Above the Clouds Rosetta Books

A remarkable Pocket Poets anthology of poems from around the world and across the centuries about illness and healing, both physical and spiritual. From ancient Greece and Rome up to the present moment, poets have responded with sensitivity and insight to the troubles of the human body and mind. *Poems of Healing* gathers a treasury of such poems, tracing the many possible journeys of physical

and spiritual illness, injury, and recovery, from John Donne's "Hymn to God My God, In My Sickness" and Emily Dickinson's "The Soul has Bandaged moments" to Eavan Boland's "Anorexic," from W.H. Auden's "Miss Gee" to Lucille Clifton's "Cancer," and from D.H. Lawrence's "The Ship of Death" to Rafael Campo's "Antidote" and Seamus Heaney's "Miracle." Here are poems from around the world, by Sappho, Milton, Baudelaire, Longfellow, Cavafy, and Omar Khayyam; by Stevens, Lowell, and Plath; by Zbigniew Herbert, Louise Bogan, Yehuda Amichai, Mark Strand, and Natalia Toledo. Messages of hope in the midst of pain—in such moving poems as Adam Zagajewski's "Try to Praise the Mutilated World," George Herbert's "The Flower," Wisława Szymborska's "The End and the Beginning," Gwendolyn Brooks' "when you have forgotten Sunday: the love story" and Stevie Smith's "Away, Melancholy"—make this the perfect gift to accompany anyone on a journey of healing. Everyman's Library pursues the highest production standards, printing on acid-free cream-colored paper, with full-cloth cases with two-color foil stamping, decorative endpapers, silk ribbon markers, European-style half-round spines, and a full-color illustrated jacket. **Poems of Healing** Vintage The role natural environments play in human health and wellbeing is attracting

increasing attention. There is growing medical evidence that access to the natural environment can prevent disease, aid recovery, tackle obesity and improve mental health. This book examines the history of natural environments being used for stress-reduction, enjoyment, aesthetics and catharsis, and traces the development of the connection between humans and the environment, and how they impact our personal and collective health.

"Microcosmos is nothing less than the saga of the life of the planet. Lynn Margulis and Dorion Sagan have put it all together, literally, in this extraordinary book, which is unlike any treatment of evolution for a general readership that I have encountered before. A fascinating account that we humans should be studying now for clues to our own survival."—From the Foreword by Dr. Lewis Thomas  
Microcosmos brings

together the remarkable discoveries of microbiology in the later decades of the 20th century and the pioneering research of Dr. Margulis to create a vivid new picture of the world that is crucial to our understanding of the future of the planet. Addressed to general readers, the book provides a beautifully written view of evolution as a process based on interdependency and their interconnectedness of all life on the planet.

Madman, tyrant, animal—history has given Adolf Hitler many names. In *Mein Kampf* (My Struggle), often called the Nazi bible, Hitler describes his life, frustrations, ideals, and dreams. Born to an impoverished couple in a small town in Austria, the young Adolf grew up with the fervent desire to become a painter. The death of his parents and outright rejection from art schools in Vienna forced him into underpaid work as a laborer. During the First World War, Hitler served in the infantry and was decorated for bravery. After the war, he became actively involved with socialist political groups and quickly rose to power, establishing himself as Chairman of the National Socialist German Worker's party. In 1924, Hitler led a coalition of nationalist groups in a bid to overthrow the Bavarian government in Munich. The infamous Munich "Beer-hall putsch" was

unsuccessful, and Hitler was arrested. During the nine months he was in prison, an embittered and frustrated Hitler dictated a personal manifesto to his loyal follower Rudolph Hess. He vented his sentiments against communism and the Jewish people in this document, which was to become *Mein Kampf*, the controversial book that is seen as the blue-print for Hitler's political and military campaign. In *Mein Kampf*, Hitler describes his strategy for rebuilding Germany and conquering Europe. It is a glimpse into the mind of a man who destabilized world peace and pursued the genocide now known as the Holocaust.

