Ocean Energy Springer Science & Business Media

The book begins with real world cases of botnet attacks to underscore the need for action. Next the book will explain botnet fundamentals using real world examples. These chapters will cover what they are, how they operate, and the environment and technology that makes them possible. The following chapters will analyze botnets for opportunities to detect, track, and remove them. Then the book will describe intelligence gathering efforts and results obtained to date. Public domain tools like OurMon, developed by Jim Binkley of Portland State University, will be described in detail along with discussions of other tools and resources that are useful in the fight against Botnets. This is the first book to explain the newest internet threat - Botnets, zombie armies,

bot herders, what is being done, and what you can do to protect your enterprise Botnets are the most complicated and difficult threat the hacker world has unleashed - read how to protect yourself

Life Cycle Assessment of Renewable Energy Sources GPO FCIC

Governments are setting challenging targets to increase the production of energy and transport fuel from sustainable sources. The emphasis is increasingly on renewable sources including wind, solar, geothermal, biomass based biofuel, photovoltaics or energy recovery from waste. What are the environmental consequences of adopting these other sources? How do these various sources compare to each other? Life Cycle Assessment of Renewable Energy Sources tries to answer these questions based on the universally adopted method of Life Cycle Assessment (LCA). This book introduces the concept and importance of LCA in

the framework of renewable energy sources and discusses the key issues in conducting their LCA. This is followed by an in-depth discussion of LCA for some of the most common bioenergy sources such as agricultural production systems for biogas and bioethanol, biogas from grass, biodiesel from palm oil, biodiesel from used cooking oil and animal fat, Jatropha biodiesel, lignocellulosic bioethanol, ethanol from cassava and sugarcane molasses, residential photovoltaic systems, wind energy, microalgal biodiesel, biohydrogen and biomethane. Through real examples, the versatility of LCA is well emphasized. Written by experts all over the globe, the book is a cornucopia of information on LCA of bioenergy systems and provides a platform for stimulation of new ideas and thoughts. The book is targeted at practitioners of LCA and will become a useful tool for researchers working on different aspects of bioenergy.

Cytochromes P450 (CYPs) comprise a large superfamily of proteins that are of central importance in the detoxification or activation of a tremendous number of natural and synthetic hydrophobic xenobiotics, including many therapeutic drugs, chemical carcinogens and environmental pollutants. CYPs are important in mediating interactions between an organism and its chemical environment and in the regulation of physiological processes. Cytochrome P450 Protocols, Third Edition focuses on high-throughput methods for the simultaneous analysis of multiple CYPs, substrates or ligands. Although the emphasis is on CYPs of mammalian origin, it reflects an increasing interest in CYPs of bacterial species. Also

included are chapters on cytochrome P450 reductase (the redox partner of CYPs) and the flavin-containing monooxygenases (FMOs), and metabolomic and lipidomic approaches for identification of endogenous substrates of CYPs (‘ de-orphanizing ’ CYP substrates). Written in the successful Methods in Molecular Biology™ series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible protocols, and notes on troubleshooting and avoiding known pitfalls. Authoritative and easily accessible, Cytochrome P450 Protocols, Third Edition provides a wide range of techniques accessible to researchers in fields as diverse as biochemistry, molecular biology,

pharmacology, toxicology, environmental biology and genetics.

Mental Health and Crime Univ of California Press
Engineers ’ dreams and fossil energy replacement schemes can come true. Man has been tapping the energy of the sea to provide power for his industries for centuries. Tidal energy combined with that of waves and marine winds rank among those most successfully put to work. Large scale plants are capital intensive but smaller ones, particularly built in China, have proven profitable. Since the initiation of the St Malo project in France, similar projects have gone into active service where methods have been devised to cut down on costs, new types of turbines developed and cost competitiveness considerably improved. Tidal power has enormous potential. The book reviews recent progress in extracting power from the ocean, surveys the history of tidal power harnessing and updates a prior publication by the author.

Implantable defibrillators as originally conceived by Michel Mirowski were limited to the detection and automatic termination of ventricular fibrillation. In the original "AID" device, the detection algorithm

sought to distinguish sinus rhythm from ventricular fibrillation by identifying the "more sinusoidal waveform of ventricular fibrillation." The therapeutic intervention was elicited only once deadly polymorphic rhythms had developed. It was rapidly learned, however, that ventricular fibrillation is usually preceded by ventricular tachycardia. Mirowski recognized the pivotal importance of developing algorithms based on heart rate. Ventricular tachycardia detection allowed the successful development of interventions for the termination of ventricular tachyarrhythmias before they degenerated into ventricular fibrillation. Current device therapy no longer confines itself to the termination of chaotic rhythms but seeks to prevent them.

