Deus Ex: Mankind Divided - Limited Edition Guide Thomas Nelson

This is the most comprehensive & authoritative text ever to be written on handcuffs & metallic restraints. Its 24 chapters are filled with several hundred photographs, & also contain over 200, clear, line drawings. Chapter 1 contains the most comprehensive history of restraint equipment ever to be written. Starting in 4004 BC, the author brings the reader--through line art, photographs, & artistic drawings--into the 20th Century with a very complete written & illustrated history of all types of restraints. The balance of the text shows the reader how to apply the handcuffs in a variety of situations. Other topics include the medical implications of handcuffing, hogtying, & the use of thumbcuffs. There is also a chapter on the transportation of prisoners. At 304 pages, the bibliography is one of the best ever to be compiled on restraints. It is more like an encyclopedia than a "how-to" text on handcuffing. This text contains everything a police officer, defensive tactics instructor, lawyer, or general reader needs to know about handcuffs & their application. Criminal justice professors & students will find the book an excellent resource, too.

Joyful Mending shows you how to fix old items of clothing, linens and household objects by turning tears and flaws into beautiful features. Simply by applying a few easy sewing, darning, felting, or crocheting techniques, as well as some sashiko and other favorite embroidery stitches, you can repair your favorite pieces in a transformative way. These techniques don't just save you money, but make your life more joyful, fulfilling and sustainable in an age of disposable "fast fashion." Author Noriko Misumi teaches you her philosophy of mending and reusing items based on the age-old Japanese concepts of mindfulness and Wabi Sabi (an appreciation of old and imperfect things). In her book, she shows you how to: Repair any kind of fabric that is torn, ripped or stained—whether knitted or woven Work with damaged flat or curved surfaces to make them aesthetically pleasing again Create repairs that blend in, as well as bold or whimsical visible repairs Darn your handmade or expensive gloves, sweaters and socks to make them look great again The joy to be found in working with your hands and the personal artistry you discover within yourself lie at the heart of this book. While nothing lasts forever, there's pleasure, as well as purpose, in appreciating age and imperfection. Joyful Mending allows you to surround yourself with the things that truly give you joy, whether they were given to you by a loved one, picked up in your travels or simply have a special place in your heart.

In *Too Much Free Speech?*, Randall P. Bezanson takes up an essential and timely inquiry into the Constitutional limits of the Supreme Court's power to create, interpret, and enforce one of the essential rights of American

citizens. Analyzing contemporary Supreme Court decisions from the past fifteen years, Bezanson argues that judicial interpretations have fundamentally and drastically expanded the meaning and understanding of "speech." Bezanson focuses on judgments such as the much-discussed Citizens United case, which granted the full measure of constitutional protection to speech by corporations, and the Doe vs. Reed case in Washington state, which recognized the signing of petitions and voting in elections as acts of free speech. In each case study, he questions whether the meaning of speech has been expanded too far and critically assesses the Supreme Court's methodology in reaching and explaining its expansive conclusions. Bezanson's measured approach and deep insights reveal the complexities of speech in the realms of human behavior and constitutional law. His wide-ranging analysis of relevant Supreme Court cases arms readers with the facts and perspectives necessary to reach independent conclusions about whether the Court's conduct befitted the independent judicial branch and to understand the consequences of its decisions for a representative democracy.

Gary Soto writes that when he was five "what I knew best was at ground level." In this lively collection of short essays, Soto takes his reader to a ground-level perspective, resreating in vivid detail the sights, sounds, smells, and textures he knew growing up in his Fresno, California, neighborhood. The "things" of his boyhood tie it all together: his Buddha "spotted with gold," the taps of his shoes and the "engines of sparks that lived beneath my soles," his worn tennies smelling of "summer grass, asphalt, the moist sock breathing the defeat of baseball." The child's world is made up of small things--small, very important things. The essays in this volume focus on the cognitive functions of feeling and the body. They are wide-ranging in terms of methodologies and problematics represented. Authors argue, for example, that the body functions as a schema of logical thought; that through the body we have access to an intricacy more ordered than language and logic; that we benefit morally and socially by attention to the cognitive function of emotions; and that we cannot maintain the dignity of the world nor extend value without aesthetic engagement. Both traditional philosophy and contemporary developments come into play in the essays.