Life is beautiful, ruthless, and very, very strange. In the evolutionary arms race that has raged on since life began, organisms have developed an endless variety of survival strategies. From sharp claws to brute strength, camouflage to venom—all these tools and abilities share one purpose: to keep their bearer alive long enough to reproduce, helping the species avoid extinction. Every living thing on this planet has developed a time-tested arsenal of weapons and defenses. Some of these weapons and defenses, however, are decidedly more unusual

than others. In *Strange Survivors*, biologist R. Pagan takes us on a tour of the improbable, the ingenious, and the just plain bizarre ways that creatures fight for life. Inside this funny, fascinating field guide to nature's most colorful characters, you'll meet killer snails, social bacteria, and an animal with toxic elbows. But *Strange Survivors* is more than a collection of curiosities—it is a love letter to science and an argument for the continuing relevance of this evolutionary battle as we face the threat of resistant bacteria and the need for novel medical therapies. Whether discussing blood-thinning bats and electric fish or pondering the power of cooperation, Pagan reveals the surprising lessons found in some of life's natural oddities and how the tactics they employ to live might aid our own survival.

One day Sophie comes home from school to find two questions in her mail: "Who are you?" and "Where does the world come from?" Before she knows it she is enrolled in a correspondence course with a

mysterious philosopher. Thus begins Jostein Gaarder's unique novel, which is not only a mystery, but also a complete and entertaining history of philosophy. *A Night to Remember* Anchor  
Widely acclaimed as Naguib Mahfouz's best novel, *Midaq Alley* brings to life one of the hustling, teeming back alleys of Cairo in the 1940s. From Zaita the cripple-maker to Kirsha the hedonistic cafe owner, from Abbas the barber who mistakes greed for love to Hamida who sells her soul to escape the alley, from waiters and widows to politicians, pimps, and poets, the inhabitants of *Midaq Alley* vividly evoke Egypt's largest city as it teeters on the brink of change. Never has Nobel Prize-winner Mahfouz's talent for rich and luxurious storytelling been more evident than here, in his portrait of one small street as a microcosm of the world on the threshold of modernity.

### *A Great Idea at the Time* Vintage

This book takes a creative approach in examining one of the biggest crises of our time: that of mental suffering, distress and anxiety. By bringing together essays and dialogues from thinkers and artists across a range of disciplines, it re-imagines approaches to crisis, support, and care. Amid growing recognition that mental health is not only the province of psychiatry and the health sector, but a

concern for the whole community, the book opens up critical new ways of thinking about our internal lives and the forces that affect them. The book significantly advances the way we think about cultural responses to mental health and the understanding of the struggles of inner life. Featuring both theoretical and practical examples of the value of using imagination in response to trauma, anxiety, and depression, *The Big Anxiety* shows how creativity is not a luxury, but a means of survival.

*Sophie's World* Farrar, Straus and Giroux  
“A true classic of world literature . . . A masterpiece that has inspired generations of writers in Nigeria, across Africa, and around the world.” —Barack Obama “African literature is incomplete and unthinkable without the works of Chinua Achebe.” —Toni Morrison  
Nominated as one of America’s best-loved novels by PBS’s *The Great American Read*  
*Things Fall Apart* is the first of three novels in Chinua Achebe's critically acclaimed African Trilogy. It is a classic narrative about Africa's cataclysmic encounter with Europe as it establishes a colonial presence on the continent. Told through the fictional experiences of Okonkwo, a wealthy and fearless Igbo warrior of Umuofia in the late 1800s, *Things Fall Apart* explores one man's

futile resistance to the devaluing of his Igbo traditions by British political and religious forces and his despair as his community capitulates to the powerful new order. With more than 20 million copies sold and translated into fifty-seven languages, *Things Fall Apart* provides one of the most illuminating and permanent monuments to African experience. Achebe does not only capture life in a pre-colonial African village, he conveys the tragedy of the loss of that world while broadening our understanding of our contemporary realities.

A brilliant work from the most influential philosopher since Sartre. In this indispensable work, a brilliant thinker suggests that such vaunted reforms as the abolition of torture and the emergence of the modern penitentiary have merely shifted the focus of punishment from the prisoner's body to his soul.

