Object Pascal developers worldwide for creating cool apps across devices. RAD Server Turn-key application server that provides a robust "out of the box" back-end platform on which to build and deploy Delphi and C++Builder application services.

### Delphi Programming

When we write a database application in Delphi, we need to use some database engine to access a data in a database.

The database engine permits you to concentrate on what data you want to access, instead of how to access it.

From the first version, Delphi provides database developers with the BDE (Borland Database Engine).
