Big Bushy Mustache Walter de Gruyter GmbH & Co KG  
Gary Soto writes that when he was five "what I knew best was at ground level." In this lively collection of short essays, Soto takes his reader to a ground-level perspective, resreating in vivid detail the sights, sounds, smells, and textures he knew growing up in his Fresno, California, neighborhood. The "things" of his boyhood tie it all together: his Buddha "splotched with gold," the taps of his shoes and the "engines of sparks that lived beneath my soles," his worn tennies smelling of "summer grass, asphalt, the moist sock breathing the defeat of basesall." The child's world is made up of small things--small, very important things.

In thirteen stories full of wit and energy, Gary Soto illuminates the ordinary lives of young people. Meet Angel, who would rather fork over twenty bucks than have photos of his naked body plastered all over school; Philip, who discovers he has a "mechanical mind," whatever that means; Estela, known as Stinger, who rules Jos 's heart and the racquetball court; and many other kids, all of them with problems as big as only a preteen can make them. Funny, touching, and wholly original, Local News is Gary Soto in top form.

In a prose that is so beautiful it is poetry, we see the world of growing up and going somewhere through the dust and heat of Fresno's industrial side and beyond: It is a boy's coming of age in the barrio, parochial school, attending church, public summer school, and trying to fall out of love so he can join in a Little League baseball team. His is a clarity that rings constantly through the warmth and wry reality of these sometimes humorous, sometimes tragic, always human remembrances.

## A Summer Life David Goggins

Focusing on the often unrecognized role race plays in expressions of Chicano culture, Mestizaje is a provocative exploration of the volatility and mutability of racial identities. In this important moment in Chicano studies, Rafael P é rez-Torres reveals how the concepts and realities of race, historical memory, the body, and community have both constrained and opened possibilities for forging new and potentially liberating multiracial identities. Informed by a broad-ranging theoretical investigation of identity politics and race and incorporating feminist and queer critiques, P é rez-Torres skillfully analyzes Chicano cultural production. Contextualizing the history of mestizaje, he shows how

the concept of mixed race has been used to engage issues of hybridity and voice and examines the dynamics that make mestizo and mestiza identities resistant to, as well as affirmative of, dominant forms of power. He also addresses the role that mestizaje has played in expressive culture, including the hip-hop music of Cypress Hill and the vibrancy of Chicano poster art. Turning to issues of mestizaje in literary creation, P é rez-Torres offers critical readings of the works of Emma P é rez, Gil Cuadros, and Sandra Cisneros, among others. This book concludes with a consideration of the role that the mestizo body plays as a site of elusive or displaced knowledge. Moving beyond the oppositions—nationalism versus assimilation, men versus women, Texans versus Californians—that have characterized much of Chicano studies, Mestizaje synthesizes and assesses twenty-five years of pathbreaking thinking to make a case for the core components, sensibilities, and concerns of the discipline. Rafael P é rez-Torres is professor of English at the University of California, Los Angeles. He is author of *Movements in Chicano Poetry: Against Myths, Against Margins*, coauthor of *To Alcatraz, Death Row, and Back: Memories of an East LA Outlaw*, and coeditor of *The Chicano Studies Reader: An Anthology of Aztl á n, 1970 – 2000*.

What do Gaby Lopez, Michael Robles, and Cynthia Rodriguez have in common? These three kids join other teens and tweens in Gary Soto's new short story collection, in which the hard-knock facts of growing up are captured with humor and poignance. Filled with annoying siblings, difficult parents, and first loves, these stories are a masterful reminder of why adolescence is one of the most frustrating and fascinating times of life.

"Cuban writer Reinaldo Arenas (1943-1990) is considered to be one of Latin America's most innovative and provocative late-twentieth-century literary voices. A prolific writer who overcame enormous persecution and censorship, Arenas wrote novels, short stories, poetry, theater pieces, and essays." "Francisco Soto's Reinaldo Arenas is not only the first

comprehensive review in English to examine and analyze the major works of Arenas, but it is also the first to trace the articulation of homoerotic themes and issues in the Cuban writer's oeuvre."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

A Gate Enables passage between what is inside and what is outside, and the connection poetry forges between inner and outer lives is the fundamental theme of these nine essays. *Nine Gates* begins with a close examination of the roots of poetic craft in "the mind of concentration" and concludes by exploring the writer's role in creating a sense of community that is open, inclusive and able to bind the individual and the whole in a way that allows each full self-expression. In between, *Nine Gates* illumines the nature of originality, translation, the various strategies by which meaning unfolds itself in language, poetry's roots in oral memory and the importance of the shadow to good art. A person who enters completely into the experience of a poem is initiated into a deeper intimacy with life. Delving into the nature of poetry, Jane Hirshfield also writes on the nature of the human mind, perception and experience. *Nine Gates* is about the underpinnings of poetic craft, but it is also about a way of being alive in the world -- alertly, musically, intelligently, passionately, permeably. In part a primer for the general reader, *Nine Gates* is also a manual for the working writer, with each "gate" exploring particular strategies of language and thought that allow a poem to convey meaning and emotion with clarity and force. Above all, *Nine Gates* is an insightful guide to the way the mind of poetry awakens our fundamental consciousness of what can be known when a person is most fully alive.

