BESTSELLER You've heard

the advice: If you want to live

longer, eat healthy foods and

exercise daily. But there's a

third piece of the puzzle, and it

can add 10 to 15 years to your

life. It's been right under your

nose this whole time—literally.

Your mouth is the gateway to

your body and is the most

critical organ for improving

your health, from childhood

onward. Everything in the

human life cycle is related to

the mouth: fertility, childbirth,

sleeping soundly, success in

school, finding a mate, getting

a job, psychological well-

being, avoiding chronic or

systemic disease, and aging

well. Your mouth is a window

into the health of your body as

a whole; from its microbiome

to its structure, it impacts your

physical and mental wellness in health to the fullest extent
countless ways. Unfortunately, the mouth-body connection has
been largely neglected by American medicine . . . until
now. If *Your Mouth Could Talk* is the result of over 20
years of firsthand experience and research by renowned
orthodontist and dentofacial orthopedist, Dr. Kami Hoss. In
this groundbreaking work, Dr. Hoss connects the dots
between oral health and whole-body health, offering a
roadmap to a longer, more successful future for you and
your family. This isn't a book about brushing and flossing—or
any of the other standard advice you get from your
dentist. Instead, you'll hear about how to protect your
mouth's microbiome, the effect of diet, the relationship
between oral structure and sleep problems, how to breathe
better, and more. This is an in-depth guide for people who
want to take control of their

possible—who want to understand how their mouth
contributes to their overall health and quality of life, and
what they can do to better care for it. If your mouth could talk,
it would tell you about the condition of your entire life.
Time to start listening.

This report, which was developed by an expert committee of the Institute of Medicine, reviews the first three services listed above. It is intended to assist policymakers by providing syntheses of the best evidence available about the effectiveness of these services and by estimating the cost to Medicare of covering them. For each service or condition examined, the committee commissioned a review of the scientific literature that was presented and

discussed at a public workshop. As requested by Congress, this report includes explicit estimates only of costs to Medicare, not costs to beneficiaries, their families, or others. It also does not include cost-effectiveness analyses. That is, the extent of the benefits relative to the costs to Medicare—or to society generally—is not evaluated for the services examined. The method for estimating Medicare costs follows the generic estimation practices of the Congressional Budget Office (CBO). The objective was to provide Congress with estimates that were based on familiar procedures and could be compared readily with earlier and later CBO estimates. For each condition or service, the estimates are intended to suggest the order of magnitude of the costs to

Medicare of extending coverage, but the estimates could be considerably higher or lower than what Medicare might actually spend were coverage policies changed. The estimates cover the five-year period 2000-2004. In addition to the conclusions about specific coverage issues, the report examines some broader concerns about the processes for making coverage decisions and about the research and organizational infrastructure for these decisions. It also briefly examines the limits of coverage as a means of improving health services and outcomes and the limits of evidence as a means of resolving policy and ethical questions.

We don't want to believe it, but it's true. Looks do matter. Everyone knows it's

important to look good for a job interview or beauty pageant, but how much do looks matter in everyday situations? Do attractive people get better service, more money, more prestige? Many sociology studies say yes. When it comes to a beauty boost, many people start with their smile. A bright, healthy smile can immediately bolster anyone's looks. That's why more and more people are visiting their dentists for cosmetic procedures to improve worn, misshapen and misaligned teeth. Face it, as we age, our teeth become worn and dull. Over time and through use, we wear down the protective enamel or outer coating of our teeth. Like almost anything else that ages, this leads to a worn and less than beautiful smile. One way to limit the dull look is to take control and develop a consistent oral hygiene regimen. Nothing else can do more for your overall outlook than a healthy and clean mouth. Taking care of your teeth, gums, and the rest of your mouth, including the repair or replacement of defective teeth is what defines dental care. It's common to see a person suffering from dental diseases due to carelessness and lack of knowledge of good oral hygiene. Do you want to have beautifully sparkling white teeth? Well here's for you: 49 Brilliant Tips To Get Beautifully Sparkling, White, Teeth Ever! This book is about the journey through time from the placid years of the 1950s to the present, with dentistry as the vehicle and humor as the driver. Beginning with dental school and continuing with service in the US Army and through five plus decades in the town of Colchester, Connecticut, it shows how

humor became a very important factor in the dental practice, both as a way of reducing fear in the patient and also of humanizing the image of a dentist. People looked forward to going to the dentist! Honest!

"You really can have the successful practice you desire; enjoy going to work each day,

have a patient base that happily refers to you and enjoy worry-free time away from the office." - Mary Fisher-Day

"Hiring Mary as my Dental Consultant was the best thing I ever did for my Practice. She helped me reach 5 and 10 year goals in less than 2 years. Her ability to evaluate my Practice, find the problem areas and address those areas with results, in a very short period of time, amazed me. I actually have a life outside the office and the financial freedom I hoped to have 10 years from now." -Dr. James Richardson

Before hiring Mary, we had no idea where our overhead stood. We knew something was out of whack but didn't know where to begin to find the problem. Mary evaluated our overhead, pointed out areas that were in line and areas that needed work. With her help we now have systems in place to monitor our overhead and have the knowledge and tools to keep it in line. In addition, we have fine-tuned our

business office and have collections consistently at 98% or above. Our recall percentage is well above the norm and our Hygiene department is more efficient and productive than we ever thought it could be. It's nice to have a competent, dependable Consultant who listens and will tailor Management for the individual needs of the practice."
