## The Art of X2 Kinfolk

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. BlackwellAssistant Secretary for Maritime Affairs

When a bad day at work culminates in losing out on a promotion, Jim Sanders shifts into his animal form to let off steam. Then his bad day turns into a bad night-while prowling his Atlantic City neighborhood as a large gray house cat, he's caught in a torrential downpour. What little luck he has washes down the gutter when his new boss, Andrew Wright, catches him taking shelter on his porch, brings him inside, and starts calling him Mr. Frosty. As a feline, Jim becomes the inadvertent confessor for his boss's lonely son, Tony, a victim of schoolyard bullying. As a human, he feels drawn to Andrew, a man he wanted to resent. Finding love was never part of Jim's plan for the future-not with his bizarre secret-yet suddenly he finds himself navigating that minefield anyway. But not everything is easy, especially for an interracial gay couple dealing with prejudice in the workplace, at Tony's school, and even within their own families.

This text emphasizes the simplicity of the dimensional analysis method to help even those students with math anxiety minimize or eliminate medication calculation errors. It begins with a comprehensive review of general math skills

and an explanation of basic dimensional analysis methodology. The book focuses on the analysis and setup of practice problems, formulation of a reasonable answer, and evaluation of the answer. This one-of-a-kind text is designed for nursing students at all levels, including graduate nurses and practicing nurses who want a refresher. It is an appropriate text selection for agency in-service programs as well as for physician assistant medication math courses. A companion CD-ROM packaged with the text offers additional practice problems. A self-assessment test precedes the comprehensive math review in Chapter 1, promoting a strong math foundation. Chapter 2 introduces the dimensional analysis method and includes several basic practice problems, facilitating consistent application of the method throughout the text. The analysis and setup of practice problems increases comprehension, reduces errors, and complements use of the dimensional analysis method. To help reduce medication errors, the text follows JCAHO and ISMP recommendations regarding avoidance of ambiguous abbreviations, acronyms, and symbols. Each chapter begins with a quick overview of chapter contents to orient students as they prepare to read and study the material. The text's full-color design includes a special margin section in which students can work out practice problems on the spot. Rapid Practice exercises follow each main concept, allowing students to review even when their study time is limited or frequently interrupted. Test Tips enhance comprehension and improve students' test-taking skills and comfort level. Selected Mnemonics are supplied to facilitate memorization and conserve learning time. Red Arrow Alerts call attention to critical math concepts and patient-safety theory as well as to key nursing practice issues. FAQs and Answers are derived from students' actual classroom questions. They are particularly helpful to students who are studying outside of a traditional classroom environment. Ask Yourself questions help students comprehend and synthesize content. Communication boxes, which present sample nurse-patient and nurse-prescriber dialogues, illustrate clinical applications of medication administration. Cultural boxes describe selected math-notation and medication-related cultural practices. Clinical Relevance boxes show how abstract concepts, such as legal issues, apply to everyday clinical practice. Website addresses and other useful references are provided where applicable. Two chapter finals are included at the end of each chapter, one

multiple-choice format and one traditional format, with answers provided in the back of the book. Two comprehensive finals, one using an NCLEX examination-style multiple-choice format and one following a traditional format, test the major concepts covered in the text and offer an opportunity for additional practice. An answer key in the back of the book contains step-by-step solutions to the Rapid Practice exercises, chapter finals, and comprehensive text finals, allowing the student to pinpoint specific areas for further review.

Two of America's most popular authorities on healthy eating and cooking join forces in this inspiring, easy-to-use cookbook. This is not a diet book. It is a lively guide to healthy cooking, day-by-day, packed with essential information and, above all, filled with enticing food. Andrew Weil, M.D.—author of the best-selling Eating Well for Optimum Health—brings to this perfect collaboration a comprehensive philosophy of nutrition grounded in science. Rosie Daley—acclaimed for her best-seller, In the Kitchen with Rosie—brings to it her innovative and highly flavorful spa cuisine. The recipes are eclectic, drawing from the healthy and delicious cooking of the Middle East, the Mediterranean, and Asia, among other cuisines. For starters, you might try Grilled Satay or a Miso Pâté; for soup, often a meal in itself, a hearty Mixed-Bean Minestrone Stew or a Roasted Winter Squash and Apple Soup with Cilantro Walnut Pesto; a special entrée could be the Savory Roasted Cornish Hens with Roasted Garlic or Baked Spicy Tofu with Bean Thread Noodles, Corn,

and Mango; for a simple supper, Turkey Burgers or Portobello Burgers; and for the occasional indulgence, a dessert of Almond Fruit Tart or Peach and Blueberry Cobbler. Andy and Rosie do not always agree. When Rosie calls for chicken, Andy offers a tofu alternative; she likes the flavor of coconut milk, whereas he prefers ground nut milk; when she makes a pastry with butter, he suggests using Spectrum Spread. There are no hard-and-fast rules. Lifelong health begins in the kitchen, so this is a lifestyle book as well as a cookbook. In it you will learn from Dr. Weil:

- how to make use of nutritional information in everyday cooking
- what is organic . . . and how to buy organic foods
- the importance of reading labels and what to look for
- sensible advice about eggs, milk, cheese, salt, spicy foods, wine, coffee
- the facts about sugar and artificial sweeteners . . . and from Rosie:
- how to get kids involved—from skinning almonds to layering lasagna
- ways to have fun in the kitchen—creating scallion firecrackers and radish rosettes
- low-fat and nondairy alternatives for those with special concerns
- smart menu planning—letting the seasons be your guide . . . and lots more.

This revolutionary book will change forever the way you cook for yourself and your family. With 58 photographs in full color.

Empire of the Air tells the story of three American visionaries—Lee de Forest, Edwin Howard Armstrong, and David Sarnoff—whose imagination and dreams turned a hobbyist's toy into radio, launching the modern communications age. Tom Lewis weaves the story of these men and their achievements into a richly detailed and moving narrative that spans the first half of the twentieth century, a time when the American romance with science and technology was at its peak. Empire of the Air is a tale of pioneers on the frontier of a new technology, of American entrepreneurial spirit, and of the tragic collision between inventor and corporation.