**Plugged in** Everyman's Library

The classic postapocalyptic thriller with “all the reality of a vividly realized nightmare” (*The Times*, London). *Triffids* are odd, interesting little plants that grow in everyone’s garden. *Triffids* are no more than mere

curiosities—until an event occurs that alters human life forever. What seems to be a spectacular meteor shower turns into a bizarre, green inferno that blinds everyone and renders humankind helpless. What follows is even stranger: spores from the inferno cause the *triffids* to suddenly take on a life of their own. They become large, crawling vegetation, with the ability to uproot and roam about the country, attacking humans and inflicting pain and agony. William Masen somehow managed to escape being blinded in the inferno, and now after leaving the hospital, he is one of the few survivors who can see. And he may be the only one who can save his species from chaos and eventual extinction . . . With more than a million copies sold, *The Day of the Triffids* is a landmark of speculative fiction, and “an outstanding and entertaining novel” (*Library Journal*). “A thoroughly English apocalypse, it rivals H. G. Wells in conveying how the everyday invaded by the alien would feel. No wonder Stephen King admires Wyndham so much.” —Ramsey Campbell, author of *The Overnight* “One of my all-time favorite novels. It’s absolutely convincing, full of little telling details, and that sweet, warm sensation of horror and mystery.” —Joe R. Lansdale, author of *Edge of Dark Water*

Today the classics of the western canon, written by the proverbial “dead white men,” are cannon fodder in the culture wars. But in

the 1950s and 1960s, they were a pop culture phenomenon. The Great Books of Western Civilization, fifty-four volumes chosen by intellectuals at the University of Chicago, began as an educational movement, and evolved into a successful marketing idea. Why did a million American households buy books by Hippocrates and Nicomachus from door-to-door salesmen? And how and why did the great books fall out of fashion? In *A Great Idea at the Time* Alex Beam explores the Great Books mania, in an entertaining and strangely poignant portrait of American popular culture on the threshold of the television age.

Populated with memorable characters, *A Great Idea at the Time* will leave readers asking themselves: Have I read Lucretius's *De Rerum Natura* lately? If not, why not?

"What if what you did mattered more because life happened again and again, consequences unfolding across decades

and continents?...A relentlessly paced page-turner and a profound meditation on the meaning of life." —Christina Baker Kline, #1 New York Times bestselling author of *The Orphan Train* What happens to us after we die? What happens before we are born? At once a riveting mystery and a testament to the profound connection between a child and parent, *The Forgetting Time* will lead you to reevaluate everything you believe... What would you do if your four-year-old son claimed he had lived another life and that he wants to go back to it? That he wants his other mother? Single mom Janie is trying to figure out what is going on with her beloved son Noah. Noah has never been ordinary. He loves to make up stories, and he is constantly surprising her with random trivia someone his age has no right knowing. She always chalked it up to the fact that Noah was precocious—mature beyond his years. But Noah's eccentricities are starting to become worrisome. One afternoon, Noah's preschool teacher calls Janie: Noah has been talking about shooting guns and being held under water until he can't breathe. Suddenly, Janie can't pretend anymore. The school orders him to get a psychiatric evaluation. And life as she

knows it stops for herself and her darling boy. For Jerome Anderson, life as he knows it has already stopped. Diagnosed with aphasia, his first thought as he approaches the end of his life is, I'm not finished yet. Once an academic star, a graduate of Yale and Harvard, a professor of psychology, he threw everything away to pursue an obsession: the stories of children who remembered past lives. Anderson became the laughing stock of his peers, but he never stopped believing that there was something beyond what anyone could see or comprehend. He spent his life searching for a case that would finally prove it. And with Noah, he thinks he may have found it. Soon, Noah, Janie, and Anderson will find themselves knocking on the door of a mother whose son has been missing for eight years. When that door opens, all of their questions will be answered. Gorgeously written and fearlessly provocative, Sharon Guskin's debut explores the lengths we will go for our children. It examines what we regret in the end of our lives and hope for in the beginning, and everything in between.
