In cases of derivatives following-to-join, the

derivative's qualifying relationship to the principal applicant must have existed when the principal beneficiary obtained lawful permanent resident status and continue to exist through final adjudication of the derivative's adjustment application for the derivative applicant to remain eligible.

Derivative Classification Student Guide

A derivative is a financial contract whose value is derived from the performance of underlying market factors, such as interest rates, currency exchange rates, and commodity,

credit, and equity prices. Derivative transactions include a wide assortment of financial contracts including structured debt obligations and deposits, swaps, futures, options, caps, floors, collars, forwards and various ...
