While books on semiconductor TiO₂ photocatalysis are legion, nanostructured controlled photocatalysts are attractive beyond standard semiconductors, and this book is devoted to the many novel uses of advanced TiO₂ and MOF-based photocatalysts. Details on synthesis, characterization, and reaction applications of nanostructured photocatalysts are summarized. Other new materials discussed in this book are Bi- W- oxides, metal complexes, and unique porous materials. This book contains methods of preparation and characterization of unique nanostructured photocatalysts, and details about their catalytic action. Contributors to this volume are leading Asian researchers in Photocatalysis. It will appeal to researchers wishing to know how to design new types of photocatalysts with controlled nanostructures.

Reviews the theory, materials, and processes used in the lithographic process by which circuit elements are fabricated (it is these elements' decreasing size that has made possible the miniaturization of electronic devices). After a brief historical introduction, four major topics are discussed: the physics of the lithographic process, organic resist materials, resist processing, and plasma etching. The new edition reflects the many changes that have occurred since the 1983 publication of this tutorial/reference. Annotation copyright by Book News, Inc., Portland, OR

Despite their box-office success, Tom Stoppard's plays have sometimes aroused academic hostility, his critics accusing Stoppard of cold intellectualism or frivolous showmanship. The purpose of this study is to examine the special problem of Stoppard's use of humor and games in conveying serious ideas. As an actor and director, Anthony Jenkins is concerned not just with the literary merit of Stoppard's plays, but also with the way they are written and shaped by the formal conventions particular to the media of stage, radio, and television. This book studies the stage space of each play as well as the actor's pauses and inner emotions. As a lecturer on drama, Jenkins follows Stoppard's career chronologically so that the radio and television plays are woven in with, and support various claims concerning, the major stage works. Unlike similar critical analyses of Stoppard's theater, this volume discusses all the latest plays, including *The Real Thing*, *The Dog It Was That Died*, and *Squaring the Circle*.

Does This Feel Familiar? Paper Chase

Myth and mysticism have reigned supreme in Rgvedic interpretation for more than two millennia and a half. Even now, it cannot be said to be free of these. This study aims at completing the process of rational inquiry in Rgveda begun two centuries ago. It leaves behind myths and mystic experiences, simultaneously drawing the line between fact and fancy, which has eluded the scholars. Two types of evidence - literary and archaeological - have been used. Literary evidence ranges from Rgveda to the Brahmanas. The Archaeological material covers pre-Harappan , Harappan and post-Harappan levels. Through the interdisciplinary approach consisting of linguistic, anthropological and symbolical analysis of the material, the study emphasizes a consistently rational attitude to the study of Rgveda. In fact, as the study amply demonstrates, the fresh air of reason may change our understanding of Rgveda and also of ancient Indian history. Rgvedic hymns from this viewpoint may probably prove to be a valuable source of information of the historical events, which led to the downfall of the pre-Aryan Indus civilization. This is correlated to the archaeological material available on the Harappan sites. This is the first investigation of its kind and the conclusions of the study are no less original. Besides establishing the rationality of the Rgvedic narratives, it shows the events and their agents to be historical in the light of available archaeological material. The theory and the approach hold out a promise and may transform our understanding of these ancient compositions from myth to history.

Richard Morgan can't believe his father is considering a rival candy company's offer to buy out the family business that he loves. Though the confections division is tiny compared to the family's other ventures, it's close to his heart. Maybe too close, since the thought of losing it feels like losing his mother all over again. Convinced it's the best way to continue the Morgan legacy, his father offers Richard control of the company if he'll secure the family name with a marriage. After a messy, public divorce, marriage is the last thing Richard wants to consider, but according to his father, it's the only way. Yvette Cruz is the beautiful, savvy mergers and acquisitions rep charged with brokering the buyout agreement between her company and Morgan Confectioners, and Richard Morgan is the only thing standing between her and the promotion she desperately wants. She came from nothing and worked her way to the top of her field, so she's not about to let his refusal to cooperate stop her from getting what she wants. Corporate rivalry gives way to an unwise attraction when the two meet and spend a night together that ultimately changes their lives forever. Two enemies find love, but a betrayal threatens to tear them apart. Forgiveness and redemption can lead to everything they've ever wanted, but some things can't be forgotten. Sensuality Level: Sensual
