The information infrastructure - comprising computers, embedded devices, networks and software systems - is vital to day-to-day operations in every sector: information and telecommunications, banking and finance, energy, chemicals and hazardous materials, agriculture, food, water, public health, emergency services, transportation, postal and shipping, government and defense. Global business and industry, governments, indeed society itself, cannot function effectively if major components of the critical information infrastructure are degraded, disabled or destroyed. Critical Infrastructure Protection describes original research results and innovative applications in the interdisciplinary field of critical infrastructure protection. Also, it highlights the importance of weaving science, technology and policy in crafting sophisticated, yet practical, solutions that will help secure information, computer and network assets in the various critical infrastructure sectors. Areas of coverage include: themes and issues; control systems security; infrastructure modeling and simulation; risk and impact assessment. This book is the tenth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.10 on Critical Infrastructure Protection, an international community of scientists, engineers, practitioners and policy makers dedicated to advancing research, development and implementation efforts focused on infrastructure protection. The book contains a selection of fourteen edited papers from the Tenth Annual IFIP WG 11.10 International Conference on Critical Infrastructure Protection, held at SRI International, Arlington, Virginia, USA in the spring of 2016. Critical Infrastructure Protection is an important resource for researchers, faculty members and graduate students, as well as for policy makers, practitioners and other individuals with interests in homeland security.

[Dalle domus alla corte regia. S. Giulia di Brescia. Gli scavi dal 1980 al 1992](#) Springer Software-defined networking (SDN) technologies powered by the OpenFlow protocol provide viable options to address the bandwidth needs of next-generation computer networks. And, since many large corporations already produce network devices that support the OpenFlow standard, there are opportunities for those who can manage complex and large-scale networks using these technologies. Network Innovation through OpenFlow and SDN: Principles and Design explains how you can use SDN and OpenFlow to build networks that are easy to design, less expensive to build and operate, and more agile and customizable. Among the first books to systematically address the design aspects in SDN/OpenFlow, it presents the insights of expert contributors from around the world. The book's four sections break down basic concepts, engineering design, QoS (quality-of-service), and advanced topics. Introduces the basic principles of SDN/OpenFlow and its applications in network systems Illustrates the entire design process of a practical OpenFlow/SDN Addresses the design issues that can arise when applying OpenFlow to cloud computing platforms Compares various solutions in QoS support Provides an overview of efficient solutions to the integration of SDN with optical networks Identifies the types of network attacks that could occur with OpenFlow and outlines possible solutions for overcoming them Supplying a cutting-edge look at SDN and OpenFlow, this book gives you the wide-ranging understanding required to build, deploy, and manage OpenFlow/SDN products and networks. The book's comprehensive coverage includes system architectures, language and programming issues, switches, controllers, multimedia support, security, and network operating systems. After reading this book you will understand what it takes to make a smooth transition from conventional networks to SDN/OpenFlow networks.

Bien mener un projet de déploiement ou de migration vers Windows 7 ou Windows 8 De nombreuses entreprises devront mener des projets de déploiement et de migration des postes de travail vers Windows 7 ou Windows 8. Il leur faudra prendre en compte les évolutions tant technologiques (nouvel écran de démarrage, tuiles...) que fonctionnelles pour s'assurer de l'adhésion des utilisateurs. Cet ouvrage aide à cartographier les usages et métiers, propose des modèles d'optimisation du poste de travail et décrit comment mener à bien, étape par étape, un tel projet de migration. La compatibilité applicative (applications riches, Microsoft Office et Internet Explorer) est traitée - ce chantier représente plus d'un tiers du budget d'un projet de migration Windows 7/8. Des solutions Microsoft (ACT, MAP, les outils de télémétrie Office...) et tierces (Citrix AppDNA, Browsium Ion et AirShip Browser) sont présentées. Tous les fondamentaux techniques du déploiement de systèmes d'exploitation Windows (images WIM, Windows ADK, étapes d'installation, migration des profils utilisateur avec USMT, SYSPREP.J sont rappelés, ainsi que les spécificités liées à Windows 8. L'industrialisation du déploiement grâce à Windows Deployment Services (WDS) est abordée. Microsoft Deployment Toolkit (MOT) 2012 Update 1 est détaillé ensuite, ainsi que la solution System Center 2012 Configuration Manager (ConfigMgr), mise en oeuvre en appliquant la méthodologie MSF. Une étude de la télédistribution d'applications, des produits d'optimisation du poste de travail du pack MDOP (App-V, UE-V, MED-V...J ainsi que de Windows To Go permet de comprendre les possibilités offertes aux environnements utilisateur. Enfin, l'administration dans le Cloud est analysée à travers Windows Intune. À qui s'adresse cet ouvrage ? Aux directeurs des systèmes d'informations (DSI) et aux responsables IT (Datacenter, postes de travail...) souhaitant adopter de nouveaux usages du poste de travail, tout en optimisant la gestion des infrastructures ; Aux administrateurs et ingénieurs systèmes et réseaux, consultants, architectes et chefs de projets techniques ; Aux étudiants en informatique souhaitant se spécialiser

sur les architectures Microsoft.

