*Vertical Readings in Dante's Comedy* is a reappraisal of the poem by an international team of thirty-four scholars. Each vertical reading analyses three same-numbered cantos from the three canticles: Inferno i, Purgatorio i and Paradiso i; Inferno ii, Purgatorio ii and Paradiso ii; etc. Although scholars have suggested before that there are correspondences between same-numbered cantos that beg to be explored, this is the first time that the approach has been pursued in a systematic fashion across the poem. This collection – to be issued in three volumes – offers an unprecedented repertoire of vertical readings for the whole poem. As the first volume exemplifies, vertical reading not only articulates unexamined connections between the three canticles but also unlocks engaging new ways to enter into core concerns of the poem. The three volumes thereby provide an indispensable resource for scholars, students and enthusiasts of Dante. The volume has its origin in a series of thirty-three public lectures held in Trinity College, the University of Cambridge (2012-2016) which can be accessed at the 'Cambridge Vertical Readings in Dante's Comedy' website.

However, Jupiter sends Mercury to remind Aeneas of his duty, and the hero departs despite Dido's passionate pleas. At the end of the book, Dido

The Italian Quattrocento is recognised as the period 'par excellence' for the production of manuscripts in Latin translation. As a consequence, relatively few vernacular translators have been brought to scholarly attention. This book celebrates the many voices of Quattrocento translators by examining their self-presentation in prefaces and dedicatory letters. It highlights the vitality of a culture of translation that was inseparable from humanist values, and that connected different city states and courts across the Italian peninsula (Florence and Naples, but also Perugia, Salerno and Milan, among others). By analysing the translators' self-fashioning statements and perceptions of their role, as well as their accounts of their work, this study reveals the intensely collaborative nature of translative practice in the fifteenth-century. Latin and vernacular translators worked together to serve and please a broad readership that was eager to benefit from the humanist passion for ancient knowledge. This study collapses the perceived divide between Latin and vernacular humanisms, and offers a fresh understanding of Quattrocento Italy as a period of immense dynamism and creativity in the history of translation.

Digital forensics deals with the acquisition, preservation, examination, analysis and presentation of electronic evidence. Networked computing, wireless communications and portable electronic devices have expanded

the role of digital forensics beyond traditional computer crime

investigations. Practically every crime now involves some aspect of digital evidence; digital forensics provides the techniques and tools to articulate this evidence. Digital forensics also has myriad intelligence applications. Furthermore, it has a vital role in information assurance - investigations of security breaches yield valuable information that can be used to design more secure systems. *Advances in Digital Forensics V* describes original research results and innovative applications in the discipline of digital forensics. In addition, it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include: themes and issues, forensic techniques, integrity and privacy, network forensics, forensic computing, investigative techniques, legal issues and evidence management. This book is the fifth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a selection of twenty-three edited papers from the Fifth Annual IFIP WG 11.9 International Conference on Digital Forensics, held at the National Center for Forensic Science, Orlando, Florida, USA in the spring of 2009. *Advances in Digital Forensics V* is an important resource for researchers, faculty members and graduate students, as well as for practitioners and individuals engaged in research and development efforts for the law enforcement and intelligence communities.

textiles and tombs, on weapons or human skin. Drawing on the work done at the Collaborative Research Centre “ Material Text Cultures, ” (SFB 933) this volume presents a comparative overview of how and where text-bearing artefacts appear in medieval German, Old Norse, British, French, Italian and Iberian literary traditions, and also traces the paths inscribed objects chart across multiple linguistic and cultural traditions. The volume ’ s focus on the raw materials and practices that shaped artefacts both mundane or fantastical in medieval narratives offers a fresh perspective on the medieval world that takes seriously the vibrancy of matter as a vital aspect of textual culture often overlooked.

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.
