### More Snoopy Collectibles HARCOURT

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century

apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual

abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the

---

rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

Me Reston, Man. : R.M. of Pipestone History Project

The concept of Functional Patterns is a train of thought that has been building upon

itself over the course of my entire lifetime. I was taught at a very young age to question authority and everything around me by my highly skeptical parents. My parents were extremely hard workers who were very resourceful with the little money they had. They lived by the "practice what you preach" motto in every sense they could. The apple didn't fall very far from the tree and I have embodied (to the best of my ability) what I was fortunate enough to be taught at a very young age. The Functional Patterns method didn't start with the memorization of

---

techniques. It started at a base of reasoning that has seemingly been missing from the industry of health today. When ego checking experiences of life mixed with the values I had already wired in from my childhood, a different approach towards looking at the human organism emerged.
