The sequel to the acclaimed novel Shinju again features detective Sano Ichiro as he trails a serial killer stalking feudal Japan. In 1689, an all-powerful shogun controls the state, surrounded by bitter machinations and political intrigues. When an ancient tradition suddenly and brutally reappears, Sano risks everything to bring the killer to justice. "Bundori is terrific. . . . So good you won't want to put it down, even to get off a plane. . . . [Laura Joh] Rowland hits her stride as a writer who can deal equally well with the pacing of plot and the nuances of character development. . . . Rowland clearly knows how to build suspense and action, a talent that she demonstrates with great skill."—New Orleans Times-Picayune "Bundori is one of those mysteries in which the itch to find out whodunit recedes before the pleasure of prowling through a different world."—Washington Post Book World "Sano may carry a sword and wear a kimono, but you'll immediately recognize him as an ancestor of Philip Marlowe or Sam Spade."—Denver Post "A colorful pictorial style that conveys . . . excitement and . . . danger."—The New York Times Book Review

More than ever, Christians are bombarded with tough faith questions from their pluralistic friends and neighbors. Many of these emerge as "anti-truth claims" and slogans we are all familiar with: • Why not just look out for yourself? • Do what you want--just as long as you don't hurt anyone

• Miracles violate the laws of nature • Aren't people born gay? Paul Copan has been answering questions like these for many years. In *When God Goes to Starbucks*, he offers readers solid and caring Christian responses to these and many other concerns that are being discussed in Starbucks, shopping malls, youth groups, and schools. Each chapter provides succinct answers and points for countering the cultural questions believers are faced with today.

It's a new generation of de Wolfe Pack cubs, carrying on the tradition of their illustrious grandfather. Thomas "Tor" de Wolfe has his hands full with battling women and battling enemies as he secures a border castle for Edward I. Chaos is the name of the game! Tor married, and lost, his wife at a young age. Because his wife was an orphan, he inherited her two sisters when they wed and when she died, they became his responsibility. Unfortunately, the two spinster sisters view Tor as their property. When Tor meets the worldly Isalyn de Featherstone, he is smitten. Isalyn, however, is not. Tor is big and handsome, but lives too much of a provincial life. She wants big cities, excitement, money, and no baggage of a dead wife. Isalyn's father, however, feels differently - and Isalyn finds herself betrothed to the gentle de Wolfe giant. The spinsters have a new target. Let the battles begin! Enter a world of medieval mayhem, adventure, but most of all, of an overwhelming passion that soon

consumes both Tor and Isalyn. Add an ambitious and jilted suitor into the mix, and it could mean the end for everything they have worked so hard to build. But a strong love is worth fighting for, and no love is stronger than that of a de Wolfe. Part of the World of de Wolfe Pack series - de Wolfe Pack Generations subseries BE RICH AND HAPPY. Bundori: Villard

"The writing, the action, the characters...I can't praise it enough. No one writes Dystopian like Pam Godwin, but this book is so much more than a post apocalyptic tale." ~ Alta Hensley, USA Today Bestselling Author A virus devastates humanity. Few men survive. The rest are monsters. The women are dead, except Evie. Through a quirk in her genetics, she survives. When her physiology begins to evolve, she must come to terms with what she is and accept her role in finding a cure. The mutated hunt her. The men brutalize her...except three. Cryptic warrior, contrite lover, caring enemy; they are fiercely protective of the last living woman, but divided in their own agendas. Can they come together to protect the only hope for humanity? Evie must survive. Heart of Eve (FREE) can be read in any order between the books. Contains erotica, alpha male, priest, sci-fi, paranormal, horror, dystopian, dark romance, apocalyptic, post-apocalyptic, adventure, action, suspense, thriller

When the School Horse was King : a Tribute to Faithful Friends and Companions Infinity Publishing In his *Metaphysical Foundations of Natural Science* (1786), Kant accounts for the possibility of an acting-at-a-distance gravitational force, demonstrates the infinite divisibility of matter, and derives analogues to Newtonian laws of motion. The work is his major statement in philosophy of science, and was especially influential in German-speaking countries in the nineteenth century. However, this complex text has not received the scholarly attention it deserves. The chapters of this Critical Guide clarify the accounts of matter, motion, the mathematization of nature, space, and natural laws exhibited in the *Metaphysical Foundations*; elucidate the relationship between its metaphysics of nature and Kant's critical philosophy; and describe the historical context for Kant's account of natural science. The volume will be an invaluable resource for understanding one of Kant's most difficult works, and will set the agenda for future scholarship on Kant's philosophy of science.