Cognitive Infocommunications, Theory and Applications All'Insegna del Giglio

The book gathers the chapters of Cognitive InfoCommunication research relevant to a variety of application areas, including data visualization, emotion expression, brain-computer interfaces or speech technologies. It provides an overview of the kind of cognitive capabilities that are being analyzed and developed. Based on this common ground, it may become possible to see new opportunities for synergy among disciplines that were heretofore viewed as being separate. Cognitive InfoCommunication begins by modeling human cognitive states and aptitudes in order to better understand what the user of a system is capable of comprehending and doing. The patterns of exploration and the specific tools that are described can certainly be of interest and of great relevance for all researchers who focus on modeling human states and aptitudes. This innovative research area provides answers to the latest challenges in influence of cognitive states and aptitudes in order to facilitate learning or generally improve performance in certain cognitive tasks such as decision making. Some capabilities are purely human, while others are purely artificial, but in general this distinction is rarely clear-cut. Therefore, when discussing new human cognitive capabilities, the technological background which makes them possible cannot be neglected, and indeed often plays a central role. This book highlights the synergy between various fields that are perfectly fit under the umbrella of CogInfoCom and contribute to understanding and developing new, human-artificial intelligence hybrid capabilities. These, merged capabilities are currently appearing, and the importance of the role they play in everyday life are unique to the cognitive entity generation that is currently growing up.

A distanza di sei anni dall'edizione del volume S. Giulia di Brescia: gli scavi dal 1980 al 1992. Reperti preromani, romani e alto medievali esce ora la pubblicazione dedicata alle domus romane messe in luce nelle ricerche effettuate in quegli anni. Ricerche, ricordiamo, motivate dai lavori di restauro del complesso monastico destinato ad ospitare il Museo della Città e che hanno pertanto risentito delle esigenze di progettazione e di cantiere, ma che hanno consentito di ricostruire uno spaccato significativo della storia più antica di Brescia. Queste pubblicazioni e il preannunciato terzo volume dedicato all'età basso medievale e rinascimentale danno conto della messe di nuovi dati acquisiti nelle indagini archeologiche e del loro straordinario interesse scientifico. Lo studio del complesso di abitazioni romane affrontato in questo secondo volume appare di grande importanza per la vastità dell'area indagata, quasi quattromila metri quadrati: una situazione privilegiata, che non trova sinora riscontro nella stessa Brescia, ma anche nella maggior parte delle città romane dell'Italia settentrionale. Oltre all'ampiezza della zona indagata, un altro elemento di particolare interesse è l'ubicazione dell'isolato coinvolto negli scavi, in una parte centrale della città, a nord del decumano massimo di via Musei, accanto all'area monumentale pubblica, un settore quindi destinato nel tessuto urbano a un'edilizia residenziale di una certa rilevanza. Ma l'aspetto di maggiore interesse è la possibilità di uno studio degli edifici nel loro completo contesto, come difficilmente capitava in passato, quando ci si occupava solo degli elementi considerati più rilevanti artisticamente, quali ad esempio i pavimenti musivi, sovente strappati dalla loro sede e studiati isolatamente, estrapolandoli dall'insieme, oppure gli apparati decorativi parietali che nei casi migliori erano presi in esame solo nelle parti che rivestivano un maggiore pregio per le raffigurazioni presenti. Qui vi è stata la possibilità di un'indagine globale che ha cercato di ricostruire gli edifici nei loro diversi vani, articolati intorno a spazi aperti o porticati, tenendo conto delle modifiche e dei rimaneggiamenti via via apportati nel corso del tempo ad alcune parti delle abitazioni, che sino al V secolo appaiono funzionanti e curate con una manutenzione continua. Ma anche l'analisi delle fasi successive, di destrutturazione di questi edifici, di crollo e demolizione e di

ricostruzione nelle stesse aree, ma con diversa organizzazione spaziale, di nuovi edifici in tecniche povere, case o capanne a uno o due vani, restituisce elementi fondamentali per la lettura e la ricostruzione della città in età altomedievale. L'elaborazione dei dati di scavo e lo studio della documentazione emersa dalle indagini hanno richiesto tempi lunghi. Si può citare ad esempio lo studio della decorazione parietale, che ha avuto necessità di un paziente intervento preliminare di ricomposizione dei numerosissimi frammenti di intonaco dipinto trovato in giacitura secondaria, talora in fase di crollo della parete o molto più spesso utilizzato in riempimenti. I risultati di questo attento e minuzioso lavoro appaiono di grande rilievo e costituiscono di certo una base fondamentale per i futuri studi sulla pittura romana di Brescia. Dopo la realizzazione del Museo della Città in Santa Giulia e l'apertura al pubblico dell'area delle domus dell'Ortaglia nel 2003, la pubblicazione dei risultati delle indagini archeologiche aggiunge nuovi elementi di conoscenza dell'area del complesso museale. Questi potrebbero essere la base per ripensare in futuro, nuovamente, a un progetto di musealizzazione degli scavi, ricoperti dopo la loro esecuzione per motivi conservativi e per permettere il completamento dei lavori. La potenzialità archeologica dell'area di Santa Giulia e di quella forense, vero cuore della città antica, è enorme e l'interesse e l'impegno dell'Amministrazione municipale per la valorizzazione di questa zona sono ben testimoniati dai recenti interventi museali e dai lavori in corso nell'area del Capitolium e del Teatro. Anche la pubblicazione degli interventi di scavo e l'analisi delle testimonianze emerse si inseriscono in quest'ottica di promozione del patrimonio culturale e sono la base per programmare i futuri interventi in questa che può essere considerata, a livello nazionale, una delle più prestigiose aree archeologiche urbane.
