Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who

take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

Advances in Digital Forensics V Late Medieval and Early Modern The history of the Black Sea as a source of Mediterranean slaves

stretches from ancient Greek trade, they have rarely been colonies to human trafficking networks in the present day. At its height during the fourteenth and early fifteenth centuries, the Black Sea slave trade was not the sole source of Mediterranean slaves; Genoese, Venetian, and Egyptian merchants bought captives taken in conflicts throughout the region, from North Africa, sub-Saharan Africa, the Balkans, and the Aegean Sea. Yet the trade in Black Sea slaves provided merchants with profit and prestige; states with military recruits, tax revenue, and diplomatic influence; and households with the service of women, men, and children. Even though Genoa, Venice, and the Mamluk sultanate of Egypt and Greater Syria were the three most important strands in the web of the Black Sea slave

studied together. Examining Latin and Arabic sources in tandem, Hannah Barker shows that Christian and Muslim inhabitants of the Mediterranean shared a set of assumptions and practices that amounted to a common culture of slavery. Indeed, the Genoese, Venetian, and Mamluk slave trades were thoroughly entangled, with wide-ranging effects. Genoese and Venetian disruption of the Mamluk trade led to reprisals against Italian merchants living in Mamluk cities, while their participation in the trade led to scathing criticism by supporters of the crusade movement who demanded commercial powers use their leverage to weaken the force of Islam. Reading notarial registers, tax records, law, merchants' accounts, travelers' tales

and letters, sermons, slave-buying manuals, and literary works as well as treaties governing the slave trade and crusade propaganda, Barker gives a rich picture of the context in which merchants traded and enslaved people met their fate.

Digital forensics deals with the acquisition, preservation, examination, analysis and presentation of electronic evidence. Networked computing, wireless communications and portable electronic devices have expanded the role of digital forensics beyond traditional computer crime investigations. Practically every crime now involves some aspect of digital evidence; digital forensics provides the techniques and tools to articulate this evidence. Digital forensics also has myriad intelligence applications.

Furthermore, it has a vital role in information assurance - investigations of security breaches yield valuable information that can be used to design more secure systems. Advances in Digital Forensics V describes original research results and innovative applications in the discipline of digital forensics. In addition, it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include: themes and issues, forensic techniques, integrity and privacy, network forensics, forensic computing, investigative techniques, legal issues and evidence management. This book is the fifth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers and

practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a selection of twenty-three edited papers from the Fifth Annual IFIP WG 11.9 International Conference on Digital Forensics, held at the National Center for Forensic Science, Orlando, Florida, USA in the spring of 2009. *Advances in Digital Forensics V* is an important resource for researchers, faculty members and graduate students, as well as for practitioners and individuals engaged in research and development efforts for the law enforcement and intelligence communities.

In Book IV of Virgil's "Aeneid", one of the most studied books of that epic poem, Dido, queen of Carthage, is inflamed by love for Aeneas. The goddesses Juno and Venus plot to unite them, and their 'marriage' is consummated in

a cave during a hunt. However, Jupiter sends Mercury to remind Aeneas of his duty, and the hero departs despite Dido's passionate pleas. At the end of the book, Dido commits suicide. This classic edition of the Latin text of Book IV replaces the long-serving edition by Gould and Whiteley, making this book more accessible to today's students and taking account of the most recent scholarship and critical approaches to Virgil. It includes a substantial introduction, annotation to explain language and content, and a comprehensive vocabulary.

Chevrolet Silverado and Gmc Sierra "O'Reilly Media, Inc." This book is about HCI research in an industrial research setting. It is based on the experiences of two researchers at the IBM T. J. Watson Research Center. Over the last two decades, Drs. John and Clare-Marie Karat have conducted HCI research to

create innovative usable technology for users across a variety of domains. We begin the book by introducing the reader to the context of industrial research as well as a set of common themes or guidelines to consider in conducting HCI research in practice. Then case study examples of HCI approaches to the design and evaluation of usable solutions for people are presented and discussed in three domain areas: - item Conversational speech technologies, - item Personalization in eCommerce, and - item Security and privacy policy management technologies In each of the case studies, the authors illustrate and discuss examples of HCI approaches to design and evaluation that worked well and those that did not. They discuss what was learned over time about different HCI methods in practice, and changes that were made to the HCI tools used over

time. The Karats discuss trade-offs and issues related to time, resources, and money and the value derived from different HCI methods in practice. These decisions are ones that need to be made regularly in the industrial sector. Similarities and differences with the types of decisions made in this regard in academia will be discussed. The authors then use the context of the three case studies in the three research domains to draw insights and conclusions about the themes that were introduced in the beginning of the book. The Karats conclude with their perspective about the future of HCI industrial research. Table of Contents: Introduction: Themes and Structure of the Book / Case Study 1: Conversational Speech Technologies: Automatic Speech Recognition (ASR) / Case Study 2: Personalization in eCommerce / Case Study 3: Security and Privacy Policy Management Technologies /

