In preparing a book of etiquette for ladies, I would lay down as the first rule, "Do unto others as you would others should do to you." You can never be rude if you bear the rule always in mind, for what lady likes to be treated rudely? True Christian politeness will always be the result of an unselfish regard for the feelings of others, and though you may err in the ceremonious points of etiquette, you will never be impolite. Politeness, founded upon such a rule, becomes the expression, in graceful manner, of social virtues. The spirit of politeness consists in a certain attention to forms and ceremonies, which are meant both to please others and ourselves, and to make others pleased with us; a still clearer definition may be given by saying that politeness is goodness of heart put into daily practice; there can be no true politeness without kindness, purity, singleness of heart, and sensibility.

John Ruskin was one of the great Victorians established while still young as an arbiter of taste in painting and architecture and as one of the greatest of all writers of English prose. When he was forty he

decided to abandon the field in which his reputation had been secured in order to awaken the world to the peril of devastation which, he believed, would follow its preoccupation with profit and its subservience to a false economic doctrine. He regarded his social criticism as a duty, reluctantly accepted, to a society which had abandoned the traditional and religious values that had been the foundation of its civilization. Ruskin's labour, to which he devoted the rest of his life, was to bring a searching intelligence, considerable learning and a moral concern to providing a ruthless criticism of the values of Victorian England.

J. D. Bernal's monumental work, *Science in History*, was the first full attempt to analyse the reciprocal relations of science and society throughout history, from the perfection of the flint hand-axe to the hydrogen bomb. In this remarkable study he illustrates the impetus given to (and the limitations placed upon) discovery and invention by pastoral, agricultural, feudal, capitalist, and socialist systems, and conversely the ways in which science has altered economic, social, and political beliefs and practices. In this first volume Bernal discusses the nature and method of science before describing its emergence in the Stone Age, its full formation by the Greeks and its continuing growth (probably influenced from China) under Christendom and Islam in the Middle Ages. Andrew Brown, Bernal's biographer, with a nice sense of paradox, has said of him, he 'was steeped in history, in part because he was always thinking about the future.' He goes on to say, ' *Science in History* is an encyclopaedic, yet individual and colourful account of the emergence of science from pre-historic times. There is detailed coverage of the scientific revolution of the Enlightenment, the Industrial Age and the first two-thirds of the twentieth century. . . The writing flows and is devoid of the tortured idioms that mar so many academic histories of science. After reading it, it is easy to agree with C. P. Snow's orotund observation that Bernal was the last man to know science. Faber Finds are reissuing the illustrated four volume edition first published by Penguin in 1969. The four volumes are: Volume 1: *The Emergence of Science*, Volume 2: *The Scientific and Industrial Revolutions*, Volume 3: *The Natural Sciences in Our Time*, Volume 4: *The Social Sciences: Conclusion*. 'This stupendous work . . . is a magnificent synoptic view of the rise of science and its impact on society which leaves the reader awe-struck by Professor Bernal's encyclopaedic knowledge and historical sweep.' *Times Literary Supplement*

Manual

Health care HVAC systems serve facilities in which the population is uniquely vulnerable and exposed to an elevated risk of health, fire, and safety hazard. These heavily regulated, high-stakes facilities undergo continuous maintenance, verification, inspection, and recertification, typically operate 24/7, and are owner occupied for long life. The HVAC systems in health care facilities must be

carefully designed to be installed, operated and maintained in coordination with specialized buildings services, including emergency and normal power, plumbing and medical gas systems, automatic transport, fire protections and a myriad of IT systems, all within a limited building envelope.

Craig Heron is one of Canada's leading labour historians. Drawing together fifteen of Heron's new and previously published essays on working-class life in Canada, Working Lives covers a wide range of issues, including politics, culture, gender, wage-earning, and union organization. A timely contribution to the evolving field of labour studies in Canada, this cohesive collection of essays analyzes the daily experiences of people working across Canada over more than two hundred years. Honest in its depictions of the historical complexities of daily life, Working Lives raises issues in the writing of Canadian working-class history, especially "working-class realism" and how it is eventually inscribed into Canada's public history. Thoughtfully reflecting on the ways in which workers interact with the past, Heron discusses the important role historians and museums play in remembering the adversity and milestones experienced by Canada's working class.

Books and Pamphlets, Including Serials and Contributions to Periodicals

The Complete Works of R. M. Ballantyne is a comprehensive collection of adventure novels perfect for readers interested in 19th-century British literature. Ballantyne's writing style is characterized by vivid descriptions, captivating plots, and moral lessons woven into exciting tales of exploration and survival. His works, including The Coral Island and The Young Fur Traders, embody the spirit of the Victorian era's obsession with adventure and morality. The collection provides insight into the values and concerns of the time, making it a valuable addition to any literary enthusiast's library. R. M. Ballantyne, a Scottish author and journalist, drew inspiration from his own experiences as a youth to craft thrilling narratives that resonate with readers of all ages. His background as a sailor and his interest in history and geography shine through in his meticulously researched novels. Ballantyne's passion for storytelling and his desire to instill important values in young readers are evident in every page of his works. I highly recommend The Complete Works of R. M. Ballantyne to anyone seeking well-written adventure stories with moral depth. Ballantyne's timeless tales offer both entertainment and thought-provoking themes that continue to resonate with modern audiences.
