1983 Oldsmobile Service Manual - Cutlass, Delta 88, 98, Toronado McFarland

The automotive industry underwent great change in the 1960s and the early 1970s. The continuing trend toward market consolidation, the proliferation of sizes and nameplates, and the “need for speed” characterized this period, loosely labeled as the muscle car era. This is an exhaustive reference work to American made cars of model years 1960–1972. Organized by year (and summarizing the market annually), it provides a yearly update on each make’s status and production figures, then

details all models offered for that year. Model listings include available body styles, base prices, engine and transmission choices, power ratings, standard equipment, major options and their prices, curb weight and dimensions (interior and exterior), paint color choices, changes from the previous year’s model, and sales figures. Also given are assembly plant locations and historical overviews of each model nameplate. The book is profusely illustrated with 1,018 photographs.

Popular Mechanics Author House

* Expanded and revised in light of the GNU Compiler Collection (GCC) 4 release in April 2005, this book offers detailed coverage of GCC's somewhat daunting array of options and features and includes several chapters devoted to its support for languages like C, C++, Java, Objective-C, and Fortran. *

Though targeting beginner and intermediate developers, this book goes well beyond basic compiler usage, combining instruction of GCC's advanced features and utilities (authconf, libtool, and gprof) with key coding techniques, such as profiling and optimization to show how to build and manage enterprise-level applications. * This is an enormous market. GCC is the defacto compiler collection for hundreds of thousands of open source projects worldwide, a wide variety of commercial development projects, and is the standard compiler for academic programs.

As our good friend, Retz, often says, "Life just keeps comin' at ya." This book is all about life with its fickle little twists and turns. We (the authors) met playing volleyball and grew to be best friends, business associates, and hunting partners. In our 30+ years of friendship we have played, laughed, loved, cried, and grieved together. Set against the backdrop of Northern Wisconsin,

the stories in this book were not written specifically to go into a book. This book "just kind of happened" because of our love not only of writing but of the people, places, and events that shaped our lives; it happened because of our passion for the outdoors, its lessons, beauty, and bounty. Light a fire, grab a libation, put your feet up and share a bit of life with us.
