The great secret of
our time is that
there are still
uncharted frontiers
to explore and new
inventions to
create. In Zero to
One, legendary
entrepreneur and
investor Peter Thiel
shows how we can
find singular ways
to create those new
things. Thiel begins

with the contrarian
premise that we live
in an age of
technological
stagnation, even if
we're too distracted
by shiny mobile
devices to notice.
Information
technology has
improved rapidly, but
there is no reason
why progress should
be limited to
computers or Silicon
Valley. Progress can
be achieved in any
industry or area of
business. It comes
from the most
important skill that
every leader must
master: learning to
think for yourself.
Doing what someone
else already knows
how to do takes the
world from 1 to n,
adding more of
something familiar.

But when you do something new, you go from 0 to 1. The next Bill Gates will not build an operating system. The next Larry Page or Sergey Brin won't make a search engine. Tomorrow's champions will not win by competing ruthlessly in today's marketplace. They will escape competition altogether, because their businesses will be unique. Zero to One presents at once an optimistic view of the future of progress in America and a new way of thinking about innovation: it starts by learning to ask the questions that lead you to find value in unexpected places.

Sailor's Anthology is a fictionalized account of the now famous NIMITZ TIC TAC UFO encounter that happened in November 2004 off the coast of San Diego, California. In 2008 when I wrote the story, many involved were still in active duty. I chose to fictionalize the historical record in the effort to protect the identities of those still serving. Why did I write the story? After retiring from the United States Navy earlier that year, memories of the encounter continued to trouble me greatly. When I did try to tell others my story, I could tell that nobody really believed me or they believed there had to be a more prosaic explanation. Not knowing what else to do, I wrote these short stories and self-published them in the Library of Congress as a way to hide in plain sight what has now become

contemporaneous evidence of the actual event. It was my hope then that if the TIC TAC encounter ever did become public, my book might serve as evidence now. My plan worked. You now hold in your hands a piece of history itself. About the Author Kevin M. Day is a 21 year Navy veteran. Serving his entire career in San Diego and Hawaii, he completed 8 Western Pacific Deployments and visited many of the countries that touch the sea between the West Coast of the United States and the Middle East. Retired from active duty in November 2007, he works as a Systems Engineer from his home in Phoenix, Arizona. He is pursuing in Master of Science degree in Systems Engineering and writes short stories in his spare time.

How can we design more sustainable industrial and urban systems that reduce environmental impacts while supporting a high quality of life for everyone? What progress has been made towards reducing resource use and waste, and what are the prospects for more resilient, material-efficient economies? What are the environmental and social impacts of global supply chains and how can they be measured and improved? Such questions are at the heart of the emerging discipline of industrial ecology, covered in *Taking Stock of Industrial Ecology*. Leading authors, researchers and practitioners review how far industrial ecology has developed and current issues and concerns, with illustrations of what the industrial ecology paradigm has achieved in public policy, corporate strategy and

industrial practice. It provides an introduction for students coming to industrial ecology and for professionals who wish to understand what industrial ecology can offer, a reference for researchers and practitioners and a source of case studies for teachers.

“A sprightly and clear-eyed testimonial to the value of globalization” (The Wall Street Journal) as seen through six surprising everyday goods—the taco salad, the Honda Odyssey, the banana, the iPhone, the college degree, and the blockbuster HBO series Game of Thrones. Trade allows us to sell what we produce at home and purchase what we don’t. It lowers prices and gives

us greater variety and innovation. Yet understanding our place in the global trade network is rarely simple. Trade has become an easy excuse for struggling economies, a scapegoat for our failures to adapt to a changing world, and—for many Americans on both the right and the left—nothing short of a four-letter word. But as Fred P. Hochberg reminds us, trade is easier to understand than we commonly think. In *Trade Is Not a Four-Letter Word*, you’ll learn how NAFTA became a populist punching bag on both sides of the aisle. You’ll learn how Americans can avoid the grim specter of the \$10 banana. And you’ll finally discover the truth about whether or not,

as President Trump has famously tweeted, “trade wars are good and easy to win.” (Spoiler alert—they aren’t.) Hochberg debunks common trade myths by pulling back the curtain on six everyday products, each with a surprising story to tell: the taco salad, the Honda Odyssey, the banana, the iPhone, the college degree, and the smash hit HBO series *Game of Thrones*. Behind these six examples are stories that help explain not only how trade has shaped our lives so far but also how we can use trade to build a better future for our own families, for America, and for the world. *Trade Is Not a Four-Letter Word* is the antidote to today’s acronym-laden trade

jargon pitched to voters with simple promises that rarely play out so one-dimensionally. Packed with colorful examples and highly digestible explanations, *Trade Is Not a Four-Letter Word* is “an accessible, necessary book that will increase our understanding of trade and economic policies and the ways in which they impact our daily lives” (*Library Journal*, starred review).
