Further research into Middle America bigfoot sightings indicates a strong connection between bigfoot and Native Americans, and witness descriptions show a strong human likeness. The latest research from the author of the groundbreaking *The Hoopa Project: Bigfoot Encounters in California* named 2008 Bigfoot Book of the Year by Cryptomundo.com. Dave Paulides brings his law-enforcement investigative and analytical skills to an expanded area of research: the counties in Northern California that have reported the greatest numbers of bigfoot occurrences, and beyond to Minnesota and Oklahoma. Gaining access to many people who have never discussed their bigfoot experiences publicly before now, the author obtains intriguing details that broaden our perception of the elusive creature; and his subsequent analysis leads to the discovery of a strong and consistent link between bigfoot and the Native American community. The expert interview and artistic skills of forensic artist Harvey Pratt help to define the creatures described by the witnesses -- once again with astonishing and illuminating results. The presentation of startling new forensic evidence indicates that there truly is an as-yet-unidentified primate living in the wilds of North America, and the author hints at new data on the horizon that will finally provide the tantalizing truth about the existence of bigfoot in North America.

When We Were Wolves Beyond the Fray Publishing

"If you could have been around a hundred and fifty years ago, and passed through the landscape as a beaver-trapping tough with Jim Bridger or Jedediah Smith, before coal barons, before soda ash and oil, before Mormons, before you could stand outside and watch satellites pass through the night sky or silhouettes kissing in warm apartment windows, when this history was wild and new, you could have just pointed and named something of permanence, a mountain, a river--at least a creek--after yourself. Or they would have named it for you, a permanent mark, just for being here." From a new talent that Annie Proulx has called an "important emerging writer" comes a surprising and expansive collection of stories, steeped in the lore of the frontier but unmistakably fresh and of our time. When We Were Wolves roams over a West we never knew existed--colonized by rogues and tricksters, Custer impersonators, firefighters with a weakness for arson, and the other rootless folk who come to rest under the vast and forgiving desert sky. Jon Billman writes about accidental lives: people who are trapped in unsuitable marriages, impossible situations, but who handle them with the odd grace of those who are determined to live by their own strange code. He mingles the skewed humor of David Sedaris with the loping, rough-edged appeal of Tom McGuane. This is a beguiling new entry on the map of American fiction.

(www.canammissing.com) People have been disappearing under mysterious circumstances for centuries. During the last 150 years the media has covered many of these cases and has attempted to put a rational spin on a very unusual event. After 3+ years and 7000 hours of intensive research there is a new paradigm being presented on people missing in the wilds of North America. "Missing 411" identifies 28 clusters of missing people who have vanished in remote areas of the continent. The finding is a troubling fact questioning why and how these people have disappeared. Some of the victims are found and tell a very interesting and mind bending story of their experience, others are never found, a fact that confounds searchers and law enforcement. There are many children that have disappeared under highly unusual circumstances. After weeks of searching and

failing to find any evidence of the child being in a remote location, many parents and law enforcement draw the conclusion that the victim was kidnapped, yes, taken by someone lurking in remote areas of our national parks, forests, farms and even ranches. There are two editions of this research, "Missing 411-Eastern United States" and "Missing 411-Western United States." The eastern United States copy has a list of every person who is listed in each book as well as a final conclusion to the investigation. You will be shocked by the lack of interest and documentation that many of our governmental bodies have committed to missing people. After reading these books you will never look at our wildlands the same. Chapters;1. Introduction1A. Clusters1B. Unique Factors in Disappearances2. Missing People3. Unique Groups of Missing People3A. The paper trail uncovered by Paulides through sheer doggedness is impressive, the evidence indisputable. Childress takes a deep look at Bigfoot Nation—the seemingly real world of bigfoot around us in the United States and Canada. Whether real or imagined, that bigfoot has made his way into the American psyche cannot be denied. He appears in television commercials, movies, and on roadside billboards. In fact, bigfoot is everywhere, with actors portraying him in variously believable performances and it has become the popular notion that bigfoot is both dangerous and horny. Indeed, bigfoot is out there stalking lover's lanes and is even more lonely than those frightened teenagers that he sometimes interrupts. Bigfoot, tall and strong as he is, makes a poor leading man in the movies with his awkward personality and typically anti-social behavior. He doesn't care a skunk's gland how many movies or commercials are made about him without any royalties whatsoever being paid. To him, Bigfoot Nation is all about style, a lifestyle—shall we say—that keeps bigfoot on the fringes of society, gently creeping into our dreams. Chapters include: 1800 to 1899: The Wildmen of the Frontier; The Oldest Bigfoot Photo; 1900 to 1940: The Pre-War Years; 1950 to 1990: The Post-War Years; The Skunk Apes of Swamp Nation; Bigfoot in the Southwest; 2000 to 2020: Post-Millennial Bigfoot, more. Virtually all countries in the world are affected by the scourge of human trafficking, either as a source, transit, or destination country, or combination thereof. While countries have long focused on international trafficking, internal movement and exploitation within countries may be even more prevalent than trans-border trafficking. Patterns of trafficking vary across countries and regions and are in a constant state of flux.

