Spanning the nineteenth and twentieth centuries, this fascinating history explores the lives and achievements of great women in science across the globe. Ten Women Who Changed Science and the World tells the stories of trailblazing women who made a historic impact on physics, biology, chemistry, astronomy, and medicine. Included in this volume are famous figures, such as two-time Nobel Prize winner Marie Curie, as well as individuals whose names will be new to many, though their breakthroughs were no less remarkable. These women overcame significant obstacles, discrimination, and personal tragedies in their pursuit of scientific advancement. They persevered in their research, whether creating life-saving drugs or expanding our knowledge of the cosmos. By daring to ask ' How? ' and ' Why? ', each of these women made a positive impact on the world we live in today. In this book, you will learn about:
Astronomy Henrietta Leavitt (United States, 1868 – 1921) discovered the period-luminosity relationship for Cepheid variable stars, which enabled us to measure the size of our galaxy and the universe. Physics Lise Meitner

(Austria, 1878 – 1968) fled Nazi Germany in 1938, taking with her the experimental results which showed that she and Otto Hahn had split the nucleus and discovered nuclear fission. Chien-Shiung Wu (United States, 1912 – 1997) demonstrated that the widely accepted ‘ law of parity ’ , which stated that left-spinning and right-spinning subatomic particles would behave identically, was wrong. Chemistry Marie Curie (France, 1867 – 1934) became the only person in history to have won Nobel prizes in two different fields of science. Dorothy Crowfoot Hodgkin (United Kingdom, 1910 – 1994) won the Nobel Prize for Chemistry in 1964 and pioneered the X-ray study of large molecules of biochemical importance. Medicine Virginia Apgar (United States, 1909 – 1974) invented the Apgar score, used to quickly assess the health of newborn babies. Gertrude Elion (United States, 1918 – 1999) won the Nobel Prize for Physiology or Medicine in 1988 for her advances in drug development. Biology Rita Levi-Montalcini (Italy, 1909 – 2012) won the Nobel Prize for Physiology or Medicine in 1986 for her co-discovery in 1954 of Nerve Growth Factor (NGF). Elsie Widdowson (United Kingdom, 1906 – 2000) pioneered the science of nutrition and helped devise the World War II food-rationing program. Rachel Carson (United States, 1907 – 1964) forged the environmental movement, most famously with her influential book *Silent Spring*.

A former stripper turned suburban housewife is exposed as a brutal killer in this shocking true crime tale of a loving husband beheaded in Phoenix. Phoenix, Arizona, 2004. Marjorie Orbin filed a missing person’s report on her husband, Jay. She claimed that the successful art dealer had left town on business after celebrating their son’s birthday more than a month before. But no one believed that Jay would abandon the family he loved. Authorities suspected foul play . . . As the search for Jay made local headlines, Marjorie’s story starting

coming apart. Why did she wait so long before going to police? If Jay was away on business, why were there charges made to his credit card in Phoenix? Then, the unthinkable happened. Jay’s headless, limbless torso was discovered on the outskirts of the Phoenix desert—and all evidence pointed to Marjorie as the killer. The investigation revealed surprising details about her life—six previous marriages, an ongoing affair with a man from her gym, and alleged ties to the New York mafia.

Edie Falco, Sheryl Crow, Athena Jones, and other breast cancer survivors and “previvors” tell their powerful, inspiring stories in this collection. Drawing from first-hand interviews of successful, high-profile women from myriad industries and perspectives, award-winning journalist Ali Rogin brings together an all-star support and recovery team to inspire anyone confronting a cancer diagnosis, along with their loved ones. Learn how preeminent actresses, musicians, politicians, journalists, and entrepreneurs faced a formidable disease and put it in its place. In their own words, the women of *Beat Breast Cancer Like a Boss* inform and encourage other women by sharing their experiences and advice. Learn how they told loved ones about their diagnoses, navigated treatment options, and managed the work/life/cancer balance. Rogin, too, faced great uncertainty when she tested positively for the BRCA1 genetic mutation at age twenty. She found answers in the vibrant community of breast cancer survivors and “previvors” who also stared down the odds. With her brave decision to undergo a prophylactic bilateral mastectomy before even graduating college, Rogin joined this diverse sisterhood of women confronting breast cancer in its many forms with dignity, strength, and humor.

