## Publishing Translations in Fascist Italy CUP Archive

In the 1930s translation became a key issue in the cultural politics of the Fascist regime due to the fact that Italy was publishing more translations than any other country in the world. Making use of extensive archival research, the author of this new study examines this 'invasion of translations' through a

detailed statistical analysis of the translation market.

The book shows how translations appeared to challenge official claims about the birth of a Fascist culture and cast Italy in a receptive role that did not tally with Fascist notions of a dominant culture extending its influence abroad. The author shows further that the commercial impact of this invasion provoked a sustained reaction against translated popular literature on the part of those writers and intellectuals who felt threatened by its success. He examines the aggressive campaign that was conducted against the Italian Publishers Federation by the Authors and Writers Union (led by the Futurist poet F. T. Marinetti), accusing them of favouring their private profit over the national interest. Finally, the author traces the evolution of Fascist censorship, showing how the regime developed a gradually more

repressive policy towards translations as notions of cultural purity began to influence the perception of imported literature.

"Carradori's book of instructions is vital

to understanding the art and craft of sculpting as they were practiced before the twentieth century, since little substantial material exists that demonstrates, in an informed, didactic manner, the various tools and techniques used by ancient sculptors. Carradori's work is the most comprehensive and instructive; it includes thirteen articles that explain how to restore marble sculpture, model clay, work with stucco and wax, cast and finish bronze, and how to carve and enlarge models into marble and stone, as well as seventeen tables that illustrate the arrangement, methods, and tools used in each of these processes. The book also includes the complete Italian text."--Jacket.

An award-winning scientist offers his unorthodox approach to childrearing:

"Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You

on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same

Smart Sensor for Autonomous Noise Monitoring (SSAM) Frontiers Media SA

This project involved the development of a cost-effective sensor for long-range wireless, autonomous traffic noise monitoring. The device is called the Smart Sensor For Autonomous noise Monitoring (SSAM). The SSAM system developed under this project includes ten prototype sensors that measure and report noise levels periodically (e.g., once per minute) to a prototype base station that may be located up to 1.2 miles away. The data reported by SSAM includes flat-weighted and A-weighted sound pressure levels as well as octave band measurements over the frequency range of 22 to 5657 Hz. The system performance is similar to a Type 1 microphone as demonstrated in laboratory calibration tests reported here. The SSAM system developed in this project has been used to measure highway noise barrier insertion loss. The low-cost design of SSAM as well as the ability to perform autonomous measurements provides a new cost-effective approach to noise monitoring.

Though Bartolomeo Scala has long intrigued historians, he is a figure whose importance has only recently been appreciated. In Alison Brown's biography Scala emerges as a man of more ability and character than anyone has imagined him to be. We begin to understand why he was employed as chancellor for the almost unrivaled period of thirty-two years. Ms. Brown's study is not only the first extensive treatment of Scala's life but also a significant contribution to our knowledge of Italian Renaissance history and of the contrast between theory and practice in Medicean government. This book constitutes the refereed proceedings of the 18th European Symposium on Computer Security, ESORICS 2013, held in Egham, UK, in September 2013.

The 43 papers included in the book were carefully reviewed and selected from 242 papers. The aim of ESORICS is to further the progress of research in computer security by establishing a European forum for bringing together researchers in this area, by promoting the exchange of ideas with system developers and by encouraging links with researchers in related areas. The papers cover all topics related to security, privacy and trust in computer systems and networks.

When Donald Macleod, a scion of the mobile phone industry, suspects that subliminal messages transmitted over a German mobile phone network are impacting local by-elections in favour of the Neo-Nazi candidates, he sets out to find proof. To do so, he must confront Heinrich Von Scheer, owner of the German network. But before he can, Donald's plane crashes in the Swiss Alps and he is missing, presumed killed. His son, Jack, suspects Von Scheer, and determines to expose him. But Jack soon finds himself the subject of a Europe-wide manhunt, pursued by the Neo-Nazis as well as the authorities. Desperate and on the run, Jack seeks the help of his friend, Harry Donovan, and Fabiana Santini, an Interpol inspector who risks everything for this case - and for love. As the murder mystery deepens, Jack enlists more assistance in the form of a Swedish professor, a reformed Dutch smuggler, an embittered French telecommunications executive and a mysterious protector. Before he is hunted

This is the first edition ever of the Queen's correspondence in Italian. These letters cast a new light on her talents as a linguist and provide interesting details as to her political agenda, and on the cultural milieu of her court. This book provides a fresh analysis of the surviving evidence concerning Elizabeth's learning and use of Italian, and of the activity of the members of her 'Foreign Office.' All of the documents transcribed here are accompanied by a short introduction focusing on their content and context, a brief description of their transmission history, and an English translation.
