Numa entrevista recente, um pequeno grupo de jornalistas faz perguntas e ouve as respostas, até que, a certa altura, um dos entrevistadores (que até então não havia se

manifestado) pede a palavra e começa a elogiar a empresa que organizou o encontro e seus produtos. Fala durante uns 5 minutos, empolgado como um político em comício, abusando dos adjetivos para agradar a empresa. Pois é, a cena aconteceu, de verdade. E está se tornando cada vez mais comum. Passando-se por jornalistas, surgem nesses encontros os tais “influenciadores”; ou candidatos a essa categoria, que pelo que se ouve paga muito bem. Alguns, claro, são contratados pelas próprias empresas que promovem as entrevistas. E ali estão para... isso mesmo: tentar influenciar a opinião dos Jornalistas de verdade.

Mesmo com todas as incertezas políticas e econômicas, o Brasil continua tendo a sorte de atrair altos investimentos estrangeiros.

Segundo o Banco Central, nos três primeiros meses do ano o país recebeu 11% mais investimentos do que no primeiro trimestre de 2023. Um dos motivos (mas não o único) é a taxa de câmbio: os ativos brasileiros estão relativamente baratos, quando comparados a outros países com características similares. No segmento de eletrônicos de consumo, encontramos exemplos dessa tendência nas empresas coreanas e principalmente chinesas, caso da Hisense, segunda maior fabricante mundial de TVs. Assim como fez a TCL em 2016, e fizeram LG e Samsung nos anos 90, a Hisense chega com ambições de disputar os primeiros lugares entre as marcas mais vendidas – nos EUA, já atingiu a 2ª colocação.

Não sei se o assunto está no dia a dia das preocupações dos leitores. Mas, se não está, deveria estar! A reportagem da pág. 38 busca jogar um pouco de luz na compreensão da crise energética, naquilo que podemos – cada um de nós – fazer para amenizar seus impactos e em como a tecnologia pode ser uma ótima aliada nesse esforço. Os dados são alarmantes, qualquer que seja o ângulo de análise, e quem quiser ignorá-los deve saber que estará ajudando a construir um mundo pior, talvez inabitável, para seus filhos e netos. Em março, os 60 graus de sensação térmica no Rio de Janeiro serviram, ou

deveriam servir, como uma espécie de “alerta vermelho” para conscientizar a população.

Sound Reproduction: The Acoustics and Psychoacoustics of Loudspeakers and Rooms, Third Edition explains the physical and perceptual processes that are involved in sound reproduction and demonstrates how to use the processes to create high-quality listening experiences in stereo and multichannel formats. Understanding the principles of sound production is necessary to achieve the goals of sound reproduction in spaces ranging from recording control rooms and home listening rooms to large cinemas. This revision brings new science-based perspectives on the performance of

You've probably seen home theaters in the pages of home improvement and technology magazines like Electronic House. You may have even encountered one at the home of a friend or colleague. Perhaps you've stopped at a home electronics store and have seen a home theater there. Have you ever wondered what it takes to create these elegant, high-performing A/V masterpieces? Our Complete Guide to Home Theater Planning will walk you through the process, step by step. As you'll learn, creating a home theater requires carefully planning to get right, some imagination and plenty of time and patience. It's hard work, but the results can be phenomenal—something that pleases every member of your

family and adds real value to your house. And here's some really good news: Any room in your house can function admirably as a home theater, as long as you design the space correctly and select and install the A/V equipment carefully. This book discusses the pros and cons of the morphing existing rooms into home theaters, as well as building a space from the ground up. The appropriate types of equipment for each type of space are suggested, and classic mistakes to avoid are divulged. And if being on the cutting edge is important to you, there's a complete chapter dedicated to a discussion about the new audio and video trends that are worth consideration. You can take your theater project a step further by adding features like dimmable lighting, specialty seating, fiber optic "star" ceilings and more. Although these amenities will add to your bottom line, they're an effect way to put your own personal stamp on your theater, making it a space that's uniquely yours. We'll introduce you to some of these unique home

theaters—both ones that have been designed and installed entirely by the homeowners themselves and ones that have been created by seasoned home systems professionals. You'll gain loads of advice and gather great inspiration for tackling your own home theater project. Good luck and happy home theater building!