An exceptionally beautiful and hospitable country, Oman is a researchers delight, with archives and manuscripts, archaeological and ethno-archaeological attractions ranging from pre-Islamic Arabia to the present, and modern multi-tribal communities. Located on the southern edge of the Persian Gulf, where the Arabian Sea and the Indian Ocean meet and control the entrance to the Persian Gulf, it has stood at a commercial and cultural crossroads for centuries. But with commercial sea routes also to Africa and Asia, it is simultaneously a contemporary state that combines modernity and tradition, religion and multiculturalism -- a place where the present meets the past without being bound by it. It is, thus, no accident that Ibadis have played and continue to play an important role in the history of Muslim theology and its political theory, a role that only in recent years has begun to be acknowledged in international academic circles. This volume presents the proceedings of the first international conference dedicated to Ibadism and the Sultanate of Oman, which was held at Aristotle University of Thessaloniki in November 2009. The goal of the conference was to introduce Ibadism and Ibadi Studies to the worldwide research community and, indeed, it has served as the springboard for other conferences and the founding of academic groups dedicated to Ibadism and the Sultanate of Oman. In the first part of this volume, we are guided through Ibadi history, theology, and jurisprudence while the second part opens the reader to a broad vista on the dialectics between religion, society, and politics within contemporary Ibadi communities and especially that of Oman. By introducing Ibadism to the broader academic community, we hope to contribute to the mutual understanding and rapprochement of peoples, cultures, and religions. In this regard, each paper in the present volume has lasting value. (Luxury Edition)

Appropriate for all basic-to-intermediate level courses in Visual Basic 2008 programming. Created by world-renowned programming instructors Paul and Harvey Deitel, Visual Basic 2008 How to Program, Fourth Edition introduces all facets of the Visual Basic 2008 language hands-on, through hundreds of working programs. This book has been thoroughly updated to reflect the major innovations Microsoft has incorporated in Visual Basic 2008 and .NET 3.5; all discussions and sample code have been carefully audited against the newest Visual Basic language specification. The many new platform features covered in depth in this

edition include: LINQ data queries, Windows Presentation Foundation (WPF), ASP.NET Ajax and the Microsoft Ajax Library, Silverlight-based rich Internet application development, and creating Web services with Windows Communication Foundation (WCF). New language features introduced in this edition: object anonymous types, object initializers, implicitly typed local variables and arrays, delegates, lambda expressions, and extension methods. Students begin by getting comfortable with the free Visual Basic Express 2008 IDE and basic VB syntax included on the CD. Next, they build their skills one step at a time, mastering control structures, classes, objects, methods, variables, arrays, and the core techniques of object-oriented programming. With this strong foundation in place, the Deitels introduce more sophisticated techniques, including inheritance, polymorphism, exception handling, strings, GUI's, data structures, generics, and collections. Throughout, the authors show developers how to make the most of Microsoft's Visual Studio tools. A series of appendices provide essential programming reference material on topics ranging from number systems to the Visual Studio Debugger, UML 2 to Unicode and ASCII.

Ecottheory beyond Green Routledge

Emphasizing sustainability, balance, and the natural, green dominates our thinking about ecology like no other color. What about the catastrophic, the disruptive, the inaccessible, and the excessive? What of the ocean's turbulence, the fecundity of excrement, the solitude of an iceberg, multihued contaminations? Prismatic Ecology moves beyond the accustomed green readings of ecottheory and maps a colorful world of ecological possibility. In a series of linked essays that span place, time, and discipline, Jeffrey Jerome Cohen brings together writers who illustrate the vibrant worlds formed by colors. Organized by the structure of a prism, each chapter explores the coming into existence of nonanthropocentric ecologies. "Red" engages sites of animal violence, apocalyptic emergence, and activism; "Maroon" follows the aurora borealis to the far North and beholds in its shimmering alternative modes of world composition; "Chartreuse" is a meditation on postsustainability and possibility within sublime excess; "Grey" is the color of the undead; "Ultraviolet" is a potentially lethal force that opens vistas beyond humanly known nature. Featuring established and

emerging scholars from varying disciplines, this volume presents a collaborative imagining of what a more-than-green ecology offers. While highlighting critical approaches not yet common within ecottheory, the contributions remain diverse and cover a range of topics including materiality, the inhuman, and the agency of objects. By way of color, Cohen guides readers through a reflection of an essentially complex and disordered universe and demonstrates the spectrum as an unfinishable totality, always in excess of what a human perceives.
