Some 28 million people in America and 350 million people worldwide live with hearing loss. How do these people and their families cope? What are their experiences of pain, humor, and hope? What support do medicine and technology now offer them, and what is on the horizon? In this engaging and practical book, David Myers, who has himself suffered gradual hearing loss, explores the problems faced

by the hard of hearing at home and at work and provides information on the new technology and groundbreaking surgical procedures that are available. Drawing on both his own experiences and his expertise as a social psychologist, Myers recounts how he has coped with hearing loss and how he has incorporated technological aids into his life. The family and friends of the hard of hearing also face adjustments. Myers addresses their situation and provides advice for them on how best to alert loved ones to a hearing problem, persuade them to seek assistance, and encourage them to adjust to and use hearing aids.

Exploring Psychology with Updates on DSM-5 Worth Publishers

"This is a book I (David) secretly wanted to write. I have long believed that what is wrong with all psychology textbooks (including those I have written) is their overlong chapters. Few can read a 40-page chapter in a single sitting without their eyes glazing and their mind wandering. So why not organize the discipline into digestible chunks-say forty 15-page chapters rather than fifteen 40-page chapters-that a student could read in a sitting, with a sense of completion? Thus, when McGraw-Hill

psychology editor Chris Rogers first suggested that I abbreviate and restructure my 15-chapter, 600-page Social Psychology into a series of crisply written 10-page modules, I said "Eureka!" At last a publisher willing to break convention by packaging the material in a form ideally suited to students' attention spans. By presenting concepts and findings in smaller bites, we also hoped not to overload students' capacities to absorb new information. And, by keeping Exploring Social Psychology slim, we sought to enable instructors to supplement it with other reading"--

Updated Myers' Psychology for AP® Macmillan Higher Education

This revised first edition is a comprehensive, easy-to-read introduction to personal counseling written for professional and volunteer counselors and those who train them. A major new addition to the book, making it particularly attractive to those who train counselors, is the inclusion of training group exercises for all skills chapters. After reading a particular chapter, the exercises relating to that chapter, in part VI of the book, can be used by trainers to greatly enhance the learning process. These exercises have been found to be popular with both students and those teaching them. The chapters describing basic and more advanced counseling skills are arranged in a sequence that is particularly suitable when teaching student counselors to learn and practice using these skills for the first time. The authors adopt an integrative approach that allows the reader to learn, understand, and use skills taken from major counseling approaches,

and to integrate these into a sequential process that maximizes the possibility of facilitating change in clients. Of considerable value for new counselors are those sections of the book that describe the fundamental principles of the counseling relationship, and explain the theories of change applicable to the various approaches to counseling. Unique features include: a highly practical integrative approach; discussion of the specific skills required for success; practical suggestions on ways to learn and develop new skills; an understanding of the role of a counselor's supervisor; information on practical issues such as keeping records, arrangement of the counseling room, and ways to look after yourself as a counselor; plus practical information on issues of confidentiality and professional ethics. The text will serve as a valuable resource for workers in a wide variety of helping professions where counseling skills are useful, such as psychology, social work, welfare work, medicine, nursing, human services, and education.
