Breaching the Bronze Wall deals with the idea that the words of honorable Muslims constitutes proof and that written documents and the words of non-Muslims are of inferior value. Thus, foreign merchants in cities such as Istanbul, Damascus or Alexandria could barely prove any claim, as neither their

contracts nor their words were of any value if countered by Muslims. Francisco Apellóniz explores how both groups labored to overcome the 'biases against non-Muslims' in Mamluk Egypt's and Syria's courts and markets (14th-15th c.) and how the Ottoman conquest (1517) imposed a new, orthodox view on the problem. The book slips into the Middle Eastern archive and the Ottoman Divan, and scrutinizes shar'ia's intricacies and their handling by consuls, dragomans, qadis and other legal actors.

Deals with the history of eyeglasses from their invention in Italy ca. 1286 to the appearance of the telescope three cent. later. "By the end of the 16th cent. eyeglasses were as common in western and central Europe as desktop computers are in western developed countries today." Eyeglasses served an important technological function at both the intellectual and practical level, not only easing the textual

studies of scholars but also easing the work of craftsmen/small bus. During the 15th cent. two crucial developments occurred: the ability to grind convex lenses for various levels of presbyopia and the ability to grind concave lenses for the correction of myopia. As a result, eyeglasses could be made almost to prescription by the early 17th cent. Illus.

Studies in the History of Accounting Springer

The roots of modern capitalism go back to the Italian banking system of the late Middle Ages and the Renaissance. In the fifteenth century, the Medici Bank succeeded in overshadowing its competitors, the Bardi and the Peruzzi, who were the giants of the fourteenth century, and grew into a vast establishment with branches in most of the large cities of Western Europe. A study of its operations is essential to an understanding of the economic conditions in Europe in the fifteenth century. From a careful study of pertinent documents, including a set of libri segreti (confidential ledgers) discovered in 1950, Professor de Roover has reconstructed the details of the bank's organization and operating methods; its loan policies, which reflected the Church's doctrine on usury; its trading and industrial investments; its roles within the Florentine guild system and tax structure; and its activities as financial agent of the Church. He covers every aspect of the bank's history, from its early years under the management of

Giovanni di Bicci de' Medici to its collapse with the expulsion of the Medici from Florence. "An invaluable contribution to the economic history of the period....A splendid book."—Harry A. Miskimin, *The American Economic Review* "The most important work in English on a medieval or Renaissance bank."—*The Economist* "The best book ever written on the medieval banking system."—John T. Noonan, Jr., *Harvard Law Review* "The most authoritative treatment of its subject in any language."—Rondo Cameron, *The Accounting Review*

From the 14th until the 19th century the last novella of Boccaccio's *Decameron*, also known as the Griselda story, has been translated and adapted countless times in many European languages. This story's success can be explained by considering it a myth and analysing how this myth engages with contemporary discourses, such as the definition of the ideal wife, the querelle des femmes, the socio-political consequences of social exogamy, and tyranny.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. This volume of essays is meant as a tribute to Alistair Crombie by some of those who have studied with him. The occasion of its publication is his seven tieth birthday - 4 November 1985. Its contents are a reflection - or so it is hoped - of his own interests, and they indicate at the same time his influence on subjects he has pursued for some forty years. Born in Brisbane, Australia, Alistair Cameron Crombie took a first degree in zoology at the University of Melbourne in 1938, after which he moved to Je sus College, Cambridge. There he took a doctorate in the same subject (with a dissertation on population dynamics - foreshadowing a later interest in the history of Darwinism) in 1942. By this time he had taken up a research position with the Ministry of Agriculture and Fisheries in the Cambridge Zoological La boratory, a position he left in 1946, when he moved to a lectureship in the his tory and philosophy of science at University College, London. H. G. Andrewa ka and L. C. Birch, in a survey of the history of insect ecology (R. F. Smith, et al. , History of Entomology, 1973), recognise the importance of the works of Crombie (with which they couple the earlier work of Gause) as the principal sti mulus for the great interest taken in interspecific competition in the mid 1940s.

Far from teleological historiography, the pan-European perspective on Early Modern drama offered in this volume provides answers to why, how, where and when the given phenomena of theatre appear in history. Using theories of circulation and other concepts of exchange, transfer and movement, the authors analyze the development and differentiation of European secular and religious drama, within the disciplinary framework of comparative literature and the history of literature and concepts. Within this frame, aspects of major interest are the relationship between tradition and innovation, the status of genre, the proportion of autonomous and heteronomous creational dispositions within the artefacts or genres they belong to, as well as strategies of functionalization in the context of a given part of the cultural net. Contributions cover a broad range of topics, including poetics of Early Modern Drama; political, institutional and social practices; history of themes and motifs (Stoffgeschichte); history of genres/cross-fertilization between genres; textual traditions and distribution of texts; questions of originality and authorship; theories of circulation and net structures in Drama Studies.

