Platforms that

allow businesses to centrally acquire and manage their logistics services disrupt an industry that has been relationship-based for centuries. The authors discuss smart contracts, which are one of the most exciting applications of Blockchain, Software as a Service (SaaS) offerings for freight procurement, where numerous data sources can be integrated and decision-making processes automated, and marine terminal operating systems as an integral node for shipments.

In *The Digital Transformation of Logistics: Demystifying Impacts of the Fourth Industrial Revolution*, insights are shared into the cold chain industry where companies respond to increasing quality demands, and how European governments are innovatively responding to challenges of cross-border eCommerce. Research shows that five strategies correlate with the successful completion of a dissertation: Establishing a consistent writing routine Working with a support group Consulting your advisor Understanding your committee's expectations Setting a realistic and timely schedule Building on these insights, this book is for

anyone who needs help in preparing for, organizing, planning, scheduling, and writing the longest sustained writing project they have encountered, particularly if he or she is not receiving sufficient guidance about the process, but also for anyone looking to boost his or her writing productivity. The author uncovers much tacit knowledge, provides advice on working with dissertation advisors and committee members, presents proven techniques for the prewriting and writing stages of the

dissertation, sets out a system for keeping on schedule, and advocates enlisting peer support. As Peg Boyle Single states, "my goal is quite simple and straightforward: for you to experience greater efficiency and enjoyment while writing. If you experience anxiety, blocking, impatience, perfectionism or procrastination when you write, then this system is for you. I want you to be able to complete your writing so that you can move on with the rest of your life." Few scholars, let alone graduate

students, have been taught habits of writing fluency and productivity. The writing skills imparted by this book will not only help the reader through the dissertation writing process, but will serve her or him in whatever career she or he embarks on, given the paramount importance of written communication, especially in the academy. This book presents a system of straightforward and proven techniques that are used by productive writers, and applies them to the

dissertation process. In particular, it promotes the concept of writing networks - whether writing partners or groups - to ensure that writing does not become an isolated and tortured process, while not hiding the need for persistence and sustained effort. This book is intended for graduate students and their advisers in the social sciences, the humanities, and professional fields. It can further serve as a textbook for either informal writing groups led by students or for formal writing seminars

offered by departments or graduate colleges. The techniques described will help new faculty advise their students more effectively and even achieve greater fluency in their own writing. A Manual for Writers of Term Papers, Theses, and Dissertations Prentice Hall The first comprehensive history of the Obama administration's evidence-based initiatives. From its earliest days, the

Obama administration planned and enacted several initiatives to fund social programs based on rigorous evidence of success. Ron Haskins and Greg Margolis tell the story of six—spanning preschool and K-12 education, teen pregnancy, employment and training, health, and community-based programs. Readers will appreciate the fast-moving descriptions of the politics and policy

debates that shaped these federal programs and the analysis of whether they will truly reshape federal social policy and greatly improve its impacts on the nation's social problems. Based on interviews with 134 individuals (including advocates, officials at the Office of Management and Budget and the Domestic Policy Council, Congressional staff, and officials in the

federal agencies administering the initiatives) as well as Congressional and administration documents and news accounts, the authors examine each of the six initiatives in separate chapters. The story of each initiative includes a review of the social problem the initiative addresses; the genesis and enactment of the legislation that authorized the initiative; and the development of

the procedures used by the administration to set the evidence standard and evaluation requirements—including the requirements for grant applications and awarding of grants.

In *Integrative Spirituality*, Patrick J. Mahaffey elucidates spirituality as a developmental process that is enhanced by integrating the teachings and practices of multiple religious traditions, Jungian depth psychology, and contemplative yoga. In the postmodern world of religious pluralism, Mahaffey compellingly argues that each of us must fashion a unique

path to wholeness which integrates aspects of life and of the self that have become disconnected and disowned. Integrative Spirituality uniquely conjoins four components: exemplary religious pluralists from three traditions, individuation, the forms of contemplative Hindu yoga that have been successfully transmitted to the West, and a presentation of two models for

integrating psychological growth and spiritual awakening. The book presents pioneering practitioners in each field who exemplify how we may fashion our own approach to integrating both spiritual awakening and psychological development and delineates an array of spiritual practices that integrate the somatic, psychological, interpersonal, and spiritual aspects of life.

Ultimately, Mahaffey contends that integrative spirituality is a mode of being that fully embraces the divinity inherent in each of us and in the world. *Integrative Spirituality* will be essential reading for academics and students of Jungian and post-Jungian studies, transpersonal and Jungian psychology, and religious studies and contemplative education. It will also be of interest to analytical

and depth psychologists in practice and in training, and to anyone seeking a greater understanding of spirituality, psychological growth, religious traditions, individuation, and contemplative yoga. *Customer Loyalty and Brand Management* Springer Science & Business Media *Essentials of Academic Writing* is an essay-level book focused exclusively on writing academic papers. It is organized around three

principles: a thorough focus on the fundamentals of writing academic papers; a cross-disciplinary approach to writing that emphasizes the importance of writing skills beyond the English course; and a focus on reading skills as the underlying foundation of a good critical thinker. One of the hallmarks of this book is the use of a single sample student essay, from start to finish, as an annotated example of the process used by a developing writer. From the brainstorming diagram in the first chapter to the final draft at the end of Part One, students are

given a strong, consistent model to emulate.

This book deals with the relevance of recognition and validation of non-formal and informal learning

education and training, the workplace and society. In an increasing number of countries, it is at the top of the policy and research agenda ranking among the possible ways to redress the glaring lack of relevant academic and vocational qualifications and to promote the development of competences and certification procedures which recognise different types of

learning, including formal, non-formal and informal learning. The aim of the book is therefore to present and share experience, expertise and lessons in such a way that enables its effective and immediate use across the full spectrum of country contexts, whether in the developing or developed world. It examines the importance of meeting institutional and political requirements that give

genuine value to the recognition of non-formal and informal learning; it shows why recognition is important and clarifies its usefulness and the role it serves in education, working life and voluntary work; it emphasises the importance of the coordination, interests, motivations, trust and acceptance by all stakeholders. The volume is also premised on an understanding of

a learning society, in which all social and cultural groups, irrespective of gender, race, social class, ethnicity, mental health difficulties are entitled to quality learning throughout their lives. Overall the thrust is to see the importance of recognising non-formal and informal learning as part of the larger movement for re-directing education and training for change. This change is one that

builds on an equitable society and economy and on sustainable development principles and values such as respect for others, respect for difference and diversity, exploration and dialogue.

Loyalty is one of the main assets of a brand. In today ' s markets, achieving and maintaining loyal customers has become an

increasingly complex challenge for brands due to the widespread acceptance and adoption of diverse technologies by which customers communicate with brands. Customers use different channels (physical, web, apps, social media) to seek information about a brand, communicate with it, chat about the brand and purchase its products. Firms are thus continuously changing and adapting their processes to provide customers with agile communication channels and coherent, integrated brand experiences through the different channels in which

customers are present. In this context, understanding how brand management can improve value co-creation and multichannel experience—among other issues—and contribute to improving a brand's portfolio of loyal customers constitutes an area of special interest for academics and marketing professionals. This Special Issue explores new areas of customer loyalty and brand management, providing new insights into the field. Both concepts have evolved over the last decade to encompass such concepts and practices as brand

image, experiences, multichannel context, multimedia platforms and value co-creation, as well as relational variables such as trust, engagement and identification (among others).
