buildings, schools, and homes sprawled out across suburbia, filled with families making a life for themselves at the dawn of the new millennium. But two seniors at Mt. MacMurray High are about to find out that nothing is as it seems. Jason Nix is a star athlete and honors student who can't seem to remember anything about his childhood. Elyse Van Auten is a budding artist from a broken home whose father left her mother two years ago - or so she's been led to believe. Like most teens entering adulthood, Elyse and Jason just want to find out who they really are. For them, however, the stakes go far beyond their own personal quest. Join them on a journey of self-discovery that becomes a desperate fight for survival against enemies determined to conceal the truth ... and find out what happens when that fight becomes personal.

Elements in Natural Waters comprehensively covers the microchemical processes occurring in the water phase. The book describes geological and biological interactions involving supply or removal of trace elements in the water phase. Analytical aspects are included, since sampling, pre-analysis handling, and methods of analysis strongly influence the quality of data. Different natural water systems are reviewed with respect to sources, concentration levels, and physicochemical forms of trace elements. Also, important fields of

future research are investigated. *The Species Directory of the Marine Fauna and Flora of the British Isles and Surrounding Seas* The Rosen Publishing Group, Inc Targeted at beginners as well as experienced users, this handy reference explains the benefits and uses of flow cytometry in the study of plants and their genomes. Following a brief introduction that highlights general considerations when analyzing plant cells by flow cytometric methods, the book goes on to discuss examples of application in plant genetics, genomic analysis, cell cycle analysis, marine organism analysis and breeding studies. With its list of general

Dizzy Gillespie was one of the most important and best-loved musicians in jazz history. With his horn-rimmed glasses, goatee, jive talk, and upraised trumpet bell, he was the hipster who most personified bebop. The musical heir to Louis Armstrong, he

created the modern jazz trumpet-playing style and dazzled aficionados and popular audiences alike for over 50 years. In this first full biography, Alyn Shipton covers all aspects of Dizzy's remarkable life and career, taking us through his days as a flashy trumpet player in the swing bands of the 1930s, his innovative bebop work in the 1940s, the worldwide fame and adoration he earned through his big band tours in the 1950s, and the many recordings and performances which defined a career

---

that extended into the early 1990s. Along the way, Shipton convincingly argues that Gillespie--rather than Charlie Parker as is widely believed--had the greatest role in creating bebop, playing in key jazz groups, teaching the music to others, and helping to develop the first original bebop repertory. Shipton also explores the dark side of Dizzy's mostly sunny personal life, his womanizing, the illegitimate daughter he fathered and

supported--now a respected jazz singer in her own right--and his sometimes needless cruelty to others. For anyone interested in jazz and one of its most innovative and appealing figures, **Groovin' High** is essential reading. **Aloha Cuisine** JHU Press