Diagnostic algorithms moved upward along the chain of events leading to catastrophic rhythm disturbances. Rate smoothing algorithms were developed to prevent postextrasystolic pauses from triggering ventricular and atrial tachyarrhythmias. Beyond the renaissance of ectopy-centered strategies, long-term prevention received increasing attention. Multisite pacing therapies provided by "Arrhythmia Management Devices" were designed to reduce the "arrhythmia burden" and optimize the synergy of cardiac contraction and relaxation. Clinical evidence now suggests that atrial fibrillation prevention by pacing is feasible and that biventricular pacing may be of benefit in selected patients with heart failure. However, these applications of device

therapy that generally require ventricular defibrillation backup remain investigational and were not considered in this book.

501 Great Artists K. G. Saur

Does mental disorder cause crime? Does crime cause mental disorder? And if either of these could be proved to be true what consequences should stem for those who find themselves deemed mentally disordered offenders? Mental Health and Crime examines the nature of the relationship between mental disorder and crime. It concludes that the broad definition of what is an all too common human condition – mental disorder – and the widespread occurrence of an equally all too common human behaviour – that of offending – would make unlikely any definitive or easy answer to such questions. For those who offend in the context of mental disorder, many aspects

of the criminal justice process, and of the disposals that follow, are adapted to take account of a relationship between mental disorder and crime. But if the very relationship is questionable, is the way in which we deal with such offenders discriminatory? Or is it perhaps to their benefit to be thought of as less responsible for their offending than fully culpable offenders? The book thus explores not only the nature of the relationship, but also the human rights and legal issues arising. It also looks at some of the permutations in the therapeutic process that can ensue when those with mental health problems are treated in the context of their offending behaviour.

The Cumulative Book Index John Wiley & Sons

Nowhere was the linguistic diversity of the New World more extreme than in

California, where an extraordinary variety of village-dwelling peoples spoke seventy-eight mutually unintelligible languages. This comprehensive illustrated handbook, a major synthesis of more than 150 years of documentation and study, reviews what we now know about California's indigenous languages. Victor Golla outlines the basic structural features of more than two dozen language types and cites all the major sources, both published and unpublished, for the documentation of these languages—from the earliest vocabularies collected by explorers and missionaries, to the data amassed during the twentieth-century by Alfred Kroeber and his colleagues, to the extraordinary work of John P. Harrington and C. Hart Merriam. Golla also devotes

chapters to the role of language in reconstructing prehistory, and to the intertwining of language and culture in pre-contact California societies, making this work, the first of its kind, an essential reference on California ' s remarkable Indian languages.

SUMMARY Living Brave(TM) is a mindset and methodology that answers the question 'what would we do if we were Living

Brave(TM)? Understand the individual & cultural mechanic, mindset and methodology of Trust, Accountability, Bravery and Connection Get clarity on how leaders let go of position and power to increase trust and enable discretionary effort Understand how the social media platform rewrote peoples expectations for those in senior roles See how leadership is behavioural and a mindset and is not based on positional power Identify the beliefs and levers that enable bravery and accountable behaviours Gain clarity around your own leadership position Connect with your own identity as a Leader of Self Enable others to hold space with their own version of Living Brave(TM) FORWARD "I have no hesitation in recommending this book" -

Major General Paul Nanson, CBE (Commandant Royal Military Academy Sandhurst) TESTIMONIALS "Trusted counsel to the senior team. Authentic, motivational, inspirational, making a positive contribution to the success of our business. A fantastic ability to 'cut through the noise' and deal with the things that really matter." - Anthony O'Keeffe, MD, LINK Asset Services "Fantastic coach, such vast experience, there doesn't seem to be a situation he hasn't come across. Knowledgeable, engaging, inspiring and firm in equal measure, the kind of leader any of us want to be. His 'craft' combined with his humility make him an outstanding partner to any leadership team." - Elona Mortimer-Zhika, CEO, IRIS Software "A

breath of fresh air to our business and instrumental in converting our hopes and aspirations into a reality." - Colin Jellicoe, HRD, VINCI Construction "Rarely in life do you come across someone who genuinely inspires you to greater leadership, gives you tools to excel and is truly brilliant at what they do. Outstanding in his ability to coach, mentor, communicate, inspire. Above all, he delivers results that add true value." - Mark Taylor, Global CEO, InXpress

AUTHOR

Guy Bloom is a leadership specialist working with organisations and senior leaders to step into the space of Living Brave. He is the driving force behind Living Brave(TM), working with individuals and organisations to create truly trusted, accountable, brave and connected leaders. Guy has spent his working life investigating the human and organisational drivers that create long term systemic change. A life-long martial artist he is an instructor in three martial art systems, a four-time Hall of Famer and an advocate of how fears can be overcome with a proven technique, the correct mindset and the bit no one likes.....practice and feedback. He spends most of his work life as an executive and team coach. In his spare time, Guy judge's leadership awards has won a few of them, writes articles, is working on a second and third book. This is all geared to ensure his two sons have a clear legacy of what leadership is for themselves and that those who truly want to define themselves as Living Brave(TM) have an approach that is deeply rooted in methodology and mindset.

His favourite quote is from the lawyer, politician and diplomat Adlai E. Stevenson, "It's hard to lead a cavalry charge if you think you look funny on a horse", as Guy says after sharing this, "I'll that let sit for a moment."
