Whether you own or rent, designing and decorating small spaces can be a challenge. Where do you start? How much should you budget? Is DIY decorating an option, or is working with a professional the best way to achieve results? In **An Insider's Guide to Interior Design for Small Spaces**, thirty-year design veteran Gail Green answers all these questions and more, welcoming you to the world of small space design and helping you transform your living space into a beautiful, upscale dwelling you're happy to call home.

Never Too Small Harper Collins

Whether you inhabit a studio or a sprawling house with one challenging space, **Maxwell Gillingham-Ryan**, co-founder of the most popular interior design website, **Apartment Therapy**, will help you

transform tiny into totally fabulous. According to Maxwell, size constraints can actually unlock your design creativity and allow you to focus on what's essential. In this vibrant book, he shares forty small, cool spaces that will change your thinking forever. These apartments and houses demonstrate hundreds of inventive solutions for creating more space in your home, and for making it more comfortable. Leading us through entrances, living rooms, kitchens and dining rooms, bedrooms, home offices, and kids' rooms, **Apartment Therapy's Big Book of Small, Cool Spaces** is brimming with ingenious tips and ideas, such as:

- Shifting the sense of scale through contrasting colors
- Adding airiness by using transparent collections
- Utilizing the area under a loft bed for a kitchen and mini-bar
- Tucking an office with chic vintage doors into an unused bedroom corner

In each dwelling Maxwell points out what makes the layout work and what adds style. Most of the "therapy" involves minor tweaks that can be accomplished on a limited budget, such as dividing a room with sheer curtains, turning a door into

a desk, or disguising electrical boxes with art displays. An extensive resource guide, including Maxwell's favorite websites for buying desks, open storage solutions, and much more, will help you turn even the tiniest residence into a place you are always happy to come home to.

Architectural Diagrams 1 Fox Chapel Publishing

The trendsetting architect Rem Koolhaas has carried it out to perfection, whereas the next generation of international stars refined it even more, giving us the unconventional presentation of designs and ideas in the form of diagrams. This method of presentation is easy to understand when dealing with the client and can be communicated internationally, beyond language and cultural barriers — a product of our globalised world. However, diagrams are now much more than explanations and form their own discipline in creative professions connected to design and construction. What looks simple is in fact a complex matter. This title in the series Construction and Design Manual is in its second edition and assembles 384 pages of diagrams by avant-garde architects and designers who specialise in public space, landscape architecture and urban planning.

Small Space Organizing HarperCollins

The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. Human Dimension and Interior Space is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric

tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With Human Dimension and Interior Space, these standards are now accessible to all designers of interior environments.

Modern Apartment Design provides guidelines to the design of modern apartment buildings as well as a summation of current cutting-edge practice in engineered timber construction. The book covers a brief history of apartment buildings around the world, with a broad outline of different types of apartment blocks. It has a strong focus on the design and actual construction of apartment buildings, especially those utilising mass timber, such as cross-laminated timber and laminated veneer lumber. It also features six Case Study chapters from industry-leading practitioners in the area, enabling best practice in architecture and engineering of these new apartment building types to be more widely understood and propagated worldwide. The fully illustrated, full-colour case studies span the globe and include:

Jettison the old rulebooks about home décor and “undecorate” your space. As the founder and creative director of DwellStudio—which is famous for its brightly colored, graphic textile designs for home furnishings—designer Christiane Lemieux challenges tradition in a quintessentially American way, championing a fresh, unconventional approach to creating a beautiful and

comfortable home. Lemieux emboldens readers to push aside stuffy, professionally-designed décor, showing them instead how to infuse their own personality into their home. Undecorate profiles twenty homes from all over the country, revealing their owners’ love of imperfection and penchant for surprise and unusual juxtapositions while inspiring readers to follow their own whimsy and practicalities in their personal spaces. An anglophile creates an English manor in Hollywood, mixing British flea-market finds with midcentury furniture. A car fanatic turns a vintage Airstream trailer into a master bedroom and situates it in the middle of a vast industrial loft in downtown Chicago. A couple transforms a log house in Nashville, Tennessee, by blending their modern and eclectic styles with the home’s rustic charm. Though the designs differ widely, the spaces all express an open-minded attitude. Some homes embrace their contexts, while others transcend them. All are shaped by instinct and imagination and share innovative ideas that readers can use to organically and elegantly create their home to match their lifestyle and tastes. Lemieux gets to the essence of the homeowners’ distinctive styles, pinpointing the transformative ideas, thoughtful details, and useful solutions that make each home memorable. With more than 200 full-color photographs, Undecorate will both inspire and guide homeowners to a new outlook on home design.
