Createspace Independent Publishing Platform This book is about HCI research in an industrial research setting. It is based on the experiences of two researchers at the IBM T. J. Watson Research Center. Over the last two decades, Drs. John and Clare-Marie Karat have conducted HCI research to create innovative usable technology for users across a variety of domains. We begin the book by introducing the reader to the context of industrial research as well as a set of common themes or guidelines to consider in conducting HCI research in practice. Then case study examples of HCI approaches to the design and evaluation of usable solutions for people are presented and discussed in three domain areas: - item Conversational speech technologies, - item Personalization in eCommerce, and - item Security and privacy policy management technologies In each of the case studies, the authors illustrate and discuss examples of HCI approaches to design and evaluation that worked well and those that did not. They discuss what was learned over time about different HCI methods in practice, and changes that were made to the HCI tools used over time. The Karats discuss trade-offs and issues related to time, resources, and money and the value derived from different HCI methods in practice. These decisions are ones that need to be made regularly in the industrial sector. Similarities and differences with the types of decisions made in this regard in academia will be discussed. The authors then use the context of the three case studies in the three research domains to draw insights and conclusions about the themes that were introduced in the beginning of the book. The Karats conclude with their perspective about the future of HCI industrial research. Table of Contents: Introduction: Themes and Structure of the Book / Case Study 1: Conversational Speech Technologies: Automatic Speech Recognition (ASR) / Case Study 2: Personalization in eCommerce / Case Study 3: Security and Privacy Policy Management Technologies / Insights and Conclusions / The Future of Industrial HCI Research

Imposing Harmony is a groundbreaking analysis of the role of music and musicians in the social and political life of colonial Cuzco. Challenging musicology's cathedral-centered approach to the history of music in colonial Latin America, Geoffrey Baker demonstrates that rather than being dominated by the cathedral, Cuzco's musical culture was remarkably decentralized. He shows that institutions such as parish churches and monasteries employed indigenous professional musicians, rivaling Cuzco Cathedral in the scale and frequency of the musical performances they staged. Building on recent scholarship by social historians and urban musicologists and drawing on extensive archival research, Baker highlights European music as a significant vehicle for reproducing and contesting power relations in Cuzco. He examines how Andean communities embraced European music, creating an extraordinary cultural florescence, at the same time that Spanish missionaries used the music as a mechanism of colonialization and control. Uncovering a musical life of considerable and unexpected richness throughout the diocese of Cuzco, Baker describes a musical culture sustained by both Hispanic institutional patrons and the upper strata of indigenous society. Mastery of European music enabled elite Andeans to consolidate their position within the colonial social hierarchy. Indigenous professional musicians distinguished themselves by fulfilling important functions in colonial society, acting as educators, religious leaders, and mediators between the Catholic Church and indigenous communities.
