Our work life is filled with emotions. How we feel on the job, what we say we feel, and what feelings we display—all these are important aspects of organizational behavior and workplace culture. Rather than focusing on the psychology of personal emotions at work, however, this study concentrates on emotions as role requirements, on workplace emotions that combine the private with the public, the personal with the social, and the authentic with

the masked. In this cross-cultural study of "emotion management," the author argues that even though the goals of normative control in factories, offices, and shops may be similar across cultures, organizational structure and the surrounding culture affect how that control is discussed and conceived.

In 1996 over 16 million people visited Tokyo Disneyland, making it the most popular of the many theme parks in Japan. Since it opened in 1983, Tokyo Disneyland has been analyzed mainly as an example of the globalization of the American leisure industry and its organizational culture, particularly the "company manual." By looking at how Tokyo Disneyland is experienced by employees, management, and visitors, Aviad Raz shows that it is much more an example of successful importation, adaptation, and domestication and that it has succeeded precisely because it has become Japanese even while marketing itself as foreign. Rather than being an agent of Americanization, Tokyo Disneyland is a simulated "America" showcased by and for the Japanese. It is an "America" with a Japanese meaning.

In the years after World War II, the airline stewardess became one of the most

---

celebrated symbols of American womanhood. Stewardesses appeared on magazine covers, on lecture circuits, and in ad campaigns for everything from milk to cigarettes. Airlines enlisted them to pose for publicity shots, mingle with international dignitaries, and even serve (in sequined minidresses) as the official hostesses at Richard Nixon's inaugural ball. Embodying mainstream America's perfect woman, the stewardess was an ambassador of femininity and the American way both at home and abroad. Young, beautiful, unmarried, intelligent, charming, and nurturing, she inspired young girls everywhere to set their sights on the sky. In *The Jet Sex*, Victoria Vantoch explores in rich detail how multiple forces—business strategy, advertising, race, sexuality, and Cold War politics—cultivated an image of the stewardess that reflected America's vision of itself, from the wholesome girl-next-door of the 1940s to the cosmopolitan glamour girl of the Jet Age to the sexy playmate of the 1960s. Though airlines marketed her as the consummate hostess—an expert at pampering her mostly male passengers, while mixing martinis and allaying their fears of flying—she bridged the gap between the idealized 1950s housewife and the emerging "working woman." On the international stage, this select cadre of women served as ambassadors of their nation in the propaganda clashes of the Cold War. The stylish Pucci-clad American stewardess represented the United States as middle class and consumer oriented—hallmarks of capitalism's success and a stark contrast to her counterpart at Aeroflot, the Soviet national airline. As the apotheosis of

---

feminine charm and American careerism, the stewardess subtly bucked traditional gender roles and paved the way for the women's movement. Drawing on industry archives and hundreds of interviews, this vibrant cultural history offers a fresh perspective on the sweeping changes in twentieth-century American life.

In this concise introduction, Chad Kautzer demonstrates the shared emancipatory goals and methods of several radical philosophies, from Marxism and feminism to critical race and queer theory. *Radical Philosophy* examines the relations of theory and practice, knowledge and power, as well as the function of law in creating extralegal forms of domination. Through a critical engagement with the history of philosophy, Kautzer

reconstructs important counter-traditions of historical, dialectical, and reflexive forms of critique relevant to contemporary social struggles. The result is an innovative, systematic guide to radical theory and critical resistance.

With a new introduction. One of Flavorwire's 25 Greatest Essay Collections of All Time. Meghan Daum is one of the most celebrated nonfiction writers of her generation, widely recognised for her fresh, provocative approach with which she unearths the hidden fault lines in the American landscape. From her well remembered New Yorker essays about the financial demands of big-city ambition and the ethereal, strangely old-fashioned allure of cyber-relationships to her dazzlingly hilarious riff in Harper's about musical passions that give way to middle-brow paraphernalia, Daum delves into the centre of things while closely examining the detritus that spills out along the way. With precision and well-balanced irony, Daum implicates

herself as readily as she does the targets that fascinate and horrify her.

*The Cultural Study of Work*

This book reviews, integrates, and synthesizes research on emotional labor and emotion regulation conducted over the past 30 years. The concept of emotional labor was first proposed by Dr. Arlie Russell Hochschild (1983), who defined it as "the management of feeling to create a publicly observable facial and bodily display" (p. 7) for a wage. A basic assumption of emotional labor theory is that many jobs

(e.g., customer service, healthcare, team-based work, management) have interpersonal, and thus emotional, requirements and that well-being and effectiveness in these jobs is determined, in part, by a person's ability to meet these requirements. Since Hochschild's initial work, psychologists, sociologists, and management scholars have developed distinct theoretical approaches aimed at expanding and elaborating upon Hochschild's core ideas. Broadly speaking, emotional labor is the study of how emotion regulation of oneself and others influences social dynamics at work, which has implications for performance and well being in a wide range of occupations and organizational contexts. This book offers researchers and practitioners a review of emotional labor theory and research that integrates the

---

various perspectives into a coherent framework, and proposes an agenda for future research on this increasingly relevant and important topic. The book is divided into 5 main sections, with the first section introducing and defining emotional labor as well as creating a framework for the rest of the book to follow. The second section consists of chapters describing emotional labor theory at different levels of analysis, including the event, person, dyad, and group. The third section illustrates the diversity of emotional labor in distinct occupational contexts: customer service (e.g. restaurant, retail), call centers, and caring work. The fourth section considers broader contextual influences – organizational-, societal-, and cultural-level factors – that modify how and when emotional labor is done. The final section presents a series

of ‘reflective essays’ from eminent scholars in the area of emotion and emotion regulation, where they reflect upon the past, present and future of emotion regulation at work.

On June 1, 1999, at 2350:44 central daylight time, American Airlines flight 1420, a McDonnell Douglas DC-9-82, crashed after it overran the end of runway 4R during landing at Little Rock National Airport in Little Rock, Arkansas. The flight originated from Dallas/Fort Worth International Airport, Texas. There were 145 persons on board. The airplane was destroyed by impact

forces and a postcrash fire. The captain and 10 passengers were killed; 120 crewmembers and passengers received serious or minor injuries; and 24 passengers were not injured. The National Transportation Safety Board determines that the probable causes were the flight crew's failure to discontinue the approach when severe thunderstorms.

Happiness is big business. Books, consultants, psychologists, organizations, and even governments tout happiness secrets that are backed by scientific findings. The problem is that all of this science is done by and for cis white men. And some of the most vocal of these happiness experts were announcing that women could become happier by espousing "traditional" values and eschewing feminism. Skeptical of this hypothesis, Ariel Gore took a deep dive into the optimism industrial complex, reading the history, combing the research, attending the conferences, interviewing the thought leaders, and exploring her own and her friends' personal experiences and desires. *Fuck Happiness* is a nuanced, thoughtful examination of what happiness means and to whom, how it's played a role in defining