This volume explores the latest available wet-lab techniques and computational methods to study in-cell small-molecule behavior and interactions with their targets. The chapters in this book discuss topics such as disease-relevant models for chemical biology studies, target engagement using cellular thermal shift assay or bioluminescence resonance energy transfer; visualization of bio-active small molecules Raman microscopy; (phospho-)proteomics and transcriptomics for mode-of-action studies, CRISPR/Cas9-based chemogenomic profiling in mammalian cells; predicting drug interactions using computational approaches; comparison of compound-induced profiles using high-content imaging or cancer cell line panels and web-based tools for polypharmacology prediction. Written in the highly successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Cutting-edge and thorough, *Systems Chemical Biology: Methods and Protocols* is a valuable resource for novice or expert scientists and researchers trying to initiate or continue their chemical biology studies at a systems level.

2012 First Place AJN Book of the Year Award Winner in Nursing Research! "This is a resource for success and should be a part of any researcher's library."--Doody's Medical Reviews This book is a practical, user-friendly guide for health care researchers across multiple disciplines who are involved in intervention research. It provides all of the essential elements needed for understanding how to design, conduct, analyze, and fund intervention studies that are replicable and can withstand the scrutiny of the Institutional Review Board and peer review. Developed from an annual continuing education workshop on intervention studies conducted by Dr. Melnyk, this text is the most comprehensive body of information available on this topic. Contributors address the design of interventions that are ethically considerate and sensitive to culture, race/ethnicity, and gender, minimizing threats to external and internal validity, measurement, and budgeting. The guide explores such implementation issues as subject recruitment and retention, data management, and specialized settings, cost analysis, and explaining intervention effects. The text also guides readers in writing grant applications that fund , and addresses how to move intervention study findings into the real world. A unique addition to the book is the availability of digital examples of progress reports, final reports, and research grant applications that have received funding from the National Institutes of Health and other relevant organizations. This text is a valuable resource for all health care professionals

conducting research and for doctoral students in health care studies. Key Features: Presents the essential tools for designing, conducting, analyzing, and funding intervention studies Designed for use by health care professionals conducting intervention research Provides comprehensive, accessible guidelines for doctoral students across all health care disciplines Instructs readers on writing grant applications that fund Includes digital examples of funded research grants, progress reports, and final reports

The true story of a killer nurse whose crimes were hidden by a hospital for years. It ' s 1980, and Genene Jones is working the 3 to 11 PM shift in the pediatric ICU in San Antonio's county hospital. As the weeks go by, infants under her care begin experiencing unexpected complications—and dying—in alarming numbers, prompting rumors that there is a murderer among the staff. Her eight-hour shift would come to be called “ the death shift. ” This strange epidemic would continue unabated for more than a year, before Jones is quietly sent off—with a good recommendation—to a rural pediatric clinic. There, eight children under her care mysteriously stopped breathing—and a 15-month-old baby girl died. In May 1984, Jones was finally arrested, leading to a trial that revealed not only her deeply disturbed mind and a willingness to kill, but a desire to play “ God ” with the lives of the children under her care. More shocking still was that the hospital had shredded records and remained silent about Jones ' horrific deeds, obscuring the full extent of her spree and prompting grieving parents to ask: Why? Elkind chronicles Jones ' rampage, her trials, and the chilling aftermath of one of the most horrific crimes in America, and turns his piercing gaze onto those responsible for its cover-up. It is a tale with special relevance today, as prosecutors, distraught parents,

and victims ' advocates struggle to keep Jones behind bars. “ A horrifying true-life medical thriller... ” —Publishers Weekly

Fourteen years ago, two teenagers on a Christmas Eve first date were abducted, and only one lived through the ordeal. The lone surviving victim, Sunny Hartley, became a wealthy sculptor, but the reclusive “ice maiden” will not talk about what happened that terrible night. Now a chance encounter in the Miami morgue between reporter Britt Montero and a petty thief, bizarrely electrocuted during the commission of a crime, has placed the still unsolved kidnapping/murder on the front burner of Sgt. Craig Burch's Cold Case Squad. But Britt and Burch are about to discover that the price of justice can be too dear to pay; that when you start turning over rocks, sometimes something truly ugly slithers out.

“Diagnostics in Plant Breeding” is systematically organizing cutting-edge research reviews on the development and application of molecular tools for the prediction of plant performance. Given its significance for mankind and the available research resources, medical sciences are leading the area of molecular diagnostics, where DNA-based risk assessments for various diseases and biomarkers to determine their onset become increasingly available. So far, most research in plant genomics has been directed towards understanding the molecular basis of biological processes or phenotypic traits. From a plant breeding perspective, however, the main interest is in predicting optimal genotypes based on molecular information for more time- and cost-efficient breeding schemes. It is anticipated that progress in plant genomics and in particular sequence technology made recently will shift the focus from “explanatory” to “predictive” in crop science. This book assembles chapters on all areas relevant to development and application of predictive molecular tools in plant breeding by leading authorities in the respective areas.

