Production networks in many sectors have become increasingly fragmented. Cutting labour costs by lowering pay, increasing work intensity and/or shifting flexibility costs to workers are just some of the motivations for outsourcing. But it can also be used to circumvent employee representation and collective bargaining systems within companies, and labour market regulations in general. Though such intentions may not drive the bulk of outsourcing decisions, any change in company boundaries is likely to impact employment, working conditions and industrial relations in the value chain. This book focuses on the dynamics of outsourcing in Europe from the perspective of employees. In particular, it considers one insufficiently studied aspect: the impact of outsourcing on working conditions and employment relations in companies. The book also collects lessons learned from the efforts of employees and trade unions to shape outsourcing decisions, processes and their impact on employment and working conditions.

CAFO provides an unprecedented view of Concentrated Animal Feeding Operations where an increasing percentage of the world's meat, milk, eggs, and fish are produced. As the photos and essays in this powerful book demonstrate, the rise of the CAFO industry has become one of the most pressing issues of our time. Industrial livestock production is now a leading source of climate changing emissions, a source of water pollution, and a significant contributor to diet-related diseases, and the spread of food-borne illnesses. The intensive concentrations of animals in such cramped and filthy conditions dependent on antibiotic medicines and steady streams of subsidized industrial feeds poses serious moral and ethical considerations for all of us. CAFO takes readers on a behind-the-scenes journey into the alarming world of animal factory farming and offers a compelling vision for a food system that is humane, sound for farmers and
