Korean: A Comprehensive Grammar is a reference to Korean grammar, and presents a thorough overview of the language, concentrating on the real patterns of use in modern Korean. The book moves from the alphabet and pronunciation through morphology and word classes to a detailed analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. Updated and revised, this new edition includes lively descriptions of Korean grammar, taking into account the latest research in Korean linguistics. More lower-frequency grammar patterns have been added, and extra examples have been included throughout the text. The unrivalled depth and range of this updated edition of Korean: A Comprehensive Grammar makes it an essential reference source on the Korean language.

Whether they're threading a barrel or shredding a swell, these amazing women are making enormous waves in the world of surfing. If you thought surfing was a male-dominated sport, think again. The thirty women surfers profiled in this thrilling collection can rip a wave with the best of them. Hailing from all over the world, each surfer is featured in spectacular photography and with their own inspirational words. There's American professional surfer Lindsay Steinriede on how her father's death has inspired her career; French board shaper Valerie Duprat on how she got her start "sculpting foam"; Conchita Rossler, founder of Mooana Retreat in Portugal, on connecting mind, body, and spirit; and Australian photographer Cait Miers on empowering women. You'll also meet surfers who are over sixty, who surf while pregnant, who captain boats, teach yoga, and make movies. Breathtaking photography captures these women from every angle, on and off the waves, in some of the world's most visually stunning locations. The perfect gift for surfing enthusiasts, this unique compilation of stunning pictures and hard-won wisdom proves that the thrill of catching a wave, riding it, and kicking out belongs to everyone.

"A First Course in Linear Algebra, originally by K. Kuttler, has been redesigned by the Lyryx editorial team as a first course for the general students who have an understanding of basic high school algebra and intend to be users of linear algebra methods in their profession, from business & economics to science students. All major topics of linear algebra are available in detail, as well as justifications of important results. In addition, connections to topics covered in advanced courses are introduced. The textbook is designed in a modular fashion to maximize flexibility and facilitate adaptation to a given course outline and student profile. Each chapter begins with a list of student learning outcomes, and examples and diagrams are given throughout the text to reinforce ideas and provide guidance on how to approach various problems. Suggested exercises are included at the end of each section, with selected answers at the end of the textbook."--BCcampus website.

PHP & MySQL: The Missing Manual Conran

Elvis Cole finds himself deep in the bayou of Louisiana searching for the estranged parents of a television star -- but something deadly is looking for him. L.A. private eye Elvis Cole is hired by popular television star Jodie Taylor to delve into her past and identify the biological parents who gave her up for adoption thirty-six years before. Cole's assignment is to find out their biological history and report back. It seems all too clear cut. But when he gets to Louisiana and begins his search, he finds that there's something much darker going on. Other people are also looking for Taylor's parents, and some are ending up dead. And when Cole realizes that his employer knew more than she was telling, Voodoo River becomes a twisting tale of identity, secrets, and murder.

Over the past 50 years, Meriam & Kraige's Engineering Mechanics: Statics has established a highly respected tradition of excellence—a tradition that emphasizes accuracy, rigor, clarity, and applications. Now in a Sixth Edition, this classic text builds on these strengths, adding a comprehensive course management system, Wiley Plus, to the text, including an e-text, homework management, animations of concepts, and additional teaching and learning resources. New sample problems, new homework problems, and updates to content make the book more accessible. The Sixth Edition continues to provide a wide variety of high quality problems that are known for their accuracy, realism, applications, and variety motivating students to learn and develop their problem solving skills. To build necessary visualization and problem-solving skills, the Sixth Edition continues to offer comprehensive coverage of drawing free body diagrams— the most important skill needed to solve mechanics problems.

Great Tractors Springer Nature

This book explains the financial appraisal of capital budgeting projects. The coverage extends from the development of basic concepts, principles and techniques to the application of them in increasingly complex and real-world situations. Identification and estimation (including forecasting) of cash flows, project appraisal formulae, and the application of net present value (NPV), internal rate of return (IRR) and other project evaluation criteria are illustrated with a variety of calculation examples. Risk analysis is extensively covered by the use of risk adjusted discount rate, certainty equivalent, sensitivity, simulation and Monte Carlo analysis. The NPV and IRR models are further applied to forestry, property and international investments. Resource constraints are introduced to the capital budgeting decisions with a variety of worked examples using linear programming technique. All calculations are extensively supported by Excel workbooks on the Web, and each chapter is well reviewed by end of chapter questions.

Operating Facilities of the U.S. Coast Guard Hachette Books

This is the resource that engineers turn to in the study of radiation detection. The fourth edition takes into account the technical developments that continue to enhance the instruments and techniques available for the detection and spectroscopy of ionizing radiation. New coverage is presented on ROC curves, micropattern gas detectors, new sensors for scintillation light, and the excess noise factor. Revised discussions are also included on TLDs and cryogenic spectrometers, radiation backgrounds, and the VME standard. Engineers will gain a strong understanding of the field with this updated book.

Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel

[The Grace Walk Experience](#) Citadel Press

Throughout the 19th century animals were integrated into staged scenarios of confrontation, ranging from lion acts in small cages to large-scale re-enactments of war. Initially presenting a handful of exotic animals, travelling menageries grew to contain multiple species in their thousands. These 19th-century menageries entrenched beliefs about the human right to exploit nature through war-like practices against other animal species. Animal shows became a stimulus for antisocial behaviour as locals taunted animals, caused fights, and even turned into violent mobs. Human societal problems were difficult to separate from issues of cruelty to animals. Apart from reflecting human capacity for fighting and aggression, and the belief in human dominance over nature, these animal performances also echoed cultural fascination with conflict, war and colonial expansion, as the grand spectacles of imperial power reinforced state authority and enhanced public displays of nationhood and nationalistic evocations of colonial empires. Fighting nature is an insightful analysis of the historical legacy of 19th-century colonialism, war, animal acquisition and transportation. This legacy of entrenched beliefs about the human right to exploit other animal species is yet to be defeated. "Peta Tait brings to the book an impressive scholarly command of the documentary material, from which she draws a range of vivid examples and revealing analyses of human – animal confrontation in popular entertainments ... The book is written with verve and clarity, and will be of interest to a wide readership in performance studies and cultural history." Professor Jane R. Goodall, Western Sydney

University Peta Tait FAHA is Professor of Theatre and Drama at La Trobe University and Visiting Professor at the University of Wollongong, and author of *Wild and dangerous performances: animals, emotions, circus* (2012).

In 1967, Canada celebrated the 100th anniversary of its founding with a spectacular party, and the whole world was invited. Montreal's Expo 67 was the first world's fair held in Canada, and it was a huge success, attracting over 50 million visitors. The 1,000-acre site was built on two man-made islands in the St. Lawrence River and incorporated 90 futuristic pavilions created by some of the world's greatest architects and designers. Over 60 countries were represented, along with many private, corporate and thematic pavilions, all brought together under the theme "Man and his World." With performers and entertainers of all varieties, restaurants, cultural attractions, exhibitions and a world-class amusement park, Expo 67 was literally the party of the century, exceeding all expectations.
