Design Guidelines and Area Plans Referenced in the Zoning Ordinance. The Zoning Ordinance refers to urban design plans and guidelines that apply to certain parts of the city or to certain categories of development. When a project is required to undergo design review (for example, if it requires a special permit from the Planning Board), it is important to review the plans and guidelines that are applicable to that area or development type and to demonstrate how the proposed development ...

The purpose of this guideline is to ensure that the laboratory design process will include adequate facilities for storage or consumption of food and other personal tasks that should be performed outside of areas where chemical, biological, or radiological materials are handled or stored. This policy will outline best practices with respect to separation of non-laboratory activities to reduce the risk of exposure or cross contamination from

laboratory operations.

Site Considerations Garden centers, retail greenhouses and farm stands are a popular way of marketing plants. Most operate year-round but some are open only on a seasonal basis, limiting sales to the spring bedding plant season and major holidays. In recent years, most of the major chain stores have installed garden centers to market to their large customer base.