A close-up look at the scandals that rocked the San Francisco Zen Center, a leader in alternative religious practice and the counterculture in America, and their repercussions. The remarkable forty-year history of the people who established the first Buddhist monastery outside of Asia in the history of the world has never been told. Michael Downing wondered why. "I'm living proof of why you better not speak out," explained one ordained Zen priest. "The degree to which I was scapegoated publicly was most effective in keeping everyone else quiet." In 1959, a Soto Zen priest took leave of his family in Japan to minister to the congregation of a Buddhist temple in San Francisco. Alan Watts and others spread the word that an authentic Zen Roshi was living there, and students, poets, drifters, and seekers began to attend his lectures. Impressed

by their sincerity and commitment, Suzuki Roshi began to offer instruction in zazen (meditation) and other Buddhist practices to these devoted young spiritual pioneers. The San Francisco Zen Center was born. And then, in 1983, meltdown. A sex scandal rocked Zen Center, and it triggered tragedies and headlines about abuse of power that called into question the whole matter of alternative religious practice in America. Overnight the most prominent community of Buddhists in the West found itself at the vanguard of a cultural revolt against spiritual authority. For *Shoes Outside the Door*, Michael Downing spent three years studying documents and interviewing more than eighty people who were there, at ground zero. As engaging as any mystery, as mysterious as any political campaign, as political as any family gathering, this story will haunt and challenge readers as they unravel this essential chapter of American history.

A timely new edition of a pioneering work in Latino literature, National Book Award nominee Gary Soto's first collection (originally published in 1977) draws on California's fertile San Joaquin Valley, the people, the place, and the hard agricultural work done there by immigrants. In these poems, joy and anger, violence and hope are placed in both the metaphorical and very real circumstances of the Valley. Rooted in personal experiences—of the poet as a young man, his friends, family, and neighbors—the poems are spare but expansive, with Soto's voice as important as ever. This welcome new edition has been expanded with a crucial selection of complementary poems (some previously unpublished) and a new introduction by the author.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The *Latinx Urban Condition* brings interdisciplinary cultural theory and U.S. Latinx urban literature into conversation, focusing on the realities and urban experiences of Latinx living in major cities in the United States from the 1960 's to the present. As a cultural studies analyst of U.S. Latinx urban literature and culture, the book focuses on analyzing the works of Latinx authors who write about the cities in which they were raised and how growing up in these environments shaped their lives, their communities, and their future. Their fictional work helps us understand how the human and cultural tapestry of

the Latinx community is inextricably connected to the spatial transformations taking place in many cities across the country, most notably within the cities in which the narratives take place. The main purpose is to analyze the symbolic realities lived by the characters in order to understand how Latino families and communities are experiencing displacement under instituted neoliberal policies, a process known as development and progress or gentrification. These processes are experienced through aspects of privatization, deregulation, homelessness, residential segregation, inequality, unemployment, and poverty.

Dr. Greg Zacharias, former Chief Scientist of the United States Air Force (2015-18), explores next steps in autonomous systems (AS) development, fielding, and training. Rapid advances in AS development and artificial intelligence (AI) research will change how we think about machines, whether they are individual vehicle platforms or networked enterprises. The payoff will be considerable, affording the US military significant protection for aviators, greater effectiveness in employment, and unlimited opportunities for novel and disruptive concepts of operations. Autonomous Horizons: The Way Forward identifies issues and makes recommendations for the Air Force to take full advantage of this transformational technology.

Malls, stadiums, and universities are actually liturgical structures that influence and shape our thoughts and affections. Humans--as Augustine noted--are "desiring agents," full of longings and passions; in brief, we are what we love. James K. A. Smith focuses on the themes of liturgy and desire in *Desiring the Kingdom*, the first book in what will be a three-volume set on the theology of culture. He redirects our yearnings to focus on the greatest good: God. Ultimately, Smith seeks to re-vision education through the process and practice of worship. Students of philosophy, theology, worldview, and culture will welcome *Desiring the Kingdom*, as will those involved in ministry and other interested readers.

For David Goggins, childhood was a nightmare -- poverty, prejudice, and physical abuse colored his days and haunted his nights. But through self-discipline, mental toughness, and hard work, Goggins transformed himself from a depressed, overweight young man with no future into a U.S. Armed Forces icon and one of the world's top endurance athletes. The only man in history to complete elite training as a Navy SEAL, Army Ranger, and Air Force Tactical Air Controller, he went on to set records in numerous endurance events, inspiring *Outside* magazine to name him "The Fittest (Real) Man in America." In *Can't Hurt Me*, he shares his astonishing life story and reveals that most of us tap into only 40% of our capabilities. Goggins calls this The 40% Rule, and his story illuminates a path that anyone can follow to push past pain, demolish fear, and reach their full potential.

For a century, economists have driven forward the cause of globalization in financial institutions, labour markets, and trade. Yet there have been consistent warning signs that a global economy and free trade might not always be advantageous.

Where are the pressure points? What could be done about them? Dani Rodrik examines the back-story from its seventeenth-century origins through the milestones of the gold standard, the Bretton Woods Agreement, and the Washington Consensus, to the present day. Although economic globalization has enabled unprecedented levels of prosperity in advanced countries and has been a boon to hundreds of millions of poor workers in China and elsewhere in Asia, it is a concept that rests on shaky pillars, he contends. Its long-term sustainability is not a given. The heart of Rodrik's argument is a fundamental 'trilemma': that we cannot simultaneously pursue democracy, national self-determination, and economic globalization. Give too much power to governments, and you have protectionism. Give markets too much freedom, and you have an unstable world economy with little social and political support from those it is supposed to help. Rodrik argues for smart globalization, not maximum globalization.
