Chocolate War*. In it, author Robert Newton Peck weaves a story of a Vermont boyhood that is part fiction, part memoir. The result is a moving coming-of-age story that still resonates with teens today.

I love the long distance run, when you feel like you're about to die. . .and then you reach this place where you feel like there are no boundaries for you anywhere. . . In many ways, Jason Peele is like any other teenager. He hits the books, hangs with his friends, flirts with girls, and omits the full truth of his life from his Aunt Audrey and Uncle Steve, who have raised him since his parents died. But there's one way that Jason Peele

---

is very different: when he dreams at night, it isn't about girls; it's about David Bowie. At sixteen-years-old, Jason is just beginning to understand that he might be gay. The one place Jason feels comfortable is on the track where he can run fast and hard. He loves the feel of the wind at his back, of his legs propelling him furiously around, the roar of the crowd in his ears. But now, even his sanctuary feels threatening. It isn't just the jerks who call him "faggot" in the locker room. A new guy has joined the team, and everything about him will challenge the way Jason sees life. From late-night showings of "La Cage Aux Folles" to reading Gandhi, he's running a new race on an uncertain course, and only one thing's for sure--his senior year is going to be unforgettable. . . . With *A Secret Edge*, Robin Reardon delivers a sexy, sensitive coming-of-age novel about identity and courage, love and honor, anger and hope, and the many ways the truth can really set you free. "As sexy as it is surprising. *A Secret Edge* is a refreshing spin on the coming out story as well as a memorable new love story for the new millennium." --Brian Sloan, author of *A Tale of Two Summers*

The highly successful Hubble Space Telescope was meant

---

to change our view and understanding of the universe. Within weeks of its launch in 1990, however, the space community was shocked to find out that the primary mirror of the telescope was flawed. It was only the skills of scientists and engineers on the ground and the daring talents of astronauts sent to service the telescope in December 1993 that saved the mission. For over two decades NASA had developed the capabilities to service a payload in orbit. This involved numerous studies and the creation of a ground-based infrastructure to support the challenging missions. Unique tools and EVA hardware supported the skills developed in crew training that then enabled astronauts to complete a demanding series of spacewalks. Drawing upon first hand interviews with those closely involved in the project over thirty years ago this story explains the development of the servicing mission concept and the hurdles that had to be overcome to not only launch the telescope but also to mount the first servicing mission – a mission that restored the telescope to full working order three years after its launch, saved the reputation of NASA, and truly opened

---

a new age in understanding of our place in space. This is not just a tale of space age technology, astronauts and astronomy. It is also a story of an audacious scientific vision, and the human ingenuity and determination to overcome all obstacles to make it possible. Hubble Space Telescope: From Concept to Success is a story of an international partnership, dedicated

teamwork and a perfect blend of human and robotic space operations that will inspire people of all ages. The subsequent servicing missions that enabled the telescope to continue its scientific program beyond its 25th year in orbit are described in a companion volume Enhancing Hubble 's Vision: Servicing a National Treasure. Explore the theory and practical applications of artificial intelligence (AI) and machine learning in healthcare. This book offers a guided tour of machine learning algorithms, architecture design, and applications of learning in healthcare and big data challenges. You ' ll discover the ethical implications of healthcare data analytics and the future of AI in population and patient health optimization.

You ' ll also create a machine learning model, evaluate performance and operationalize its outcomes within your organization. Machine Learning and AI for Healthcare provides techniques on how to apply machine learning within your organization and evaluate the efficacy, suitability, and efficiency of AI applications. These are illustrated through leading case studies, including how chronic disease is being redefined through patient-led data

Homosexuality is often seen as a purely urban experience, far removed from rural and small-town life. Farm Boys undermines that cliché by telling the stories of more than three dozen gay men, ranging in age from 24 to 84, who grew up in farm families in the midwestern United States. Whether painful, funny, or matter-of-fact, these plain-spoken accounts will move and

educate any reader, gay or not, from farm or city. “ When I was fifteen, the milkman who came to get our milk was beautiful. This is when I was really getting horny to do something with another guy. I waited every day for him to come. I couldn ’ t even talk to him, couldn ’ t think of anything to say. I just stood there, watching him, wondering if he knew why. ” —Henry Bauer, Minnesota	“ When I go back home, I feel a real connection with the land—a tremendous feeling, spiritual in a way. It makes me want to go out into a field and take my shoes off and put my feet right on the dirt, establish a real physical connection with that place. I get homesick a lot, but I don ’ t know if I could ever go back there and live. It ’ s not the kind of place that would welcome me if I lived	openly, the way that I would like to live. I would be shunned. ” —Martin Scherz, Nebraska “ If there is a checklist to see if your kid is queer, I must have hit every one of them—all sorts of big warning signs. State, bent on remaking the world in its preferred image, is dangerous and self-defeating, he points out. Moreover, these grand-scale flights of interventionism, regime change, and the use of pre-emptive armed force are without precedent in American history. Merry offers a spirited description of a powerful political core whose ideas have replaced conservative reservations about utopian visions -- these neocons who "embrace a brave new world in which American exceptionalism holds sway," imagining that others around the globe can be made to abandon their cultures in favor of our ideals. He traces the strains of Wilsonism that have now merged into an adventurous and hazardous foreign policy, particularly as described by William Kristol, Francis Fukuyama, Max Boot, and Paul Wolfowitz, among others. He examines the challenge of Samuel Huntington's supposition that the clash of civilizations defines present and future world conflict. And he rejects the notion of The New York Times's Thomas L. Friedman that America is not only the world's role model for globally integrated free-market capitalism, but that it has a responsibility to foster, support, and

---

sustain globalization worldwide. From the first president Bush to Clinton to the second Bush presidency, the United States has compromised its global leadership, endangered its security, and failed to meet the standard of justified intervention, Merry suggests. The country must reset its global strategies to protect its interests and the West's, to maintain stability in strategic areas, and to fight

radical threats, with arms if necessary. For anything less than these necessities, American blood should remain in American veins.

A perfect and irresistible idea: A cookbook filled with delicious, healthful recipes created for everyone on a tight budget. While studying food policy as a master 's candidate at NYU, Leanne Brown

asked a simple yet critical question: How well can a person eat on the \$4 a day given by SNAP, the U.S. government 's Supplemental Nutrition Assistance Program informally known as food stamps? The answer is surprisingly well: Broiled Tilapia with Lime, Spicy Pulled Pork, Green Chile and Cheddar Quesadillas, Vegetable Jambalaya, Beet and Chickpea Salad—even desserts

---

like Coconut Chocolate Cookies and Peach Coffee Cake. In addition to creating nutritious recipes that maximize every ingredient and use economical cooking methods, Ms. Brown gives tips on shopping; on creating pantry basics; on mastering certain staples—pizza dough, flour tortillas—and saucy extras that make everything taste better, like spice oil and tzatziki; and how to	make fundamentally smart, healthful food choices. The idea for Good and Cheap is already proving itself. The author launched a Kickstarter campaign to self-publish and fund the buy one/give one model. Hundreds of thousands of viewers watched her video and donated \$145,000, and national media are paying attention. Even high-profile chefs and food writers have taken note—like Mark Bittman,	who retweeted the link to the campaign; Francis Lam, who called it “ Terrific! ” ; and Michael Pollan, who cited it as a “ cool kickstarter. ” In the same way that TOMS turned inexpensive, stylish shoes into a larger do-good movement, Good and Cheap is poised to become a cookbook that every food lover with a conscience will embrace.