Countries have long focused on trafficking solely for the purpose of sexual exploitation, yet exploitation in agriculture, construction, fishing, manufacturing, and the domestic and food service industries are prevalent in many countries. Here, Aronowitz takes a global perspective in examining the nefarious underworld of human trafficking, revealing the nature and extent of the harm caused by this hideous criminal practice.

Here, Aronowitz takes a global perspective in examining the nefarious underworld of human trafficking, revealing the nature and extent of the harm caused by this hideous criminal practice.

Taking a victims-oriented approach, this book examines the criminals and criminal organizations that traffic and exploit their victims. The author also focuses on the different groups of victims as well as the various forms of and markets for trafficking, many of which have been overlooked due to an emphasis on sex trafficking. She also explores less frequently discussed forms of trafficking - in organs, child soldiers, mail-order brides, and adoption, as well as the use of Internet in trafficking. Drawing on her own field experiences in various parts of the world, the author offers real-life context throughout the book through descriptions of a number of cases with which she was involved or learned about in her travels. Together with insightful analysis, these stories uncover the true nature of human trafficking and illustrate the extent of its reach and harm.

Missing 411- Off The Grid Missing 411- Off The Grid is the seventh book in the best selling series about missing people. The books are based on actual law enforcement, search and rescue and archived reports of incidents. The author has based the narrative on delivering the facts and not making unsubstantiated claims. Thousands of case files were reviewed and what's presented are incidents that fit narrow criteria of established profile points. According to the Urban Dictionary, Off the Grid means, "untraceable through normal means." The individuals that are documented in this seventh book of the Missing 411 series fit this definition to perfection. The disappearances involve physicists, physicians, professors, hikers, hunters, children, and joggers. Cases from thirty states, six Canadian provinces and five countries are included. Each of these stories is new to the Missing 411 series. Disappearances from national parks, forests and open spaces that have never been discussed or compared to similar instances are included. Updated tables from past books assist the reader in understanding the vast numbers of missing that fit the established profile. Early reviewers of this book have called it the most intriguing and thought-provoking of the series. Author David Paulides is an investigative reporter, twenty-year police officer/detective and the director of the Canam Missing Project (www.canammissing.com), the organization behind the search for understanding the missing person issue. He recently released a movie based on the books, Missing 411, which a former LA Magazine and NBC movie critic rated it the best documentary for 2017. He has presented his findings to the most attended annual search and rescue conference in the world, NASAR and has spoken at hundreds of seminars, symposiums, and meetings. Mr. Paulides has a bachelors and masters degree from the University of San Francisco and currently resides in Denver. (www.canammissing.com) Missing-411 is the first comprehensive book about people who have disappeared in the wilds of North America. It's understood that people routinely get lost, some want to disappear but this story is about the unusual. Nobody has ever studied the archives for similarities, traits and geographical clusters of missing people, until now. A tip from a national park ranger led to this three year, 7000+ hour investigative effort into understanding the stories behind people who have vanished. The book chronicles children, adults and the elderly who disappeared, sometimes in the presence of friends and relatives. As Search and Rescue personnel exhaust leads and places to search, relatives start to believe kidnappings and abductions have occurred. The belief by the relatives is not an isolated occurrence; it replicates itself time after time, case after case across North America. The research depicts 28 clusters of missing people across the continent, something that has never been exposed and was a shocking find to researchers. Topography does play a part into the age of the victims and certain clusters have specific age and sex consistency that is baffling. This is not a phenomenon that has been occurring in just the last few decades, clusters of missing people have been identified as far back as the 1800's. The manuscript for the research was extremely large so the story was split between two books, Missing 411 Western United States and Canada and Missing 411 Eastern United States. The Eastern version

will be released in late March and will include a list of all missing people in each edition and a concluding chapter that draws both books together for conclusions. Some of the issues that are discussed in each edition:* The National Park Service attitude toward missing people* How specific factors in certain cases replicate themselves in different clusters* Exposing cases involving missing children that aren't on any national database* Unusual behavior by bloodhounds/canines involved in the search process* How storms, berries, swamps, briar patches, boulder fields and victim disabilities play a role in the disappearance* The strategies of Search and Rescue personnel need to change under specific circumstances Major news organizations do a deplorable job of covering stories and issues which are deemed too unusual or too far outside the box. Chances are, they will find a way to trivialize or ignore the disturbing evidence accumulated by David Paulides, a former lawman turned investigative journalist.
