**Register of Research Projects in the Social Sciences in Progress in Ireland** Routledge Many teacher education programs globally are undergoing significant changes in response to government policy, imperatives driven by global competitiveness, as well as local conditions. This is particularly relevant in the South African context where teacher education seeks to navigate from the ravages of apartheid education towards addressing the developmental needs of the majority of its citizens. This book records and explores efforts by academic staff members within the Faculty of Education at Stellenbosch University, South Africa, responding to the demands of a new program in initial teacher education. It brings together diverse views seeking to present a coherent program in the Postgraduate Certificate in Education (PGCE). It examines how curriculum design unfolds across disciplines in the program, and crucially, the commonalities in the presentation of course material. Lecturers examine the purpose, structure and content of their teaching as they engage with putting democratic policy goals into practice in the core, as well as subject-specific modules of the program.

**Nineteenth Edition Multilingual Matters** First published in 1992, **Experiential Learning** was written to explore in detail the ways in which the assessment and accreditation of prior and current experiential learning (APEL) was being practised in higher education, further education, community and voluntary provision, training organisations and employment, in provision for the unemployed, youth training schemes, and for updating and retraining. The book argues that individuals can be encouraged and motivated to learn if they are enabled to develop a due sense of their own capacity to learn. It looks at the background of APEL in Britain, and explores its progression into a day-to-day concern for policy-makers and providers of formal courses and training and development programmes in many sectors. It also considers how APEL can be used alongside other economic and social developments to improve the organisation and the provision of opportunities for learning at the post-secondary stage. **Experiential Learning** will appeal to those with an interest in the history and theory of the assessment and accreditation of experiential learning.

**Case Study Findings** Routledge This volume reports on the Case Study Project, an initiative that evaluates the experiences of math and science teachers across the United States and includes levels of schooling and achievement levels. The report focuses on typical public schools in the United States at three levels: elementary, junior high, and senior high with the intent of creating a composite profile of typical schools. The volume is divided into five chapters: "Rationale for the Study," "The Development and Implementation of Education Standards in the United States," "Individual Differences and the United States Education System," "The Role of School in United States Adolescents' Lives," and "Teachers and the Teaching Profession in the United States." Results show that the typical school had adopted curriculum standards or guidelines proposed by state departments of education, rather than by a national body. One exception to this was the influential set of national guidelines developed by the National Council of Teachers of Mathematics. Despite the general interest in standards, the choices made by parents, teachers, and students reflected many values, of which the desire for independence was one of the strongest. Students who were surveyed exhibited high optimism, especially those students from middle- class families. (RJM)
