DCX2496 User Manual 1.

Introduction To operate a loudspeaker system that consists of several speakers for the various frequency bands requires different input signals for the individual loudspeakers. This requires a frequency crossover network that

divides the input signal into several frequency bands.

The DCX2496 is the perfect way to manage a multi-speaker sound system in any sized venue – from cinema to sanctuary to concert hall. Featuring 2 inputs, 6 outputs and 24-bit/96 kHz high-end AD/DA converters, this state-of-the-art processor will take your system to the next level and beyond. Superb Connectivity and Impeccable Sound Quality
