PC Mag Springer
For courses in Management Science, Quantitative Methods or Decision Models. This widely adopted text presents an accessible introduction to the techniques and applications of management science. It is designed to make the subject easy to understand, interesting and accessible for students with limited mathematical background or skills. The author focuses on management science not only as a collection of techniques and processes, but as a philosophy and method for approaching problems in a logical manner, and includes spreadsheets

with solutions in every chapter.

PC Mag Tarcher

Next Generation Society
Technological and Legal Issues

Recent developments in information and communication technology (ICT) have paved the way for a world of advanced communication, intelligent information processing and ubiquitous access to information and services.

The ability to work, communicate, interact, conduct business, and enjoy digital entertainment virtually anywhere is r- idly

becoming commonplace due to a multitude of small devices, ranging from mobile phones and PDAs to RFID tags and wearable computers. The increasing number of connected devices and the proliferation of networks provide no indication of a slowdown in this tendency. On the negative side, misuse of this same technology entails serious risks in various aspects, such as privacy violations, advanced electronic crime, cyber terrorism, and even enlargement of the digital divide. In extreme cases it may even threaten basic principles and human rights. The aforementioned issues raise an important question: Is our society ready to adopt the technological advances in ubiquitous networking, next-generation Internet,

and pervasive computing? To what extent will it manage to evolve promptly and efficiently to a next-generation society, addressing the forthcoming ICT challenges? The Third International ICST Conference on e-Democracy held in Athens, Greece during September 23 – 25, 2009 focused on the above issues. Through a comprehensive list of thematic areas under the title “ Next-Generation Society: Technological and Legal issues, ” the 2009 conference provided comprehensive reports and stimulated discussions on the technological, ethical, legal, and political challenges ahead of us.
