"You really can have the successful practice you desire; enjoy going to work each day, have a patient base that happily refers to you and enjoy worry-free time away from the office." - Mary Fisher-Day "Hiring Mary as my Dental Consultant was the best thing I ever did for my Practice. She helped me reach 5 and 10 year goals in less than 2 years. Her ability to evaluate my Practice, find the problem areas and address those areas with results, in a very short period of time, amazed me. I actually have a life outside the office and the financial freedom I hoped to have 10 years from now." -Dr. James Richardson Before hiring Mary, we had no idea where our overhead stood. We knew something was out of whack but didn't know where to begin to find the problem. Mary evaluated our overhead, pointed out areas that were in line and areas that needed work. With her help we now have systems in place to monitor our overhead and have the knowledge and tools to keep it in line. In addition, we have fine-tuned our business office and have collections consistently at 98% or above. Our recall percentage is well above the norm and our Hygiene department is more efficient and

productive than we ever thought it could be. It's nice to have a competent, dependable Consultant who listens and will tailor Management for the individual needs of the practice." -Doctors Doug and Cathy Smith *Show Me Your Teeth* Plunkett Research, Ltd. We don't want to believe it, but it's true. Looks do matter. Everyone knows it's important to look good for a job interview or beauty pageant, but how much do looks matter in everyday situations? Do attractive people

get better service, more money, more prestige? Many sociology studies say yes. When it comes to a beauty boost, many people start with their smile. A bright, healthy smile can immediately bolster anyone's looks. That's why more and more people are visiting their dentists for cosmetic procedures to improve worn,

misshapen and misaligned teeth. Face it, as we age, our teeth become worn and dull. Over time and through use, we wear down the protective enamel or outer coating of our teeth. Like almost anything else that ages, this leads to a worn and less than beautiful smile. One way to limit the dull look is to take control

and develop a consistent oral hygiene regimen. Nothing else can do more for your overall outlook than a healthy and clean mouth. Taking care of your teeth, gums, and the rest of your mouth, including the repair or replacement of defective teeth is what defines dental care. It's common to see a person

suffering from dental diseases due to carelessness and lack of knowledge of good oral hygiene. Do you want to have beautifully sparkling white teeth? Well here's for you: 49 Brilliant Tips To Get Beautifully Sparkling, White, Teeth Ever! This book will give you the best dental solutions, dental