A classic history of banking and trade in the medieval period, combining superb research and analysis with graceful writing. The

Medici Bank was the most powerful banking house of the 15th century. Headquartered in Florence, Italy, it established branches in Rome, Venice, Geneva, Lyons, Bruges, London, and many other cities. The bank served as financial agent of the Church, extended credit to monarchs, and facilitated international trade in Western Europe. By their personal influence and the use of their profits, the owners and administrators of the bank contributed significantly to the development of Florence as the greatest center of the Renaissance.

How and why do changes happen when and where they do? Is it possible to explain changes that occurred centuries ago? These are the central questions addressed in this book, in which the author argues that the development of numerous features of medieval (and modern) Spanish can best be explained as the results of koineization, a process in which

mixing among speakers of different dialects leads to the rapid formation of a new mixed and generally simplified variety. The book includes a complete introduction to koineization and detailed study of three stages of dialect mixing in medieval Spanish.

Early in his relationship with his beloved Border Collie, Jeff Maziarek had a sense that "beneath the fur" there was a sentient being with far deeper insights into life than commonly thought. And, in their last year together some mystical events completely confirmed the accuracy of that feeling. In Codi's Journey, Jeff describes these events within the context of an inspiring and heartfelt narrative illustrating the very challenging circumstances Codi faced during her final 12 months. Any dog owner

who has ever shared stories about the "humanness" of their pet, as well as any adult who has ever loved & lost a beloved animal companion, will surely find this work captivating. To provide even greater depth into Codi's story, Jeff details how this feisty canine became a part of his family. He likewise shares many engaging anecdotes about her personality and several of her more memorable adventures over the years. A charming photo gallery with 42 captioned images further brings Codi to life, featuring snapshots from the night she arrived as a 10-week-old puppy to the final week of her life. "Codi's story is one told with great heart; you will care about this dog as you think about your own dogs. Anyone who has ever loved and lost canine companions will definitely

identify with this work." - Steve Dale, syndicated radio host: WGN Radio; "Pet World;" syndicated columnist, USA Weekend Contributing Editor "This book captures the dynamics of being a pet owner and the guilt, grief, and commitment that many pet owners go through in loving and losing a pet. As someone who has "been there," it was reassuring that I am not the only one to feel those things, to do whatever it took to save them and, when the time came, to let them go. Any book that can stir laughter as well as tears is a wonderful story. Codi's Journey is awesome." - Terri Wernert, Great Lakes Border Collie Rescue "I've experienced the extraordinary love and grievous loss that comes when we're lucky enough to share our lives with amazing creatures. Codi's Journey tells that story with candor, joy & tears. Since they cannot stay long, our four-legged kids teach so much about the importance of honoring each and every moment we're given with them, a lesson we might do well to apply elsewhere. A friend once told me that dogs are angels sent down to look after us. Codi's Journey affirms that belief" - Catherine Crier, Author, Former Judge, Award-Winning Journalist, and TV Broadcaster "For anyone who has experienced a spiritual canine connection, Codi's Journey is a must read. It's a touching tribute to a man's search for a very special pup and the heart-warming life journey they shared." - Eugenia Last, Internationally Syndicated Astrologist and Author "This is a remarkable story of a man's best friend and the powerful bond

between dog and owner that will make you laugh, as you read about Codi's playful way of teaching wisdom, and cry as man & friend prepare for the next steps in life's great journey. It is a definite "must-read" for dog lovers who have lost a dear canine friend." - Pete Koerner, author of "The Belief Formula" Author's Personal Note: My foremost intention with this work is to share an authentic story with two key messages. First, that our pets actually are "sages with fur" with a far greater understanding of life (and us) than commonly thought. Second, that it's perfectly normal to feel intense & long-lasting grief at the loss of a pet. This is particularly so when that animal served as an adult's primary companion for years. In this regard, I sincerely want any reader who also has experienced such a

loss to know that someone truly does understand the sadness and emptiness they felt when their beloved pet passed on. Finally, it's my hope that such readers come to understand how important it is to fully process their feelings of grief by really feeling them rather than keepin