"The insights ... go beyond cyber security alone to examine the critical concepts and often misunderstood distinction between leadership and management. This should be required reading on every college campus." - Collin Smith, CISSP - Cybersecurity Professional. "...this book will change both the way we think about leadership and the way we understand information technology. I recommend this book highly to everyone." - Eric Schwartz -

Executive Director at Advena World LLC and Adjunct Professor in Economics at Montgomery College. "...explains what an organization needs to know to implement cybersecurity governance." Council of Graduate Schools Testimony at the US Senate Appropriations Committee Meeting, April 29, 2014. "...exposes the common faults with which we are all struggling in this industry. It's humorous ... engaging, and I feel helps a reader question their own approaches. I was originally looking for a compendium that works as collateral reading for Cyber Security training courses, and I found it. I genuinely recommend this work tool." - David Bickel - Chief Information Security Officer, Department of Health and Mental Hygiene, State of Maryland. Written by one of the leading global thought leaders in cybersecurity with 30 years of practical experience in the field, this book addresses the most neglected area of cybersecurity -- cybersecurity governance -- the management, leadership, and engagement of people for the purposes of cybersecurity. This book is an essential book for anyone interested in understanding how cybersecurity should be led in an organization. All business executives or students at any level will benefit from this book. Cybersecurity can be a source of productivity and innovation and be a revenue driver. The leadership principles are applicable in any field and in any organization.

“ Masterfully captures the largely forgotten saga of warrior queens through the ages . . . an epic filled with victory, defeat, and legendary women. ” —Patrick K. O ’ Donnell, bestselling author of The

Indispensables History 's killer queens come in all colors, ages, and leadership styles. Elizabeth Tudor and Golda Meir played the roles of high-stakes gamblers who studied maps with an unblinking, calculating eye. Angola 's Queen Njinga was willing to shed (and occasionally drink) blood to establish a stable kingdom in an Africa ravaged by the slave trade. Caterina Sforza defended her Italian holdings with cannon and scimitar, and Indira Gandhi launched a war to solve a refugee crisis. From ancient Persia to modern-day Britain, the daunting thresholds these exceptional women had to cross—and the clever, sometimes violent ways in which they smashed obstacles in their paths—are evoked in vivid detail. The narrative sidles up to these war queens in the most dire, tumultuous moments of their reigns and examines the brilliant methods and maneuvers they each used to defend themselves and their people from enemy forces. Father-daughter duo Jonathan W. and Emily Anne Jordan extoll the extraordinary power and potential of women in history who walked through war 's kiln and emerged from the other side—some burnished to greatness, others burned to cinders. All of them, legends. “ Reminds us intelligently, entertainingly and powerfully that strong-willed women have always been the equal—and very often the superior—of their male counterparts, even in the field historically most jealously reserved for men: warfare. ” —Andrew Roberts, New York Times – bestselling author “ This book should be required reading for anyone who loves history. ” —James M. Scott, Pulitzer Prize finalist

A memoir by the mustachioed baseball pitcher who went playing rocky, trash-ridden fields in Castro 's Cuba to becoming a Boston Red Sox legend. Luis Tiant is one of the most charismatic and accomplished players in Boston Red Sox and Major League Baseball history. With a barrel-chested physique and a Fu Manchu mustache, Tiant may not have looked like the lean, sculpted ace he usually played against, but nobody was a tougher competitor on the diamond, and few were as successful. There may be no more qualified twentieth-century pitcher not yet enshrined in the National Baseball Hall of Fame. His big-league dreams came at a price: racism in the Deep South and the Boston suburbs, and nearly fifteen years separated from a family held captive in Castro 's Cuba. But baseball also delivered World Series stardom and a heroic return to his island home after close to a half-century of forced exile. The man whose name—“ El Tiante ” —became a Fenway Park

battle cry has never fully shared his tale in his own words, until now. In *Son of Havana*, Tiant puts his heart on his sleeve and describes his road from torn-up fields in Havana to the pristine lawns of major league ballparks. Readers will share Tiant's pride when appeals by a pair of US senators to baseball-fanatic Castro secure freedom for Luis's parents to fly to Boston and witness the 1975 World Series glory of their child. And readers will join the big-league ballplayers for their spring 2016 exhibition game in Havana, when Tiant—a living link to the earliest, scariest days of the Castro regime—threw out the first pitch.
