The second edition of *Theories in Second Language Acquisition* seeks to build on the strengths of the first edition by surveying the major theories currently used in second language acquisition research. This volume is an ideal introductory text for undergraduate and graduate students in SLA and language teaching. Each chapter focuses on a single theory, written by a leading scholar in the field in an easy-to-follow style – a basic foundational description of the theory, relevant data or research models used with this theory, common misunderstandings, and a sample study from the field to show the theory in practice. This text is designed to provide a consistent and coherent presentation for those new to the field who seek basic understanding of theories that underlie contemporary SLA research. Researchers will also find the book useful as a "quick guide" to theoretical work outside their respective domains.

Russian in Use: An Interactive Approach to Communicative Competence is a four-skill language textbook intended for advanced students of Russian. The book focuses on high-frequency, nonliterary topics of general interest: geography, education, politics, ecology, and Russians' perceptions of America. Each chapter contains preparatory vocabulary and user-friendly grammatical exercises supported by examples from contemporary popular literature. The lessons then provide practice using external resources; authentic reading texts; authentic, unscripted listening exercises (available online); and independent writing and speaking activities. The book emphasizes independent language production. Students examine topics from diverse perspectives and then are encouraged to develop and defend their own opinions in clear, colloquial standard Russian. *Russian in Use* is accompanied by an instructor's manual, which contains keys to the exercises and transcripts of the listening passages.

The *Knowing the Bible* series is a new resource designed to help Bible readers better understand and apply God's Word. Each 12-week study leads participants through one book of the Bible and is made up of four basic components: (1) Reflection questions designed to help readers engage the text at a deeper level; (2) "Gospel Glimpses" highlighting the gospel of grace throughout the book; (3) "Whole-Bible Connections" showing how any given passage connects to the Bible's overarching story of redemption culminating in Christ; and (4) "Theological Soundings" identifying how historic orthodox doctrines are taught or reinforced throughout Scripture. With contributions from a wide array of influential pastors and church leaders, these gospel-centered studies will help Christians see and cherish the message of God's grace on each and every page of the Bible. The book of Romans was Paul's greatest literary achievement, a majestic letter in which the apostle expounds on crucial doctrines such as original sin, election, substitutionary atonement, the role of the law, and justification by faith alone. Plumbing the theological depths, Jared Wilson writes with a pastor's eye toward understanding and application as he explains the biblical text with clarity and passion, helping readers follow along as Paul recounts the history of salvation and illuminates the glories of the cross of Christ.

DESTINOS is an innovative beginning Spanish program based on a 26-week television series premiering on PBS in the fall of 1992. The 52 half-hour shows of the series use the powerful appeal of a uniquely Hispanic genre -- the telenovela (soap opera) -- to make language and culture come alive. The situation and context of each episode introduce students to the basic structures, language functions and vocabulary groups of Spanish that are then presented in the print materials. (Most grammar explanations and exercises are in the workbook/study guides.) This complete one-year course is designed to help students develop communicative proficiency -- listening, speaking, reading, and writing -- as well as cultural awareness in Spanish. The plot of DESTINOS is designed to engage student viewers from the very beginning. A wealthy Mexican patriarch, nearing the end of his life, reveals a secret he has kept from his family for many years. His revelation leads to some important questions that must be answered before he dies. Raquel Rodríguez, a Mexican-American lawyer, embarks on a search for those answers, a search that takes her to Spain, Argentina, Puerto Rico, and back to Mexico. Students and viewers can join in the search -- learning Spanish and about the rich and diversified cultural context in which it is spoken throughout the world.

The Actor's Life HarperCollins

AUDIBLE EDITOR'S PICK A paradigm-shifting study of neurodivergent women—those with ADHD, autism, synesthesia, high sensitivity, and sensory processing disorder—exploring why these traits are overlooked in women and how society benefits from allowing their unique strengths to flourish. As a successful Harvard and Berkeley-educated writer, entrepreneur, and devoted mother, Jenara Nerenberg was shocked to discover that her "symptoms" --only ever labeled as anxiety-- were considered autistic and ADHD. Being a journalist, she dove into the research and uncovered neurodiversity—a framework that moves away from pathologizing "abnormal" versus "normal" brains and instead recognizes the vast diversity of our mental makeups. When it comes to women, sensory processing differences are often overlooked, masked, or mistaken for something else entirely. Between a flawed system that focuses on diagnosing younger, male populations, and the fact that girls are conditioned from a young age to blend in and conform to gender expectations, women often don't learn about their neurological differences until they are adults, if at all. As a result, potentially millions live with undiagnosed or misdiagnosed neurodivergences, and the misidentification leads to depression, anxiety, low self-esteem, and shame. Meanwhile, we all miss out on the gifts their neurodivergent minds have to offer. *Divergent Mind* is a long-overdue, much-needed answer for women who have a deep sense that they are "different." Sharing real stories from women with high sensitivity, ADHD, autism, misophonia, dyslexia, SPD and more, Nerenberg explores how these brain variances present differently in women and dispels widely-held misconceptions (for example, it's not that autistic people lack sensitivity and empathy, they have an overwhelming excess of it). Nerenberg also offers us a path forward, describing practical changes in how we communicate, how we design our surroundings, and how we can better support divergent minds. When we allow our wide variety of brain makeups to flourish, we create a better tomorrow for us all.
