"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes

would not be uninteresting to the public." -an excerpt

An Evening In Paris And Other Stories Om Books International
Bioprocess Technology combines concepts and ideas from biology, engineering, materials science, and clinical processes. The industrial use of biological processes utilising living cells or their components to achieve desired substrate transformations is known as bioprocess technology. Bioprocesses provide several benefits over standard chemical

processes, including the need for moderate reaction conditions, increased specificity and efficiency, and the production of renewable by-products (biomass). Bioprocesses' potential has been broadened and extended thanks to the introduction of recombinant DNA technology. Bioprocesses are now widely employed in a variety of commercial biotechnology disciplines, including the synthesis of enzymes (used in food processing and waste management, for example) and antibiotics. Bioprocesses may find applications in other sectors where chemical processes are now applied as methodologies and equipment improve. Many of biotechnology's potential applications are created through laboratory processes that yield very modest quantities of valuable chemicals. As bioprocess technology advances, particularly separation and purification techniques, commercial firms will be able to produce these substances in large quantities at a low cost, allowing

them to be used in medical research, food processing, agriculture, pharmaceutical development, waste management, and a variety of other fields of science and industry.

Seeing Like a Feminist Notion Press

The first collection of short stories are deeply personal in nature, all located in Mumbai—its folds and seams—which the writer has explored all his life. Familial bond or the lack of them, an intimate *dekko* at a media group's machinations, a close study of the Irani community which is fast vanishing in the metropolis, the underworld and the staggeringly bold new world of sexual relationships sparked by websites are just some of the narratives, with a twist in the tale. KHALID MOHAMED started as reviewer and co-editor, during his teenage years for close-up, a film society magazine. He reviewed television for The Economic Times besides contributing articles to The Illustrated Weekly of India and Femina. His writing has also featured in India Today, The Indian Express, The Telegraph, the international film

weekly Variety and in Sunday Observer, London. He was film critic for Mid-day, Senior Editor of DNA newspaper, and National Culture Editor and film critic for Hindustan Times. Currently, he is Consulting Editor to the Deccan Chronicle media group. He wrote the original stories and screenplays and also directed the films Fiza, Tehzeeb and Silsilay . He debuted recently as a playwright and director of the stageplay Kennedy Bridge. His documentary The Last Irani Chai has been screened widely. His second documentary Smiles and Tears on Mumbai's street children is under post-production. Presently, he is writing his second stageplay and his first novel.

Air Regulations Garuda Prakashan

A highly original, stirring book on Mahatma Gandhi that deepens our sense of his achievements and disappointments—his success in seizing India's imagination and shaping its independence struggle as a mass movement, his recognition late in life that few of his followers paid more than lip service to his ambitious goals of social justice for the country's minorities, outcasts, and rural

poor. Pulitzer Prize-winner Joseph Lelyveld shows in vivid, unmatched detail how Gandhi's sense of mission, social values, and philosophy of nonviolent resistance were shaped on another subcontinent—during two decades in South Africa—and then tested by an India that quickly learned to revere him as a Mahatma, or “Great Soul,” while following him only a small part of the way to the social transformation he envisioned. The man himself emerges as one of history's most remarkable self-creations, a prosperous lawyer who became an ascetic in a loin cloth wholly dedicated to political and social action. Lelyveld leads us step-by-step through the heroic—and tragic—last months of this selfless leader's long campaign when his nonviolent efforts culminated in the partition of India, the creation of Pakistan, and a bloodbath of ethnic cleansing that ended only with his own assassination. India and its politicians were ready to place Gandhi on a pedestal as “Father of the Nation” but were less inclined to embrace his teachings. Muslim support, crucial in his rise to leadership, soon waned, and the oppressed untouchables—for whom Gandhi spoke to Hindus as a whole—produced their own leaders. Here is a vital, brilliant reconsideration of Gandhi's extraordinary struggles on two

continents, of his fierce but, finally, unfulfilled hopes, and of his ever-evolving legacy, which more than six decades after his death still ensures his place as India's social conscience—and not just India's.

3 & The Emerald Stone of Irene Prabhat Prakashan

"I feel a woman is most attractive when she surrenders to her man. She is incomplete without a man," averred Kamala Das shortly before her death in May, 2009. One of the most controversial and celebrated Indian authors, she combined in her writings rare honesty and sensitivity, provocation and poignancy. *The Kept Woman and Other Stories* explores the man-woman relationship in all its dimensions. Deprived, depraved, mysterious, mystical and exalted, each character, culled from experience and observation, is an incisive study of love, lust and longing.
