Michael Gurian, whose national bestseller *The Wonder of Boys* presented a radical and enlightening view of parenting sons, now offers a groundbreaking approach to raising daughters. In *The Wonder of Girls*, Gurian, himself the father of two girls, provides crucial information for fully understanding the basic nature of girls: up-to-date scientific research on female biology, hormones, and brain development and how they shape girls' interests, behavior, and relationships. He also offers insight into a culture mired in competition between traditionalism and feminism and a new vision that provides for the equal status of girls and women yet acknowledges their nature as complex and distinct from men. He explains what is "normal" for girls each year from birth to age 20; what developmental needs girls face in each stage; how to communicate effectively with girls; and how to cope with developmental crises such as early sexuality, eating disorders, parental divorce, and more. With personal insights, practical tips, real-life anecdotes, and accessible science, *The Wonder of Girls* creates a new parenting paradigm. Key elements include: a nature-based approach to why girls are the way they are the connection between the need for profound attachment and the physical and brain development of girls support for a girl's inherent need for intimacy tools to protect girls' self-esteem and emotional life a new approach to girls' character development and rites of passage. With this scientifically based developmental map of girlhood, Gurian equips parents with a comprehensive guide for raising daughters. Challenging our culture to examine and embrace a crucial piece of the puzzle missing thus far, *The Wonder of Girls* elevates the dialogue on parenthood.

In 1967, Canada celebrated the 100th anniversary of its founding with a spectacular party, and the whole world was invited. Montreal's Expo 67 was the first world's fair held in Canada, and it was a huge success, attracting over 50 million visitors. The 1,000-acre site was built on two man-made islands in the St. Lawrence River and incorporated 90 futuristic pavilions created by some of the world's greatest architects and designers. Over 60 countries were represented, along with many private, corporate and thematic pavilions, all brought together under the theme "Man and his World." With performers and entertainers of all varieties, restaurants, cultural attractions, exhibitions and a world-class amusement park, Expo 67 was literally the party of the century, exceeding all expectations.

This book presents a systematic study of transboundary, regional and local water conflicts and resistance across several river basins in South Asia. Addressing hydro-socio-economic aspects in competing water sharing and transfer agreements, as well as conflicting regimes of legal plurality, property rights and policy implementation, it discusses themes such as rights over land and natural resources; resettlement of dam-displaced people; urban – rural conflicts over water allocation; peri-urbanisation, land use conflicts and water security; tradeoffs and constraints in restoration of ecological flows in rivers; resilience against water conflicts in a river basin; and irrigation projects and sustainability of water resources. Bringing together experts, professionals, lawyers, government and the civil society, the volume analyses water conflicts at local, regional and transboundary scales; reviews current debates with case studies; and outlines emerging challenges in water policy, law, governance and institutions in South Asia. It also offers alternative tools and frameworks of water sharing mechanisms, conflict resolution, dialogue, and models of cooperation and collaboration for key stakeholders towards possible solutions for effective, equitable and strategic water management. This book will be useful to scholars and researchers of development studies, environment studies, water studies, public policy, political science, international relations, conflict resolution, political economy, economics, sociology and social anthropology, environmental law, governance and South Asian studies. It will also benefit practitioners, water policy thinktanks and associations, policymakers, diplomats and NGOs.
