For centuries, logic puzzles have entertained, inspired and

educated kids of all ages. Studies show these engaging "brain teasers" provide unsurpassed benefits to the body and mind, increasing manual dexterity, mathematical abilities and overall intellectual agility. Crafting Wood Logic Puzzles provides plans and instructions for crafting 18 of the most popular manual puzzles. Projects range from traditional "put together/take apart" games like pentominoes and soma cubes to more sophisticated "unlocking" head-scratchers, such as the Burr and Heart Box puzzles. Readers will also learn specialized cutting, drilling, sanding, gluing and

finishing techniques that make crafting wooden puzzles possible.

In May 2019, the Institut für Arbeitsschutz der Deutschen Gesetzlichen Unfallversicherung (IFA) was hosting the 14th International Conference on Hand-Arm-Vibration. The event is organised every four years under the auspices of international expert bodies at changing places. It is aimed at all stakeholders in the subject, whether experts from the occupational safety and health and research communities or management personnel in the areas of manufacture and design. Mechanized manual work is often

associated with exposure to vibration that may impact adversely upon the health and well-being of the affected individuals. Besides impairments to comfort and performance, harm to the hand-arm system, possibly permanent, must be prevented as a matter of priority. In a world of work that is becoming more and more complex, combined exposures are also becoming increasingly relevant. What influence does hand-arm vibration have in conjunction with noise or whole-body vibration? What contribution can be made by medicine, diagnostics, epidemiology, measurement technology and prevention to the identification and containment of

risks, and better still, to their elimination? What is the role of international regulatory activity in this context? The 14th International Conference on Hand-Arm Vibration aimed to address these and many other questions concerning hand-arm vibration, and to find answers relevant to the field.

When first invited to give talks and demonstrations on carving techniques to school children, Howard K. Suzuki quickly found out that wood was not the most suitable medium. It took too long to

show much progress in the limited time available. He decided to use bars of soap to demonstrate basic techniques on carving and sculpturing. Soap is an inexpensive and very desirable carving medium. Soon demonstrations developed into hands-on experiences for his students. In this book, Dr. Suzuki describes and illustrates with color photographs how to make safe and simple wooden carving tools. He demonstrates basic soap-carving techniques using

several stepwise how-to examples, from a simple heart to a more complex turtle. Dr. Suzuki integrates art and science into his instructions and combines them to produce a super learning experience for children (of all ages) who do learn to carve through his methods.

A high level of literacy in both print and digital media is required for negotiating most aspects of 21st-century life, including supporting a family, education, health, civic participation, and competitiveness in the global economy. Yet, more than 90 million U.S. adults lack adequate literacy. Furthermore, only 38 percent of U.S. 12th graders are at or above proficient in reading. Improving Adult Literacy

Instruction synthesizes the research on literacy and learning to improve literacy instruction in the United States and to recommend a more systemic approach to research, practice, and policy. The book focuses on individuals ages 16 and older who are not in K-12 education. It identifies factors that affect literacy development in adolescence and adulthood in general, and examines their implications for strengthening literacy instruction for this population. It also discusses technologies for learning that can assist with multiple aspects of teaching, assessment, and accommodations for learning. There is inadequate knowledge

about effective instructional practices and a need for better assessment and ongoing monitoring of adult students' proficiencies, weaknesses, instructional environments, and progress, which might guide instructional planning. Improving Adult Literacy Instruction recommends a program of research and innovation to validate, identify the boundaries of, and extend current knowledge to improve instruction for adults and adolescents outside school. The book is a valuable resource for curriculum developers, federal agencies such as the Department of Education, administrators, educators, and funding agencies. *Production Young Voyageur*

Taunton's Fine Woodworking

Creative Publishing International Beginning with the fundamentals of carpentry work within a domestic construction setting, this book outlines which tools are required, and examines their care and proper use before covering the interpretation of technical drawings It goes on to explain a

wide range of first-fixing operations prior to plastering, and second-fixing operations after plastering. Each chapter covers the subject in great detail, with step-by-step illustrations and text to provide the reader with a complete picture of the sequence of work required to carry out each job. Goring's Manual of First and Second Fixing Carpentry has been updated to take recent developments in the building trades into account, and is also fully up to date with current industry best practice. Printed in full colour throughout, new chapter has been incorporated to address the sharpening of traditional saws. The breadth of coverage and easily accessible

'how-to' approach makes this book an ideal resource for apprentices taking NVQs and those following Construction Awards within the Wood Occupations from City & Guilds/Construction Skills. The technical detail and practical focus ensures that this book will be a vital purchase for all students, and an essential reference for any experienced carpenter or joiner.

Throughout World War II, when Saturday nights came around, servicemen and hostesses happily forgot the war for a little while as they danced together in USO clubs, which served as havens of stability in a time of social, moral, and geographic

upheaval. Meghan Winchell demonstrates that in addition to boosting soldier morale, the USO acted as an architect of the gender roles and sexual codes that shaped the "greatest generation." Combining archival research with extensive firsthand accounts from among the hundreds of thousands of female USO volunteers, Winchell shows how the organization both reflected and shaped 1940s American society at large. The USO had hoped that respectable feminine companionship would limit venereal disease rates in the military. To that end, Winchell explains, USO recruitment practices characterized white middle-class women as sexually respectable, thus implying that the sexual behavior of working-class women and women of color was suspicious. In response, women of color sought to redefine the USO's definition of beauty and respectability, challenging the USO's vision of a home front that was free of racial, gender, and sexual conflict. Despite clashes over class and racial ideologies of sex and respectability, Winchell finds that most hostesses benefited from the USO's chaste image. In exploring the USO's treatment of female volunteers, Winchell not only brings the hostesses' stories to light but also supplies a crucial missing piece for understanding the complex ways in which the war both destabilized and restored certain versions of social order.
