In *The Birth of Energy* Cara New Daggett traces the genealogy of contemporary notions of energy back to the nineteenth-century science of thermodynamics to challenge the underlying logic that informs today's uses of energy. These early resource-based concepts of power first emerged during the Industrial Revolution and were tightly bound to Western capitalist domination and the politics of industrialized work. As Daggett shows, thermodynamics was deployed as an

imperial science to govern fossil fuel use, labor, and colonial expansion, in part through a hierarchical ordering of humans and nonhumans. By systematically excavating the historical connection between energy and work, Daggett argues that only by transforming the politics of work—most notably, the veneration of waged work—will we be able to confront the Anthropocene's energy problem. Substituting one source of energy for another will not ensure a habitable planet; rather, the concepts of energy and work themselves

must be decoupled. *The History of Imperial County, California* Fordham Univ Press
A stellar group of writers, scientists, and educators illuminate the intersections between environmental science, creative writing, and education, considering ways to strengthen communication between differing

fields with common interests. The contributing authors include Ken Brewer, Dan Flores, Hartmut Grassl, Carolyn Tanner Irish, Ted Kerasote, William Kittredge, Ellen Meloy, Louis Owens, Jennifer Price, Robert Michael Pyle, Kent C. Ryden, Annick Smith, Craig B. Stanford,

Susan J. Tweit, and Keith Wilson. *Food at Work* Routledge Fast Favorites Under Pressure by Blue Jean Chef Meredith Laurence is written with the smaller household in mind. These days, so many pressure cooker recipes are written for bigger pressure cookers and designed to serve 6 to 8 people. When you're dealing with pressure-cooking, however, cutting

a large recipe back to feed just 2 to 4 people is not always straight-forward. *Fast Favorites Under Pressure* does all the work for you, with every recipe guaranteed to work in a 4-quart pressure cooker. The recipes also double very easily so if you're cooking in an 8-quart cooker, you'll have no trouble making twice as many "fast favorites." *Fast Favorites Under Pressure* also includes tips and tricks for pressure cooking so you can be

even more successful with your pressure cooker. Blue Jean Chef Meredith Laurence has created more than 100 recipes for the 4-quart Pressure Cooker that are sure to become family favorites, including Chicken Alfredo Rotini, Red Wine Braised Short Ribs, Lime Shrimp with Spicy Tomato Grits, and Mint Chocolate Fudge Cake with Ganache. From soups to pasta, meat to seafood, grains,

vegetarian and dessert, all types of appetites will have choices to get a meal on the table in a fraction of the time.

This accessible
textbook presents a
fascinating review of
cryptography and
cryptanalysis across
history. The text
relates the earliest use
of the monoalphabetic
cipher in the ancient
world, the
development of the
“ unbreakable ”
Vigen è re cipher, and
an account of how
cryptology entered the
arsenal of military

intelligence during the American Revolutionary War. Moving on to the American Civil War, the book explains how the Union solved the Vigen è re ciphers used by the Confederates, before investigating the development of cipher machines throughout World War I and II. This is then followed by an exploration of cryptology in the computer age, from public-key cryptography and web security, to criminal cyber-attacks and cyber-warfare. Looking to the future, the role of cryptography in the Internet of Things is also discussed, along with the potential impact of quantum computing. Topics and features: presents a history of cryptology

from ancient Rome to the present day, with a focus on cryptology in the 20th and 21st centuries; reviews the different types of cryptographic algorithms used to create secret messages, and the various methods for breaking such secret messages; provides engaging examples throughout the book illustrating the use of cryptographic algorithms in different historical periods; describes the notable contributions to cryptology of Herbert Yardley, William and Elizebeth Smith Friedman, Lester Hill, Agnes Meyer Driscoll, and Claude Shannon; concludes with a review of tantalizing unsolved mysteries in cryptology, such as the Voynich Manuscript, the Beale Ciphers, and

the Kryptos sculpture. This engaging work is ideal as both a primary text for courses on the history of cryptology, and as a supplementary text for advanced undergraduate courses on computer security. No prior background in mathematics is assumed, beyond what would be encountered in an introductory course on discrete mathematics. **Trans-Himalaya BoD – Books on Demand** When the United States declared war on Germany in April 1917, it was woefully unprepared to wage a modern war. Whereas their European counterparts already had three

years of experience in using code and cipher systems in the war, American cryptologists had to help in the building of a military intelligence unit from scratch. This book relates the personal experiences of one such character, providing a uniquely American perspective on the Great War. It is a story of spies, coded letters, plots to blow up ships and munitions plants, secret inks, arms smuggling, treason, and desperate battlefield messages. Yet it all begins with a college English

professor and Chaucer scholar named John Mathews Manly. In 1927, John Manly wrote a series of articles on his service in the Code and Cipher Section (MI-8) of the U.S. Army 's Military Intelligence Division (MID) during World War I. Published here for the first time, enhanced with references and annotations for additional context, these articles form the basis of an exciting exploration of American military intelligence and counter-espionage in 1917-1918.

