A Guide to Critical Reading and Argumentation McGraw-Hill Companies
Understanding and Evaluating Research: A Critical Guide aims to sensitize students to the necessity of learning how not to defer to the mysterious authority of the experts, but rather to learn how to be a critical consumer of others' research, and to gain confidence in their ability to be producers of research. Sue McGregor shows students how to be research literate,

and how to find, critique and apply other people's scholarship. This textbook is grounded in a solid understanding of the prevailing research methodologies for creating new knowledge (philosophical underpinnings), which in turn dictate problem posing, theory selection, and research methods (tasks for sampling, collecting and analyzing data, and reporting results). The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this

“vital, necessary, and beautiful book” (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and “allows us to understand racism as a practice not restricted to ‘bad people’ (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively. Fast Food Nation Beacon Press

<p>Featuring a new introduction, this updated edition of the New York Times bestselling classic by Pulitzer Prize and National Book Award – winning author and one of the most revered figures in American letters is “profound and priceless as guidance for anyone who aspires to write” (Los Angeles Times). Born in 1909 in Jackson, Mississippi, Eudora Welty shares details of her upbringing that show us how her family and her surroundings contributed to the shaping not only of her personality but of her writing as well. Everyday sights, sounds, and objects resonate with the emotions of recollection: the striking clocks, the Victrola, her orphaned father’s coverless little book saved since boyhood, the tall mountains of the West Virginia back country that became a metaphor for her mother’s sturdy independence, Eudora’s earliest box camera that suspended a moment forever and taught her that every feeling awaits a gesture. In her vivid descriptions of growing up in the South—of the interplay between black and white, between town and countryside, between dedicated schoolteachers and the children they taught—she recreates the vanished world of her youth with the same subtlety and insight that mark her fiction, capturing “the mysterious</p>	<p>transfiguring gift by which dream, memory, and experience become art” (Los Angeles Times Book Review). Part memoir, part exploration of the seeds of creativity, this unique distillation of a writer’s beginnings offers a rare glimpse into the Mississippi childhood that made Eudora Welty the acclaimed and important writer she would become. The knowledge of business policy and techniques of strategic management is the need of the hour to prospective business managers. The present competitive environment has brought several drastic changes in policy making and strategic management. Hence, there is necessity of theoretical understanding about the business policy as well as strategic management. Businesses need to implement sound strategies to succeed. Those strategies form part of an overall management and

business policy that guides the business in connecting with customers, generating profits and managing resources. The related concepts of strategic management and business policy are keys to help small business owners manage their responsibilities and set clear objectives. Strategic management represents a theoretical concept first introduced by Peter Drucker in the mid-20th century. The idea behind strategic management is that organizations will be better equipped to meet their goals and objectives if the owners and managers adopt a clear business philosophy. For many businesses, that philosophy will be to increase their share of the market. For others, it might be about making a difference in the community or about developing new products. Sometimes, a combination of motives drives the management's strategy. In any case, strategic management helps the business to keep its sights set on what matters most and to not get distracted by ancillary concerns. Strategic management is the art and science of

formulating, implementing and evaluating cross-functional decisions that will enable an organization to achieve its objectives. It is the process of specifying the organization's objectives, developing policies and plans to achieve these objectives, and allocating resources to implement the policies and plans to achieve the organization's objectives. Strategic management, therefore, combines the activities of the various functional areas of a business to achieve organizational objectives. This book is designed to support and enhance both learning and teaching. An important aspect of the style adopted for this book is the use of exhibits, presenting a vast gamut of information regarding special theoretical matter. The Imaginative Argument Lulu.com

The Genre of Argument is a rhetoric that defines the distinguishing characteristics of the

argument paper, which students can understand easily once they are aware of its context and purpose. By looking at argument as a genre, students gain insight into how purpose influences many features of successful argumentative writing. Students are led to find the problem within a topic and develop a position or thesis in response to that situation. The overt consideration of genre will help students to apply generic conventions in a multiplicity of contexts.
