We are now entering the third decade of the 21st Century, and, especially in the last years, the achievements made by scientists in the field of Microbiology have been exceptional, leading to major advancements. Frontiers has organized a series of Research Topics to highlight the latest advancements in science in order to be at the forefront of science in different fields of research. This specific editorial initiative, led by Dr. Axel Cloeckart is focused on new insights, novel developments, current challenges, latest discoveries, recent advances and future perspectives in the field. The Research Topic solicits brief, forward-looking contributions from the editorial board members that describe the state of the art, outlining recent developments

and major achieved accomplishments, future challenges and how to address those challenges to move the field forward. Reviews, Mini-Reviews, Perspectives, and Opinions summarizing the current state and future directions of the field are particularly welcome in this collection.

Subject-matter Index of Patents Applied for and Patents Granted

Based on a pioneering research programme on the evolution of top incomes, this volume brings together studies from 10 OECD countries. This rapidly growing field of economic research investigates the top segment of the income

distribution by using data from income tax records over the past century. As well as describing the source data and methods employed, the authors also discuss the dramatic changes that have occurred at the top of the income scale throughout the 20th century. This fascinating study is the first of its kind to provide a comprehensive historic overview of top income distribution over the last century. It looks at why top incomes shares fell markedly in the first half of the 20th century and why, more recently, there has been a striking difference in the top income distribution between continental Europe and English-speaking OECD countries, like the UK, USA, and Australia. Written by the top names in the field, this seminal work provides rich pickings for those with an interest in inequality,

development, the economic impact of war, taxation, economic history, and executive compensation.
