Sound & Vision Rockport Publishers Argues that Indigenous hip hop is the latest and newest assertion of Indigenous sovereignty throughout Indigenous North America. Expressive culture has always been an important part of the social, political, and economic lives of Indigenous people. More recently, Indigenous people have blended expressive cultures with hip hop culture, creating new sounds, aesthetics, movements, and ways of being Indigenous. This book documents recent developments among the Indigenous hip

hop generation. Meeting at the nexus of hip of authenticity” by creating art that is not hop studies, Indigenous studies, and critical ethnic studies, Hip Hop Beats, Indigenous Rhymes argues that Indigenous people use hip hop culture to assert their sovereignty and challenge settler colonialism. From rapping about land and water rights from Flint to Standing Rock, to remixing “traditional” beading with hip hop aesthetics, Indigenous people are using hip hop to challenge their ongoing dispossession, disrupt racist stereotypes and images of Indigenous people, contest white supremacy and heteropatriarchy, and reconstruct ideas of a progressive masculinity. In addition, this book carefully traces the idea of authenticity; that is, the common notion that, by engaging in a Black culture, Indigenous people are losing their “traditions.” Indigenous hip hop artists navigate the muddy waters of the “politics bound by narrow conceptions of what it means to be Indigenous; instead, they flip the notion of “tradition” and create alternative visions of what being Indigenous means today, and what that might look like going forward. “This book is incredibly important and will change the fields of Native American, African American, gender, and sound studies. It is the first full-length monograph on the rich, diverse, and complex field of Indigenous hip hop. This is the text against which all other studies in the field will be compared.” — Michelle Raheja, University of California, Riverside Taronga Porpoise Publishing Empire of the Air tells the story of three American visionaries—Lee de Forest, Edwin Howard Armstrong, and David Sarnoff—whose imagination and dreams

Great Age Guide to Gadgets and Gizmos Penguin Group Australia

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later

revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. For over a century, Richard Wagner's music has been the subject of intense debate among philosophers, many of whom have attacked its ideological-some say racist and reactionary-underpinnings. In this major new work, Alain Badiou, radical philosopher and keen Wagner enthusiast, offers a detailed reading of the critical responses to the composer's work, which include Adorno's writings on the composer and Wagner's recuperation by Nazism as well as more recent readings

by Philippe Lacoue-Labarthe and others. Slavoj Zizek provides an afterword, and both philosophers make a passionate case for re-examining the relevance of Wagner to the contemporary world.