Illustrating the thoughts of prisoners of war, draftees, German spies, and ordinary Americans with secrets to hide, the messages deciphered by Manly provide a fascinating insight into the state of mind of a nation at war.

After the War: A Southern Tour
International Labour Organization
This book is a study of the Basque variety spoken in Lekeitio (Vizcaya). As such we have intended to make a direct contribution to Basque dialectology, aiming at setting certain standards for research in this area. In addition, we believe

that some of the materials assembled in this work will be of interest to a larger audience beyond Basque specialists. It is for this reason that we decided to write the present book in English. In our opinion, certain linguistic aspects are treated in more detail here than in any previous work on any other Basque variety. A case in point would be accentuation, both at the lexical level and in its relation to the syntactic process of focalization.

Now available for the first time—more than 50 years after it was written—is the memoir of Michael Dillon/Lobzang Jivaka (1915 – 62),

the British doctor and Buddhist monastic novice chiefly known to scholars of sex, gender, and sexuality for his pioneering transition from female to male between 1939 and 1949, and for his groundbreaking 1946 book *Self: A Study in Ethics and Endocrinology*. Here at last is Dillon/Jivaka's extraordinary life story told in his own words. Out of the Ordinary captures Dillon/Jivaka's various journeys—to Oxford, into medicine, across the world by ship—within the major narratives of his gender and religious journeys. Moving

chronologically, Dillon/Jivaka begins with his childhood in Folkestone, England, where he was raised by his spinster aunts, and tells of his days at Oxford immersed in theology, classics, and rowing. He recounts his hormonal transition while working as an auto mechanic and fire watcher during World War II and his surgical transition under Sir Harold Gillies while Dillon himself attended medical school. He details his worldwide travel as a ship's surgeon in the British Merchant Navy with extensive commentary on his interactions with colonial and postcolonial subjects,

followed by his “outing” by the British press while he was serving aboard *The City of Bath*. Out of the Ordinary is not only a salient record of an early sex transition but also a unique account of religious conversion in the mid – twentieth century. Dillon/Jivaka chronicles his gradual shift from Anglican Christianity to the esoteric spiritual systems of George Gurdjieff and Peter Ouspensky to Theravada and finally Mahayana Buddhism. He concludes his memoir with the contested circumstances of his Buddhist monastic

ordination in India and Tibet. Ultimately, while Dillon/Jivaka died before becoming a monk, his novice ordination was significant: It made him the first white European man to be ordained in the Tibetan Buddhist tradition. Out of the Ordinary is a landmark publication that sets free a distinct voice from the history of the transgender movement. *Art and Artists of Indiana* Legare Street Press
A classic work, *Munitions of the mind* traces how propaganda has formed part of the fabric of conflict since the dawn of warfare, and how in its

broadest definition it has also been part of a process of persuasion at the heart of human communication. Stone monuments, coins, broadsheets, paintings and pamphlets, posters, radio, film, television, computers and satellite communications - throughout history, propaganda has had access to ever more complex and versatile media. This third edition has been revised and expanded to include a new preface, new chapters on the 1991 Gulf War, information age conflict in the post-Cold War era, and the world after the terrorist attacks of September 11. It also offers a new epilogue and a comprehensive bibliographical essay. The extraordinary range of this book, as

well as the original and cohesive analysis it offers, make it an ideal text for all international courses covering media and communications studies, cultural history, military history and politics. It will also prove fascinating and accessible to the general reader.

Nutritionist Sarah Flower has been a big fan of the Halogen Oven

since its launch and uses her own every day to cook for her family. Following her bestselling *The Everyday Halogen Oven Cookbook*, she shows you how versatile your

Halogen Oven can be and how you can use it to bake bread, cupcakes, cakes, pastries, biscuits, puddings and savouries.

Whether you're baking for coffee breaks, tea time, picnics, or any family occasion you'll find nearly 150 savoury and sweet treats in this book, including many of your favourites - plus lots of new baking ideas. This is a book of indulgence, baking and yumminess - grab your pinny and get cooking!

AUTHOR BIOG: Sarah Flower is a nutritionist,

journalist and author of *Live More, Spend Less; Eat Well, Spend Less; Slow Cook, Fast Food and The Everyday Halogen Oven Cookbook*.

CONTENTS:

Introduction 1.

Using Your Halogen Oven 2.

Top Baking Tips 3.

Tasty Savouries 4.

The Bakery - Bread and More... 5.

Cupcakes, Muffins and Fairy Dust 6.

Sugar, Spice and All

Things Nice - Great Cakes and Fancies

7. The Coffee Break - Dunkable Biscuits

and Treats 8. Tart it Up and Roll It Out

9. The Big Finish - Delightful Desserts
