WALL STREET JOURNAL BESTSELLER From Michael Dell, renowned founder and chief executive of one of America's largest technology companies, the inside story of the battles that defined him as a leader. In 1984, soon-to-be college dropout Michael Dell hid signs of his fledgling PC business in the bathroom of his University of Texas dorm room. Almost 30 years later, at the pinnacle of his success as founder and leader of Dell Technologies, he found himself embroiled in a battle for his company's survival. What he'd do next could ensure its legacy—or destroy it completely. *Play Nice But Win* is a riveting account of the three battles waged for Dell Technologies: one to launch it, one to keep it, and one to transform it. For the first time, Dell reveals the highs and lows of the company's evolution amidst a rapidly changing industry—and his own, as he matured into the CEO it needed. With humor and humility, he recalls the mentors who showed him how to turn his passion into a business; the competitors who became friends, foes, or both; and the sharks that circled, looking for weakness. What emerges is the long-term vision underpinning his success: that technology is ultimately about people and their potential. More than an honest portrait of a leader at a crossroads, *Play Nice But Win* is a survival story proving that while anyone with technological insight and entrepreneurial zeal might build something great—it takes a leader to build something that lasts.

Complete Reprint of Harry Johnson's *Bartenders' Manual*, originally published 1882. "Harry Johnson was a professional bartender for most of his life and along with Jerry Thomas he was one of the first to write about his trade. Harry's rather opinionated thoughts on the bartending profession and how to run a bar, which takes up the first third of the book, make for a fascinating insight in to the world of nineteenth century bars. He wasn't afraid of boasting, describing one of his bars as "what was generally recognized to be the largest and finest establishment of the kind in this country", but the advice is clearly spoken from the heart about a profession he really believes in."

The producer price index (PPI) measures the rate at which the prices of producer goods and services are changing overtime. It is a key statistic for economic and business decision making and inflation monitoring. *The Producer Price Index Manual: Theory and Practice* provides clear, up-to-date guidance on the concepts, uses, methods, and economic theory of the PPI, including information on classifications, sources, compilation techniques, and analytical uses of the PPI. The Manual supersedes the previous international guidance on PPIs (available in the *Manual on Producers' Price Indices for Industrial Goods*, published by the United Nations Statistics Division in 1979). The Manual's conceptual framework derives from the System of National Accounts 1993 and recent developments in index number theory. Preparation of the Manual was undertaken by the Intersecretariat Working Group on Price Statistics through a technical expert group chaired by the IMF and involving representatives from the ILO, the OECD, the UN Economic Commission for Europe, the World Bank, national statistical offices, and academic institutions. **Direct From Dell** Motorbooks

The M4 Sherman can be said to be the tank that won World War II. With almost fifty thousand built during the war, it was America's primary armored fighting vehicle during the war. Thousands of these found their way into the inventories of the British Army and Soviet Red Army as well as other allies. This manual covers the development of the Sherman, the vast array of variants, and the use of the hull and chassis for other purposes. Also covered is production, anatomy, paintwork, and markings. Information on the M4 in action takes the reader from combat against Rommel's Afrika Korps to Italy, the invasion at Normandy, and the race across France. And it wouldn't be a Haynes manual without practical information about owning, restoring, and maintaining a Sherman tank. Whether you are an armchair General Patton or a serious collector, tips on buying a tank, special tools, handling heavy components, and recommended fluids and lubricants will prove invaluable.

Dellmann's Textbook of Veterinary Histology Bloomsbury Publishing Designed by Grumman's brilliant Tom Kelly, the Apollo Lunar Excursion Module (or "LEM" for short) was a triumph of purpose-built engineering. In the six years 1962-1968 between drawing board and first flight, a myriad of challenges were overcome related to weight, reliability and safety. The final design, designated the Lunar Module or "LM," boasted tiny windows instead of large portholes, four legs instead of five and most famously had no seats instead relying on the astronauts' legs to cushion a lunar landing. Ten LMs made it into space including three flown in development and test missions, and six which landed on the Moon. A seventh famously saved the crew of Apollo 13 when that mission's Command Module suffered a catastrophic malfunction. Originally created for NASA by Grumman in 1964, this LEM Familiarization Manual provides an operational description of all subsystems and major components of the lunar lander. It includes sections about the LEM mission, spacecraft structure, operational subsystems, prelaunch operations, and ground support equipment."

- This book is the first to be dedicated to a comprehensive study with English of the early 15th century Strasbourg - One of the oldest technical manuals to include a recipe collection describing the preparation of drying oil media and their application in panel painting This book is the first to be dedicated to a comprehensive study with English translation (plus extensive commentary) of the early 15th century Strasbourg Manuscript - believed to have been the oldest German-language source for the study of Northern European painting techniques and considered to be the northern counterpart to Cennini's Il Libro dell'arte. It is also one of the oldest technical manuals to include a recipe collection describing the preparation of drying oil media and their application in panel painting. Lost in a fire at the Strasbourg Library in 1870, this recipe collection was preserved in the only known copy commissioned by Sir Charles Eastlake, the first director of the National Gallery which was partially published in 1847. The author's extensive research is based on this copy, two later books based on it and also on comparison with other manuscripts of the Strasbourg tradition, which allowed her to reconstruct the text of the lost manuscript.