"The book combines theory and practice, discussing the theoretical aspects and practical realization of the arrangement of tonal space in terms of their contemporary reception. Brover-Lubovsky's approach is therefore directed toward a study of the musical repertory mapped onto the canvas of contemporary musical thought, including theory, pedagogy, reception, and aesthetics. Tonal Space in the Music of Antonio Vivaldi is a substantial contribution to a better understanding of Vivaldi's individual style, while illuminating wider processes of stylistic development and of the diffusion of artistic ideas in the eighteenth century." --BOOK JACKET.

This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1773 edition. Excerpt: ...must not this noble emulation be wholly extinct in the heart of your Persians, among whom employments and honours are only derived from the caprice of the sovereign? Reputation and virtue are there only considered as imaginary, if not accompanied by the favour of the prince, with which alone they spring up, and die. A man who enjoys the public esteem, is never sure that he shall not be dishonoured the next day. You see him to-day the general of an army; it may be the next the prince makes him his cook, ., and leaves him no other praise to hope for, but' that of having made a good ragout. LETTER XC. Usbaek to the Same, at Smyrna. From this general passion which the French nation have for glory, there is sprung up in the minds of the people, a certain--I know not what, which they call a point of honour: this is properly the character of every profession, but more remarkable in the men of the sword; and among them it is the point of honour by way of excellence. It will be very difficult to me to make thee understand what this is, because we have not a right idea of it. The French, formerly, especially the nobility, followed scarcely any other laws than those of this point of honour: they regulated the whole conduct of their lives; and they were so strict, that they could not, without suffering what was worse than death, I do not say infringe, but not even elude, the least punctilio of them. When they had occasion to settle any difference, they seldom prescribed more than one method to decide it, that was by duel, which cut off all difficulties. But what was the worst part of it, was, that frequently the trial was made between other parties besides those who were interested in the affair. How little soever a person might know another, he

The Years of Alienation in Italy offers an interdisciplinary overview of the socio-political, psychological, philosophical, and cultural meanings that the notion of alienation took on in Italy between the 1960s and the 1970s. It addresses alienation as a social condition of estrangement caused by the capitalist system, a pathological state of the mind and an ontological condition of subjectivity. Contributors to the edited volume explore the pervasive influence this multifarious concept had on literature, cinema, architecture, and photography in Italy. The collection also theoretically reassesses the notion of alienation from a novel perspective, employing Italy as a paradigmatic case study in its pioneering role in the revolution of mental health care and factory work during these two decades.

A History of Architectural Conservation expands knowledge about the conservation of ancient monuments, works of art and historic buildings. It includes the origins of the interest in conservation within the European context, and the development of the concepts from Antiquity and the Renaissance to the present day. Jokilehto illustrates how this development has influenced international collaboration in the protection and conservation of cultural heritage, and how it has formed the principal concepts and approach to conservation and restoration in today's multi-cultural society. This book is based on archival research of original documents and the study of key restoration examples in countries that have influenced the international conservation movement. Accessible and of great interest to students and the general public it includes conservation trends in Europe, the USA, India, Iran and Japan.

For centuries, Jews have been accused of something called "blood libel" or "ritual murder": the killing of non-Jews, often children, to use their blood in bizarre religious ceremonies or to make food. For centuries, this has been denied by Jews. But in fact there may be some truth to such claims after all.

The volume assesses performative structures within a variety of medieval forms of textuality, from vernacular literature to records of

parliamentary proceedings, from prayer books to musical composition. Three issues are central to the volume: the role of ritual speech acts; the way in which authorship can be seen as created within medieval texts rather than as a given category; finally, phenomena of voice, created and situated between citation and repetition, especially in forms which appropriate and transform literary tradition. The volume encompasses articles by historians and musicologists as well as literary scholars. It spans European literature from the West (French, German, Italian) to the East (Church Slavonic), vernacular and Latin; it contrasts modes of liturgical meditation in the Western and Eastern Church with secular plays and songs, and it brings together studies on the character of 'voice' in major medieval authors such as Dante with examples of Dante-reception in the early twentieth century.
