This collection of studies by specialists in Egyptology and astronomy attempts to unlock some of the secrets of ancient Egyptian civilization. Among the subjects examined are the constellations of ancient Egypt, the Egyptian calendar, and landscape and symbolism, especially how they relate to the orientation of temples and royal tombs.

Captain Scott W. W. Norton & Company

An illuminating collection of

work by members of the Religious Society of Friends. Covering nearly three centuries of religious development, this comprehensive anthology brings together writings from prominent Friends that illustrate the development of Quakerism, show the nature of Quaker spiritual life, discuss Quaker contributions to European and American civilization, and introduce the diverse community of Friends, some of whom are little remembered even among Quakers today. It gives a balanced overview of Quaker history, spanning the globe from its origins to missionary work, and explores daily life,

beliefs, perspectives, movements within the community, and activism throughout the world. It is an exceptional contribution to contemporary understanding of religious thought. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. Rip Van Goofy was a friendly fellow who lived in a sleepy town. He was always chatting with his friends and loved to go fishing. But when his friends

were busy one sunny afternoon, Rip Van Goofy set out alone to fish at his favorite fishing hole. Then, with his line in the water, Goofy fell asleep...and woke up forty years later! Don't miss this retelling of the classic tale of Rip Van Winkle—with a Disney twist!

Handbook Melinda Inn

Sir Ranulph Fiennes is uniquely qualified to write a new biography of Captain Scott. This is the first biography of Scott by someone who has experienced the deprivations, the stress and the sheer physical pain that Scott lived through; he has suffered all but the final tragedy endured by the much maligned Scott. He is determined

to put the record straight. As well as being the definitive biography of Scott, written with the full and exclusive cooperation of the Scott Estate, this book traces the way that Scott's reputation has been attacked and his achievements distorted. 'Sir Ranulph Fiennes has done Captain Scott's memory some service...he has certainly written a more dispassionate and balanced account than Huntford ever set out to do.' - Simon Courtauld, *Spectator*

This must-read for lovers of Stephen King's *The Shining* will leave readers breathless as Seda and her family find themselves at the mercy of a

murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As

the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

It is rare for a complete biography of an Australian scientist, particularly of an Australian woman scientist, to be published. It is rarer for

such a book to be co-authored by an American. Although scientists have written discourses on the history of their discipline, it is most unusual for a scientist to write a full length biography of a colleague in his field. It is also uncommon for a man to write about an Australian woman scientist; most of the work on Australian women scientists has been done by other women. However, these authors, both distinguished researchers in the field of radio astronomy, became so interested in the history of

their discipline and in the career of the pioneer radio astronomer Ruby Payne-Scott that they spent some years bringing this book to fruition. Until relatively recently, Ruby Payne-Scott had been the only woman scientist mentioned briefly in histories of Australian science or of Australian radio astronomy. This book will be an invaluable resource for anyone interested in these disciplines. Being scientists themselves, the authors explain Payne-Scott's scientific work in detail; therefore, the value and

importance of her contributions can, for the first time, be recognised, not only by historians but also by scientists.
